

# Threats to Asian Bears

Data compilation and design by S. Shimoinaba, F. Kitamura and T. Oi

The data on the distribution and conservation threats of bears in countries written in bold black letters were based on the report, "Understanding Asian Bears to Secure Their Future (compiled by Japan Bear Network, 2006)". The data on the distribution of the other countries are from Servheen et al. (1999). The countries written in white letters have bears, but were not covered in the report by Japan Bear Network (2006).

: population in danger

**Conflict vs Human**

 Injure to human
 Damage to crops

**Habitat Destruction**

 Grazing
 Use of non-timber forest products
 Infrastructure development
 Farmland development
 Illegal lumbering
 Legal lumbering
 Forest fire

**Direct Threats**

 Nuisance kill
 Poaching
 Incidental hunting
 Legal sports hunting
 demands for bear use
 Dancing bear
 Parts trading
 Bear farming
