

Create fun. Discover fun.

FUNPORTER

Plastic Model Kit Designed in Japan

Your journey to find new "truths"
starts when you have a plastic model kit
in your hand.

You can recreate things in front of you,
such as a character you saw on TV,
or a vehicle that inspired you.

Or go beyond that
to discover details you never saw on screen
or thought you knew and never doubted.

You expand your knowledge through creating.
You move your hands.

You use your imagination.

You discover truths you can't find just by searching.

It makes your entire life a delight,
not just during the moments
when you are creating but far beyond that.

FUNPORTER
a new brand of plastic models
that will grow and expand.

PERFECT GRADE

about 30 cm 1:60 scale

The Ultimate GUNPLA Packed with the Latest Technology

The highest end of GUNPLA, this series of ultimate avatars always packs in the latest technology to seamlessly scale down your model.

about 18 cm 1:100 scale

Innovative Inner Mechanics and Gimmicks

Our most promoted series packs in movement and gimmicks over innovative inner mechanics.

Left side

about 13 cm 1:144 scale

The Enthusiasm over Building a Mobile Suit at Your Fingertips in 1:144 Scale

Rich coloration, lifelike movements, expressive texture and a pre-built inner frame: This series keeps it real.

Right side

about 13 cm 1:144 scale

A Vast Lineup of Collectables

A collectable series featuring a broad lineup of easy-to-assemble kits from star-level item refinements to models not previously released as kits.

about 8 cm NON scale

A Whole New World of GUNPLA

Striking a keen balance between cute and cool, this tyke-sized series is easy to assemble and easy on the wallet.

Size Comparison

◦ The Perfect Grade series was too big to fit in the picture, so that feet area would be below this page.

What Is GUNPLA?

GUNDAM + PLASTIC MODEL = GUNPLA

GUNPLA is the common name for plastic models of Mobile Suits, Mobile Armor and other robots or battleships that appear on the "MOBILE SUIT GUNDAM" series.

HGUC 1:144 scale RX-78-2 GUNDAM

Devotion to GUNPLA

Over 473 million GUNPLA models have been sold in the past 37 years since the 1:144 GUNDAM was first released in 1980. GUNPLA models are now made domestically in Japan from planning & development to production at the BANDAI Hobby Center in "Hobby City Shizuoka" in order to maintain high quality and accurately meet market demand while ensuring uniformity in design.

This is where GUNPLA shines !

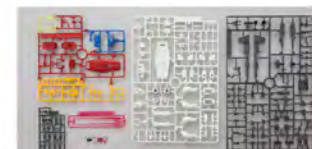

Example is HGUC 1:144 RX-78-2 GUNDAM Model.

A Before Assembly

Before beginning assembly, check the set contents and read the assembly manual for a smooth process.

Assembly manual

sprue frame

Have a set of diagonal pliers on hand. A set of tweezers will help, too.

B Cut Out the Parts

Following the steps in the assembly manual, cut out the necessary parts from the sprue frame.

C Assembly

After cutting out the parts, assemble them while making sure they are facing correctly.

D Attach the Decals

It's easier to attach smaller decals with tweezers.

E Finish & Strike a Pose

Try different equipment combinations and look at photos in the package for ideas on cool poses.

F Ink in Some Detail

Take your GUNPLA to another level by inking in some lines in between grooves using a GUNDAM Marker or an inking pen (sold separately).

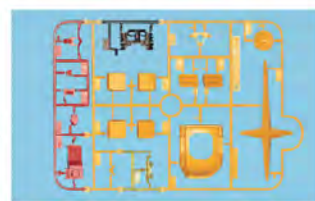

POINT-1 Snap-fit

Parts can be easily assembled without adhesives by simply snapping them together.

POINT-2 iroPLA

Special technology "Multi-color molding" casts several colors on the same runner at once. Your GUNPLA is colorful straight from the get go.

POINT-3 Touchgate

Gate geometry that makes it possible to pull out parts from the runner without diagonal pliers or other tools.

POINT-4 Undergate

Gate geometry that hides the areas where parts are cut away from the runner.

POINT-5 Multi-Insert Castings

Special technology that molds parts so they can fit together. Parts cut out from runners can be easily assembled.

Before Used Glue
Too much glue makes a crunchy GUNPLA. And too often the hands would get glued together.

Now No Glue!
Easy assembly without the dirty work.

Before Needed Paint
There is nothing worse than making that accidental brush stroke when you're almost finished.

Now No Paint!
No need to paint and wait, your GUNPLA is built with color.

Required Skills and Tools for Quality Finish

Files and other tools were needed to laboriously grind away conspicuous burrs.

Looks Great Straight Away!

No tools required, just assemble and your finished GUNPLA looks great.

Now, anyone can easily assemble a great-looking GUNPLA!

* The technology differs by GUNPLA type.

FIND YOUR PERFECT GUNPLA!

GUNPLA comes in many different series from easy-assembly models to high levelled models. Find a GUNPLA that best suits your taste!

For Beginner

For Professional

COOL AND CUTE A WHOLE NEW WORLD OF GUNPLA

BANDAI HOBBY CENTER Devotion to GUNPLA

The "BANDAI Hobby Center" is BANDAI SPIRITS Hobby Division's manufacturing base. All steps, from planning and development, designing, prototyping, production and shipping, take place here. Since the birth of the "1/144 GUNDAM" in 1980, over 473 million GUNPLA have been sent out to the world (as of March 2017), making it a true "GUNPLA factory."

Planning is the process where we think, "What kind of GUNPLA should we make?" For example, we plan to create GUNPLA based on Mobile Suits that appear in new TV and movie series. We also choose to make kits based on Mobile Suits from older series that fans will enjoy. Once the product is decided on, we begin considering its specifications, such as gimmicks, with staff in-charge of design and development.

We begin design with computers using source clips and setting images. A three-dimensional design using 3D CAD data, which is also used in architecture, and parts division, internal structures, transformation gimmicks are added. GUNPLA that are easy to assemble and have wide ranges of articulation cannot be created without "Japanese craftsmanship" technology.

The design data is outputted using a 3D printer, and articulation and gimmicks are checked. This prototype production process was done by hand in the past and took several weeks. However, it can now be quickly done in a few hours with 3D printers. We will also increase the accuracy of our designs through detailed checks of each part, as well as the whole body of the kit.

The metal casting molds are literal "molds" used to make plastic resin parts according to their design data. The basic parts of the molds are made by machine, but fine adjustment and corrections are done by craftsmen. These delicate adjustments determine the rigidity of the joints and holding capabilities. The molds can weigh up to over a ton! Cranes are used to move them around.

GUNPLA are produced with multi-color molding machines. "Multi-color molding" is a technology that allows the multiple colors to be recreated on one runner. Hobby Center is the only place in the world where this technology is made possible. The GUNPLA are made by setting the molds in the multi-color molding machine. Each runner only takes about 20 seconds to make. This enables mass production.

Once the runners are made, they are packed into boxes and the GUNPLA is complete. All processes from the development to production, packaging, packing and shipping take place in the Hobby Center. Completed GUNPLA are sent to fans all over the world.

Hobby Center Trivia

1 An eco-friendly factory

The exterior wall is a solar power panel and supports the power of the factory. It is an eco-friendly factory with a purification system that can reuse 20 million tons of rainwater and groundwater every year.

2 Employees have rank insignias

Employees have rank insignias that indicate their position. Uniforms are based on the uniform of the Earth Federation Forces featured in MOBILE SUIT GUNDAM, and there are two "office use" and "factory use" types.

3 The factory operates 24-hours.

Automatic transporters colored red with "antennas" resembling Char's Mobile Suits, as well as green ones based on mass-produced Zaks, work day and night.

The factory is operated by 3 shifts over 24 hours. This means that GUNPLA are being manufactured all day and night. Moreover, only three people are in charge of production and they manage the multi-color molding machines. Automatic transporters are used to carry plastic materials and completed GUNPLA.

4 Types of multi-color injection machines

The latest electromotive type machine put to use from 2015. Its colors resemble the "Black Tri-Stars" from MOBILE SUIT GUNDAM.

There are currently seventeen multi-color injection machines being used. There are electromotive and hydraulic multi-color injection machines, and the electromotive type machines are approx. 1.2 times faster than hydraulic type machines when it comes to production rates.

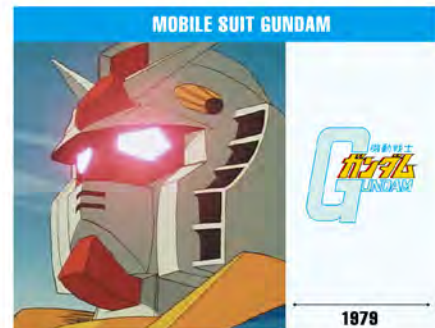

Even the bathrooms are themed with MS style colors.

HISTORY OF GUNDAM

TV

The celebrated first GUNDAM series. Set during the One Year War that began in Universal Century 0079, it depicts the conflict between young Amuro Ray, who unexpectedly becomes the pilot of the Earth Federation's prototype mobile suit GUNDAM, and his rival Char Aznable, an officer of the Principality of Zeon.

BEYOND

The Gundam series has been expanding for 40 years now, and the number of titles has also been increasing. It has gained fans from various generations and countries, and their tastes in titles have also diversified.

The 40th anniversary of Gundam will aim to reach beyond the frame of the individual titles, beyond global borders, and beyond generations, to entertain a wide variety of people.

We wish to form whole new connections between each fan's favorite title through encounters with titles that are yet to come.

After countless large wars, many of the prosperous countries were lost and an era had come where the land was filled with rubble. It seemed that there was a glimmer of hope, but a mysterious virus called the Yellow Zombie Virus had an outbreak that covered the entire land, and those who were infected by it lost their sanity and began attacking people. The remaining people were forced to live in fortresses to save themselves from the infected. However, the fortresses were ruled by the tyrannical Dong Zhuo after the former lord had passed. As though destiny had guided them, Liu Bei Unicorn Gundam met Guan Yu Nu Gundam and Zhang Fei God Gundam, and they decided to save the world. The world was to about to change drastically due to the strong passions of the three young men.

Watch the teaser PV from the GUNDAM.INFO!!

The series has greatly evolved after ten years! These are the points that make the Sangoku Soketsuden plastic model kits awesome!!

Proportion

Proportions that have greatly evolved from the former series and attention to parts division have allowed for recreations with the best color division. They can also be easily assembled without many stickers!!

Liu Bei Unicorn Gundam

Memory Equipment

One Memory, a key item of the series, is included with Liu Bei, Cao Cao, and Sun Jian. They come with multiple slots, and purchasing multiple kits will allow them to be equipped with two and even three Memories.

Weapons Combination

By combining the armaments of the Zhang Fei God Gundam to the Liu Bei Unicorn Gundam's Ryudan Hajin gun blade, the Souengekiryuha finisher form can be recreated!!

Action

The completely refined balance and various joint structures allow for the warriors to recreate lively poses!

Gundam Build Divers

NEXT PROJECT COMING SOON

STORY

GUNPLA Battle Nexus Online (GBN) is a new network game that lets people enjoy a variety of missions using GUNPLA in a virtual cyberspace dimension. Middle-school students Riku Mikami and Yukio Hidaka recruit their classmate Momoka Yashiro and dive together into this vast world. Becoming "Divers," or inhabitants of GBN, they meet a mysterious girl named Sarah who has an amazing sensitivity to GUNPLA. They begin playing alongside her, but...

There are many other famous Divers, starting with Kyoya Kujo, the champion whom Riku admires. Multiple Divers can join to form a team called a "force." Meanwhile, the game is disrupted by Mass-Divers who use unofficial tools called break decals. Through many encounters and experiences, Riku and his friends will build not only GUNPLA, but their own adventures as well!

GUNDAM BUILD FIGHTERS

STORY

The near future. Years after the huge "Gunpla"-plastic models based on the anime series Mobile Suit Gundam-boom of the 1980s. A second Gunpla boom is taking the world by storm, fueled by the revolutionary new ability to pilot your own Gunpla creations in "Gunpla Battles". These incredibly-popular Battles culminate in a yearly global tournament. Our hero Sei Iori, is a young Gunpla builder who dreams of someday making it to the world championships. An only child whose family owns a model shop, his talent is well-honed, but his weak piloting abilities have led to a series of first-round losses. Then, one day, he meets a boy named Reiji whose piloting skills are incredible. Together as a team, they take on the world!

Sei, the Gunpla Builder.
Reiji, the Gunpla Fighter.
Sei builds, Reiji fights.
Together, they're the Build Fighters!
Their dream is to make it to the Gunpla Battle World Championship... and win!

CHARACTERS

Sei Iori
A 7th-grader attending Seiho Academy. An only child, his family owns the shop Iori Models, and he's been a Gunpla fan from a young age. Both his building technique and his Gundam knowledge put many adults to shame. However, he's a poor Gunpla Batter with a long record of washing out in the first round.

Reiji
A mysterious boy Sei Iori encounters in town. He's overbearing, selfish, quick to anger, and lacking in manners. Thrust into the Gunpla Battle cockpit, he shows off incredible piloting skills on his first try.

China Kousaka
A 7th-grader in Seiho Academy, belongs to the art club, and a class rep. Her family runs the Kousaka Restaurant. Seeing Sei Iori's enthusiasm for Gunpla building, she takes up the hobby herself in her own thoughtful, reserved style.

Tatsuya Youki
This 12th-grader, president of both Seiho Academy's student government and its modeling club, is adored by the student population. Talented at Gunpla building and battle, he made it all the way to the world championships of the last Gunpla Battle tournament. He's also known as "the Crimson Comet".

STORY

Seven years have passed since Sei Iori won the 7th Gunpla Battle Championship World Tournament. The Gunpla Battle Championship is now run by Yajima Trading. With new rules and battle modes, the game's popularity has become even more widespread. However, the Seiho Academy that Sei Iori once attended has failed to catch onto the trend. The only member of the school's Gunpla Battle Club is its president, middle-schooler Fumina Hoshino. Currently there is no way the club can participate in the upcoming Gunpla Battle Japanese Under-19 Championship, where players fight in teams of three. Then Fumina meets a new transfer student. He is Sekai Kamiki, a young martial artist who has been travelling with his master. Together with a young Gunpla builder named Yuuma Kousaka, they finally have three members for their team. Sekai Kamiki, Yuuma Kousaka, and Fumina Hoshino – team "TRY FIGHTERS" is about to begin its challenge!

STORY

The Try Fighters team have been invited to the Nielsen Labs on a tropical island, as test pilots for Yajima Trading's new battle system. However, due to bugs in the new system, they find themselves on standby at the lodging facilities. As they wait expectantly at the resort-like lodging facilities, Sekai and the others encounter the trio of Shia, Minato, and Gyanko, who have also been invited as test pilots. And a puzzling mystery awaits the rivals who have been reunited on the tropical island... Now the Try Fighters face their biggest challenge!

MOBILE SUIT GUNDAM NARRATIVE

STORY : The Destination of the Newtype Myth

U.C. 0097, one year after the opening of "Laplace's Box." Despite the revelation of the Universal Century Charter that acknowledges the existence and rights of Newtypes, the framework of the world has not been greatly altered. The conflict later dubbed the "Laplace Incident" is thought to have ended with the downfall of the Neo Zeon remnants known as the Sleeves. In its final battle, two full psycho-frame mobile suits displayed power beyond human understanding. The white unicorn and the black lion were sealed away to remove this danger from people's consciousness, and they should now be completely forgotten. However, the RX-0 Unicorn Gundam 03, which disappeared two years earlier, is now about to show itself in the Earth Sphere once more. A golden phoenix... named Phenex.

MOBILE SUIT GUNDAM THE ORIGIN

Rise of the Red Comet VI

All 6 episodes of the past chronicles are finally complete...

On January 23, U.C. 0079, a decisive battle between Zeon and the Earth Federation begins at Side 5, or Loum. Though the Zeon forces are overwhelmingly outnumbered, their secret plan suddenly turns the tide of battle as they deploy a special assault regiment made up of humanoid mobile suit weapons, winning them a huge victory. Char Aznable of the Zeon forces produces particularly impressive results in his red mobile suit "Zaku II", earning a promotion to Lieutenant Commander and the nickname "Red Comet." After the Battle of Loum, the Earth Federation Forces initiate Operation V to fight back against Zeon. At Side 7, young Amuro Ray is indirectly involved as he takes action to uncover the secret of the new weapon "Gundam." Meanwhile, as high officials of the Earth Federation and Zeon forces meet in Antarctica for early peace negotiations, a certain speech is broadcast from Luna II throughout the world...

Clash at Loum V

Universal Century 0079. Humanity has turned even space itself into a battlefield, and the Principality of Zeon forces advance after wiping out half the world's population by carrying out the Operation British (colony drop). In response, the Earth Federation Forces mobilize their overwhelming fighting strength to regain the advantage. The complex intrigues of the Zabi family... Sayla Mass, as she contends with the whims of fate... Harmon and Ramba Ral, who is now a pilot in the Zeon forces... Amuro and Fraw, leading peaceful lives at Side 7... a dark shadow falls across them all. And the Zeon ace Char Aznable, driven by revenge, goes into action as the "Battle of Loum" finally begins.

Blue-Eyed Casval I

Universal Century 0068, Side 3 - The Autonomous Republic of Munzo. Zeon Zum Deikun, preaching the reformation of humanity through advancement into outer space, has been attempting to declare Munzo's complete independence from the Earth Federation government. Suddenly, he collapses and dies in the middle of a speech to the Diet. Upon Deikun's death, his aide Jimba Ral begins spreading conspiracy theories about the Zabi family. But despite his efforts, the Zabi family, led by Degwin Sodo Zabi, intensifies its secret maneuvering to seize control of Side 3. As we witness for the first time the untold chaotic history of the Universal Century, Casval and Artesia, Deikun's orphaned children, must face destinies just as tumultuous as the era itself.

Artesia's Sorrow II

Universal Century 0071. Three years have passed since the escape from Side 3's Autonomous Republic of Munzo. Casval and Artesia, the orphaned children of Zeon Zum Deikun, have fled to Earth along with Jimba Ral and taken refuge in the household of Teabolo Mass. They now live quiet lives under the names Edouard and Sayla. However, they are once again being targeted by the evil schemes of the pursuing Zabi family... Meanwhile, Side 3 has been renamed the Autonomous Republic of Zeon. The Zabi family have seized power, and as they consolidate their system of control, they embark on the development of a new weapon called the mobile worker in order to resist the Earth Federation Forces.

Dawn of Rebellion III

Universal Century 0074. Since leaving Texas Colony, Edouard Mass has camouflaged his identity and enrolled in the Autonomous Republic of Zeon's Space Defense Military Academy under the name of Char Aznable. He develops a friendship with his classmate Garma, a scion of the Zabi family. Gradually the two become admired by the other students. Then, in Universal Century 0077, the young at last rise up in arms and begin the fight for independence against the Earth Federation's security forces. This rebellion, however, also marks the beginning of Char's spectacular scenario of revenge... Now, the gears of history are turning!

Eve of Destiny IV

After the Dawn Rebellion, Char travels to Earth and meets a girl with mysterious powers named Lalah Sune. Meanwhile, Amuro's father Tem Ray is working on the RX-78 development project. Learning of the defection of Doctor Minovsky, a key figure in Zeon mobile suit development, he heads for the moon. History's first battle between mobile suits unfolds in the twilight zone of the lunar surface. Then comes Universal Century 0079. Side 3, the space city furthest from the Earth, launches a war of independence against the Earth Federation government under the name of the Principality of Zeon. An era of violent upheaval begins, in which half of the total human population will be killed...

What is "MOBILE SUIT GUNDAM THE ORIGIN Mobile Suit Discovery"?

The mechanical study plan developed in the world-view of "MOBILE SUIT GUNDAM THE ORIGIN". That focuses on MS which has not been revealed up to now, while MS development secret story is described. In Universal Century 0082, ANAHEIM ELECTRONIC that has merged ZEONIC investigated the past material and the document of own and the other companies during One Year War. The existence of MS and military results which have been unconfirmed up to now will be clarified and disclosed through the investigation. (Example of other companies: ZIMMAD, MIP, YASHIMA Heavy Industry, and others) On the ZEON side, the unconfirmed successful activity of MS of the preliminary test type and the genealogy of the test models will be clarified on the Zion side.

MOBILE SUIT GUNDAM THUNDERBOLT

STORY

It is Universal Century 0079, at the end of the One Year War between the Earth Federation and the Principality of Zeon. The space colonies of Side 4, or Moore, were previously destroyed by a Zeon attack, and many colonists lost their lives. Side 4 became a shoal zone filled with the wreckage of destroyed colonies and warships, lit by constant flashes of lightning due to collisions between electrified debris. It soon came to be known as the "Thunderbolt Sector." The Moore Brotherhood, an Earth Federation Forces unit made up of surviving citizens from Moore, set out to exterminate the Zeon forces in the Thunderbolt Sector in order to reclaim their homeland. To halt the Federation advance, the Zeon forces deployed their own Living Dead Division, which was established to collect combat data on soldiers with prosthetic limbs. Io Fleming, though part of the Moore Brotherhood, hates being tied down by his homeland and family history. Daryl Lorenz, having lost his legs in earlier battles, is now an ace sniper of the Living Dead Division. When they confront each other on the battlefield, they will reach a mutual realization. These two are destined to kill each other.

STORY

There was once a great conflict known as the "Calamity War." Roughly 300 years have passed since the end of this war. The Earth Sphere had lost its previous governing structure, and a new world was created under new systems of government. While a temporary peace had arrived, the seeds of a new conflict were being sown in the Mars Sphere, far away from Earth. Our hero, a boy named Mikazuki Augus, belongs to a private security company called Chryse Guard Security (CGS). The company accepts a mission to escort Kudelia Aina Bernstein, a girl who seeks to liberate the Martian city of Chryse from the rule of one of Earth's major powers. However, the military organization Gjallarhorn attacks CGS in order to nip this rebellion in the bud. CGS begins an evacuation, using Mikazuki and the other children as decoys. Orga Itsuka, the leader of the boys, decides to take this opportunity to rise up in revolt and launch a coup d'état against the adults who have been oppressing them. He gives Mikazuki the task of repulsing Gjallarhorn, and Mikazuki enters battle using the Gundam Barbatos, a mobile suit from the Calamity War era which has been serving as CGS's power source.

STORY

Mikazuki Augus is part of Tekkadan, an organization that jumped to fame from the battles involving the escorting of Kudelia Aina Bernstein to Earth and the Arbrau primary elections. The conflict exposed the corruption of Gjallarhorn as well, and the world was changing slowly but surely. Tekkadan, with the rights to halfmetal as negotiated with Arbrau, became a direct affiliate of Teiwaz. That resulted in abundant funds and more people interested in joining, growing massively to even have a branch on Earth. Kudelia, learning about the world from her journey to Earth, founded Admass Company to strive for the financial independence of Mars both in reality and in practice. However, there are many who do not look favorably about the rise of the youngsters who are trying to start something new. Admass Company will be inspecting a mining site of halfmetal, and hired Tekkadan to guard them. There, the leader of Tekkadan, Orga Itsuka, senses an attack from a new enemy. Under Orga's command, Tekkadan, including Mikazuki in the mobile suit Gundam Barbatos Lupus, head out to repel the enemy.

Introducing the latest brand commemorating the 30th anniversary of GUNPLA !!

The perfect culmination of features from HG, MG, PG!

The inner frame is constructed from only 12 parts. A multitude of detailed outer parts. A new balance of build and capability.

REALISTIC DECAL

The "metal glint" that is difficult to reproduce with painting is now achievable with decals. Paste them on the limb joints to easily achieve that mechanical feel.

ADVANCED MS JOINT

The multi-insert casting technology used in the Real Grade special inner frame allows simple cut-and-use assembly.

GUNPLA info

The Perfect Grade series strives for exceptional mechanistic design and human-like movement. Its precision, advanced gimmicks and number of parts surpasses all other series. Construction takes a vast amount of time, and while it may seem difficult, anyone can build a Perfect Grade model if they carefully read the manual. Next time try assembling this top class GUNPLA series.

RX-78-2 GUNDAM

Released in November 1998

MOBILE SUIT GUNDAM

A new SD series begins with freely adjustable proportions and an astounding MS line up!!

This new SD Gundam product line offers an even more freestyling experience with its "Super Deformed Frame" and "Cross Silhouette Frame." Outside of this plentiful lineup, Cross Silhouette Frames will also be sold individually for more play value.

About SD Gundam Cross Silhouette

This is a new series of SD Gundams adopting a cross-compatible frame. This new product can recreate both tall and short proportions with two frames and armor parts for each MS.

This is a new structure. This series pursues the core aspects of SD kits, <accessibility/playability after assembling/collectibility>, along with new additional features.

"Cross Silhouette System"

Various proportions can be recreated using the SD and CS Frames. The frames can be configured to create your very own proportions of choice. Proportions seen in manga and games can be recreated.

The recreation of all proportions

©SOTSU · SUNRISE ©SOTSU · SUNRISE · MBS ©SOTSU · SUNRISE · TVTOKYO

SD GUNDAM CROSS SILHOUETTE RX-78-2 GUNDAM

Released in June 2018

Includes SD Frame

The first installment to the "SD Gundam Cross Silhouette" series is the RX-78-2 Gundam. The tricolor color scheme has been recreated with a division of parts unique to the SD. The eyes can be exchanged to recreate the eyeless version.

SD GUNDAM CROSS SILHOUETTE RX-78-2 GUNDAM & CROSS SILHOUETTE FRAME SET

Released in June 2018

Includes CS Frame

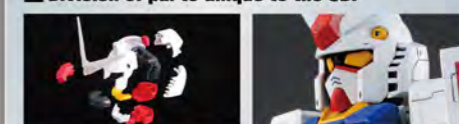

Includes SD Frame

Cross Silhouette System

GM's head also be included

Division of parts unique to the SD.

The head unit can be recreated with color divided parts due to its size, while maintaining details and a simple assembly.

The frames can be combined and customized to create different proportions!

The two frames are cross-compatible, making it easy to recreate proportions of your choice. The frames themselves can also be adjusted to create all imaginable proportions!

A set including both the SDCS RX-78-2 and Cross Silhouette Frame will be available simultaneously. Use the SD or CS Frame to assemble the kit in two styles. The frames themselves can also be combined.

CONCEPT

- 1 A HUGE BOOST TO RANGE OF MOTION!**
Joints with expanded ranges of motion allow EX-STANDARD kits to confidently strike poses older SD kits could barely hold.
- 2 STYLISH PROPORTIONS!**
The SD series' iconic proportions are preserved yet polished with an update that scales down heads and torsos while extending arms and legs.
- 3 DESIGNED FOR HG COMPATIBILITY!**
The parts swaps and cross-compatibility introduced in SDBF carry over to EX-STANDARD, allowing for a wide range of customization options.

MEGA SIZE MODEL
メガサイズモデル

Mega-sized plastic model dedicated to all GUNDAM fans!!
Mega-sized down to every part, so assembly has never been this easy!!

Massive! Easy! Awesome!

Total height approx. 452mm
Jaw-dropping size!
NOT enlarged to show texture!!
This CG illustration is the approximate size of the actual product.

UNICORN GUNDAM (DESTROY MODE)
Released in August 2017

RX-78-2 GUNDAM
Released in March 2010

CHAR'S ZAKU
Released in December 2010

ZAKU II
Released in March 2011

Cutout enhancements make it fun and easy even for GUNPLA beginners!

POINT 1
No special tools necessary for assembly. Not even diagonal pliers!
Parts can be snapped out by hand without using diagonal pliers.
* Using tools such as diagonal pliers can provide a more polished look.

POINT 2
Snapfit assembly means you don't need no stinking adhesives!

POINT 3
Fast and fun sprue lock assembly.
The "sprue lock" method lets you assemble entire sprues (frames) of parts at once for fast and fun assembly.
* Only applicable for some sprues. Not all sprues use the sprue lock method.

POINT 4
Dead simple assembly with the double separator.

POINT 5
Legend of Icons
HEAD BODY WAIST ARM LEG WEAPON SHIELD
Numbers and icons are used to identify parts. The location of the necessary parts for any given section you are assembling is clearly marked.

POINT 6
Your GUNPLA uses iroPLA so it looks cool even without painting!
The plastic castings for each part are color separated from the outset so your assembled GUNDAM is realistic even w/out painting.

POINT 7
Use specially made GUNDAM decals to enhance detail!
Paste special made decals for a cooler look!!

Color illustrated manual and intuitive color-coded icons.
A color illustration and photo-filled manual is included. Follow point by point beginner marks to avoid often made mistakes.

Unpainted Sample

For official Gundam and GUNPLA information, check here!

You can find all the information related to the Gundam series of anime, as well as Gundam product info such as GUNPLA (Gundam plastic model kits). Anime from the Gundam series will be made available for a limited time as free streaming video. Get the latest information on Gundam and GUNPLA here!
