

## **SECTION II**

# Violent Crime

## Definition

Violent crime is composed of four offenses: murder and nonnegligent manslaughter, forcible rape, robbery, and aggravated assault. According to the Uniform Crime Reporting (UCR) Program's definition, violent crimes involve force or threat of force.

## Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2002	1,423,677	494.4
2003	1,381,259	475.0
Percent change	-3.0	-3.9

## National Volume, Trends, and Rates

An estimated 1,381,259 violent crimes were committed in the Nation in 2003. This represented a decrease of 3.0 percent from the violent crime figure from 2002. An analysis of 5- and 10-year trend data showed that the 2003 volume fell 3.1 percent when compared to violent crime data from 1999, and it dropped 25.6 percent from the estimate 10 years ago in 1994. (See Table 1, national estimates.)

As in previous years, in 2003, aggravated assault was the offense that made up the largest portion of violent crime at 62.1 percent. Robbery accounted for 29.9 percent of violent crime, and forcible rape made up 6.8 percent. Murder was the least often committed violent offense, comprising an estimated 1.2 percent of violent

crime. (Based on Table 1, national estimates.)

The violent crime rate per 100,000 inhabitants (475.0) declined 3.9 percent in 2003 when compared to the previous year's rate. A comparison between violent crime rates in 2003 and 1999 (a five-year trend) disclosed a 9.2-percent drop in the rate. In 2003, there was a 33.4-percent drop in the violent crime rate per 100,000 persons in comparison to figures from 1994 (a 10-year trend). (See Table 1, national estimates.)

Figure 2.2

Violent Crime  
Percent Change from 1999

## Regional Offense Trends and Rates

The UCR Program separates the United States into four regions: the Northeast, the Midwest, the South, and the West. A map of the United States outlining the regions is included in Appendix III of this book. A breakdown of offense trends and rates by region showed the following:

### The Northeast

The Northeast accounted for 18.7 percent of the U.S. population in 2003. An estimated 15.8 percent of the Nation's violent crime occurred in this region. The estimated 218,106 violent crimes in the Northeast represented a 3.5-percent decline from the 2002 estimate. The violent crime rate in this region was 400.9 violent crimes per 100,000 inhabitants. This 2003 figure represented a 3.9-percent drop when compared to the

figure from the previous year. Within the violent crime category, the number of murders rose 4.6 percent and that of robbery increased by 0.3 percent over figures from the previous year. The number of forcible rapes and aggravated assaults declined 2.6 percent and 6.0 percent, respectively. (See Tables 3 and 4, regional estimates.)

**The Midwest**

In 2003, 18.8 percent of the Nation’s violent crime occurred in the Midwest, which was home to 22.5 percent of the Nation’s population. The Midwest experienced an estimated 259,925 violent crimes, which is a 5.2-percent decline when compared to the 2002 figure. The violent crime rate in 2003 was 397.4 offenses per 100,000 inhabitants, a 5.7-percent decrease from the previous year’s rate. All offenses within the violent crime category showed a decrease in volume in 2003; robbery presented the largest decline, 5.7 percent, followed closely by aggravated assault with a 5.4-percent drop. Forcible rape offenses fell 3.2 percent, and those of murder decreased 2.7 percent. (See Tables 3 and 4, regional estimates.)

**The South**

The South, with an estimated 35.9 percent of the 2003 population, was the region in which the most people lived.

It contributed the largest percent of the Nation’s violent crime, 41.6. An estimated 574,226 violent crimes occurred in the South in 2003, a 2.6-percent decline in volume when compared to the 2002 estimate. In 2003, the violent crime rate was an estimated 549.3 offenses per 100,000 inhabitants, a 3.9-percent drop compared to the previous year’s figure. Within the violent crime category, murder presented the lone rise in volume, up 3.0 percent from 2002 data. A comparison of 2002 and 2003 data showed the South experienced a 3.6 percent decrease in aggravated assault, a 1.6-percent decline in forcible rape, and a 0.9-percent decrease in robbery. (See Tables 3 and 4, regional estimates.)

**The West**

The West had 22.9 percent of the U.S. population in 2003, and 23.8 percent of violent crime occurred there. The West experienced an estimated 329,002 violent crimes, which represented a 1.4-percent decline when compared to the 2002 estimate. The violent crime rate was an estimated 495.0 violent offenses per 100,000 individuals, down 2.8 percent from the figure calculated in the previous year. Within the violent crime category, murder presented the only rise in volume, up 1.4 percent between 2002 and 2003. Robbery decreased by 1.6 percent. Aggravated assault and forcible rape offenses each declined from the previous year’s calculations, 1.4 percent and 0.5 percent, respectively. (See Tables 3 and 4, regional estimates.)

that contains the principal city and other adjacent counties that have, as defined by the U.S. Census Bureau, a high degree of economic and social integration with the principal city and county as measured through commuting. In 2003, an estimated 82.8 percent of the U.S. population lived in an MSA. An estimated 1,244,205 violent crime offenses were committed in this community type. This figure represented 90.1 percent of the estimated total of violent crime. MSAs experienced a violent crime rate of 516.8 per 100,000 inhabitants in 2003. (Based on Table 2, community type estimates.)

Almost 7 percent (6.8) of the Nation’s population lived in cities outside MSAs (mostly incorporated areas) in 2003. Violent crimes in this community type accounted for 5.5 percent of the estimated total number of violent offenses. In 2003, an estimated 76,043 violent crimes were committed in cities outside MSAs, which translated to a rate of 385.0 violent crimes per 100,000 inhabitants. (Based on Table 2, community type estimates.)

In 2003, an estimated 10.4 percent of the U.S. population resided in nonmetropolitan counties, which are composed of unincorporated areas. There were an estimated 61,011 violent crimes in these counties, representing 4.4 percent of the violent crime total in the Nation. Nonmetropolitan counties had a violent crime rate of 201.5 violent offenses per 100,000 persons. (Based on Table 2, community type estimates.)

**Table 2.1**

**Violent Crime by Month**  
Percent Distribution, 1999-2003

Month	1999	2000	2001	2002	2003
January	8.2	7.9	7.7	7.9	7.8
February	7.1	7.2	6.7	6.8	6.5
March	7.9	8.1	7.9	7.9	8.2
April	8.1	8.1	8.1	8.1	8.3
May	8.8	8.9	8.7	8.7	8.9
June	8.5	8.6	8.7	8.8	8.8
July	9.3	9.3	9.3	9.3	9.2
August	9.1	9.1	8.9	9.3	9.2
September	8.4	8.6	8.7	9.2	8.6
October	8.6	8.7	9.0	8.6	8.8
November	8.0	7.8	8.2	7.7	7.9
December	8.0	7.7	8.1	7.7	7.7

**Community Types**

The UCR Program aggregates data by three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties. MSAs are areas that include a principal city or urbanized area with at least 50,000 inhabitants and the county

**Population Groups: Trends and Rates**

The UCR Program organizes the agencies that contribute data by population groups. There are 6 population groups that contain cities aggregated by size, as well as a group for metropolitan coun-

ties and one for nonmetropolitan counties. (Appendix III of this book further delineates UCR area definitions.)

Collectively, the Nation's cities reported a 3.9-percent drop in violent crime in 2003 when compared to the previous year's data. (See Table 12.) All agencies labeled city, jointly experienced a violent crime rate of 597.0 per 100,000 inhabitants. (See Table 16.) Cities with 250,000 or more in population reported a 5.8-percent drop in violent crime. Within this population group comprised of the largest U.S. cities, the subcategory of cities with 1 million and over in population had the largest decline in violent crime, 6.5 percent. Violent crime decreased 3.7 percent in nonmetropolitan counties and 1.0 percent in metropolitan counties. (See Table 12.)

The population group with the largest U.S. cities, those with more than 250,000 in population, reported a violent crime rate of 967.5 violent offenses per 100,000 inhabitants. Within this group, the highest violent crime rate per 100,000 inhabitants, 980.0, was reported by law enforcement in those cities with 1 million or more in population. The lowest violent crime rate for city population groups (321.3 per 100,000 persons) was in cities with a population range of 10,000 to 24,999. Metropolitan counties experienced a violent crime rate of 345.8 per 100,000 inhabitants, and nonmetropolitan counties recorded a rate of 219.5 per 100,000 persons. (See Table 16.)

In 2003, the percentage of murders in the Nation's largest cities, those with 250,000 or more inhabitants, remained virtually unchanged from the 2002 number (+0.1 percent). However, within this population group, law enforcement in cities within the population subcategory of 500,000 to 999,999 inhabitants reported the largest decline in the occurrence of murder, 1.0 percent. Conversely, the Nation's smallest cities,

those with fewer than 10,000 inhabitants, experienced the largest increase in murder, 20.0 percent. (See Table 12.)

### **Weapons Distribution**

The UCR Program collects information about the weapons used in the violent crimes murder, robbery, and aggravated assault. In 2003, most of these violent crimes, 30.7 percent, were committed with personal weapons (hands, fists, feet, etc.). Firearms were the weapon of choice in 26.9 percent of these offenses. Knives or cutting instruments accounted for 15.2 percent of the weapons used in these three violent crimes, and other weapons were employed in 27.3 percent of these offenses. (Based on Tables 2.10 and 19.)

### **Clearances**

Law enforcement agencies reporting offenses to the national UCR Program can clear these offenses by either arrest or by exceptional means. When clearing an offense by arrest, an offender must be arrested, charged with the commission of an offense, and turned over to the court for prosecution. When a factor beyond law enforcement's control prevents the agency from placing formal charges against the known offender, the agency can clear the offense exceptionally.

In 2003, law enforcement cleared 46.5 percent of all violent crimes in the United States by arrest or exceptional means. In the violent crime category, 62.4 percent of murders were cleared, making it the violent offense most often cleared. Additionally, 55.9 percent of aggravated assaults, 44.0 percent of forcible rapes, and 26.3 percent of robberies were cleared. (See Table 25.)

Within population groups, law enforcement in cities collectively cleared 44.7 percent of violent crimes, with law enforcement in the smallest cities (under

10,000 in population) reporting the highest percentage of offenses cleared, 57.6 percent. Agencies in nonmetropolitan counties cleared 59.9 percent of violent crimes, and those in metropolitan counties cleared 51.6 percent. (See Table 25.)

Regionally, law enforcement in the Northeast cleared the highest percentage of violent crimes at 49.8 percent. Those in the West cleared 47.2 percent; those in the South 45.7 percent; and the agencies in the Midwest cleared 44.8 percent of their violent crimes. (See Table 26.)

### **Clearances and Juveniles**

Both nationwide and in U.S. cities overall, 12.2 percent of violent crime clearances involved only juveniles (persons under the age of 18). The highest percentage of violent crime clearances (14.9) involving juveniles was in cities with populations between 25,000 and 49,999. Law enforcement agencies in metropolitan counties reported that 12.7 percent of their violent crime clearances involved juveniles, and nonmetropolitan counties recorded 9.8 percent of their clearances with only juvenile involvement. (See Table 28.)

### **Arrests**

Law enforcement made an estimated 597,026 arrests for violent crime in the United States in 2003. This accounted for an estimated 4.4 percent of all arrests and 27.1 percent of Part I offense arrests. Within the violent crime category, there were an estimated 13,190 arrests for murder, accounting for 2.2 percent of all violent crime arrests. Forcible rape accounted for 4.4 percent of violent crime arrests with 26,350 arrests estimated. There were an estimated 107,553 arrests for robbery, which represented 18.0 percent of the violent crime arrest total. With an estimated 449,933 arrests, aggravated assault accounted for

75.4 percent of arrests, the most of any violent crime. (Based on Table 29.)

Within the Nation's regions, law enforcement agencies in the West had the highest arrest rate for violent crime with 276.4 arrests per 100,000 inhabitants. Law enforcement in the South reported a rate of 190.4 violent crime arrests per 100,000 persons. Agencies in the Northeast and the Midwest had violent crime arrest rates of 166.5 and 165.8 per 100,000 persons, respectively. (See Table 30.)

Within all population groups, cities overall had a violent crime arrest rate of 231.8 per 100,000 individuals. Among city groups, those with a population of 250,000 and over had the highest violent crime arrest rate of 332.9 per 100,000. The lowest rate among cities was experienced by those with a population range of 10,000 to 24,999—154.2 violent crime arrests per 100,000 inhabitants. (See Table 31.)

In 2003, the number of arrests for violent crime decreased 2.3 percent in comparison with that in 2002. The number of arrests of adults declined 2.7 percent from 2002 to 2003; the number of juvenile arrests remained virtually unchanged (+0.1 percent). (See Table 36.) When compared to the 1994 figure, the number of arrests for violent crime decreased 15.9 percent in 2003. In this same 10-year period, the

number of arrests of juveniles dropped 32.5 percent, and the number of adults arrested fell by 12.1 percent. (See Table 32.)

### *Arrestees*

During 2003, 15.5 percent of arrestees for violent crimes were under the age of 18; 28.7 percent were under the age of 21, and 44.3 percent were under the age of 25. Juveniles under the age of 15 made up 5.1 percent of violent crime arrestees. (See Table 41.)

The gender of 82.2 percent of those persons arrested for violent crimes was male. By violent offense, males accounted for 98.7 percent of forcible rape arrestees, 89.7 percent of murder arrestees, 89.6 percent of robbery arrestees, and 79.3 percent of aggravated assault arrests. (See Table 42.)

By race, whites accounted for 60.5 percent of violent crime arrestees and blacks, 37.2 percent. The remainder of arrestees were of other races (American Indian or Alaskan Native and Asian or Pacific Islander). The race of arrestees for the violent offense of murder was nearly evenly divided between white and black individuals, 49.1 percent and 48.5 percent, respectively. The remaining murder arrestees were of other races. (See Table 43.)

# Murder

## Definition

Murder and nonnegligent manslaughter, as defined in the Uniform Crime Reporting (UCR) Program, is the willful (nonnegligent) killing of one human being by another.

The classification of this offense is based solely on police investigation as opposed to the determination of a court, medical examiner, coroner, jury, or other judicial body. The UCR Program does not include the following situations in the count for this offense classification: deaths caused by negligence, suicide, or accident; justifiable homicides; and attempts to murder or assaults to murder, which are scored as aggravated assaults.

## Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2002	16,229	5.6
2003	16,503	5.7
<i>Percent change</i>	+1.7	+0.7

## National Volume, Trends, and Rates

There were 16,503 criminal homicides in the United States during 2003. This figure represented a 1.7-percent increase over the 2002 estimate and a 6.3-percent rise from the 1999 figure. Measured against the 1994 total, however, the 2003 estimate

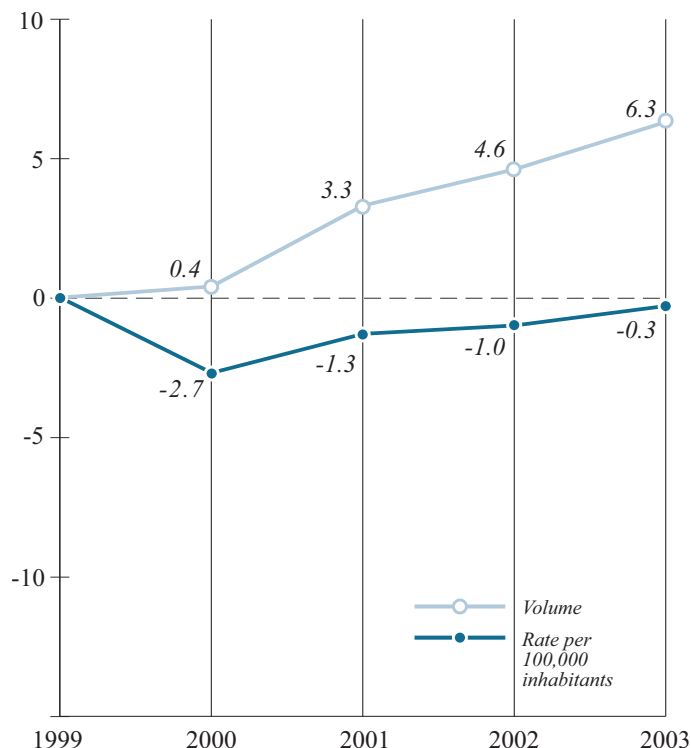

reflected a 29.3-percent decrease in the number of murders. (See Table 1, national estimates.)

For 2003, the UCR Program estimated the murder rate at 5.7 offenses per 100,000 U.S. inhabitants, an increase of 0.7 percent compared to the prior year's rate. The murder rate for 2003 decreased only slightly (-0.3 percent) from the 1999 rate. However, the 2003 murder rate was 36.7 percent lower than the rate recorded for 1994. (See Table 1, national estimates.)

**Figure 2.3**

### Murder

Percent Change from 1999

## Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (Appendix III provides a map delineating the regions.) The following paragraphs provide the murder breakdowns by region for 2003:

### The Northeast

An estimated 2,311 murders occurred in the Northeast during 2003. That figure represented an increase of 4.6 percent over the 2002 approximation. The murder rate was 4.2 offenses per 100,000

inhabitants, which was a 4.2-percent increase over the 2002 rate. Nearly 19 percent (18.7) of the Nation's population were living in the Northeast during 2003, and 14.0 percent of the total murders occurred in those states. (See Tables 3 and 4, regional estimates.)

### The Midwest

The Midwest Region was the only area of the country to reflect a decrease in the number of murders when comparing 2002 and 2003 data. The 3,221 murders in the Midwest represented a 2.7-percent decrease from the region's murder total in 2002. The 2003 murder rate per 100,000 population was 4.9, a decrease of 3.1 percent from the previous year's rate. With 22.5 percent of the U.S. population, the Midwest accounted for 19.5 percent of the country's murders during 2003. (See Tables 3 and 4, regional estimates.)

**Table 2.2**

**Murder by Month**  
Percent Distribution, 1999-2003

Month	1999	2000	2001 <sup>1</sup>	2002	2003
January	8.8	8.4	7.9	8.2	7.7
February	7.1	7.3	6.2	6.8	6.9
March	7.6	7.6	7.1	7.8	8.0
April	7.7	7.7	7.9	7.7	8.2
May	8.3	8.5	8.3	8.0	8.6

November	8.2	7.7	8.5	7.9	7.8
December	8.8	8.7	9.2	8.6	9.0

<sup>1</sup> The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, are not included.

**Table 2.3**

**Murder Victims**  
by Race and Sex, 2003

Race	Total	Sex		
		Male	Female	Unknown
White	6,913	4,986	1,927	0
Black	6,887	5,771	1,113	3
Other race	408	277	131	0
Unknown race	200	133	44	23
Total	14,408	11,167	3,215	26

### The South

The Southern states, the Nation's most populous region, made up 35.9 percent of the Nation's population and accounted for 43.6 percent of the murders in the United States in 2003. The estimated 7,197 offenses reflected a 3.0-percent increase in the number of murders during 2003 compared to the previous year's volume. The murder rate in the South was 6.9 murders per 100,000 persons, an increase of 1.7 percent over the 2002 murder rate. (See Tables 3 and 4, regional estimates.)

### The West

During 2003, the West had an estimated 3,774 murders. This figure reflected an increase of 1.4 percent compared to the prior year's figure. With 22.9 percent of the national population, the West also accounted for 22.9 percent of the Nation's murders. The murder rate calculated for the Western States in 2003, 5.7 murders for every 100,000 persons, was unchanged from the 2002 rate. (See Tables 3 and 4, regional estimates.)

### Community Types

The UCR Program estimates the number of criminal offenses for three community types: Metropolitan Statistical Areas (MSAs), cities outside of MSAs, and nonmetropolitan counties. During 2003, MSAs accounted for 82.8 percent of the Nation's population and 89.1 percent of the Nation's murders. The murder rate for MSAs was 6.1 offenses per 100,000 persons. Cities lying outside MSAs (mostly incorporated areas) accounted for 6.8 percent of the national population and 4.5 percent of the murder offenses in 2003. Based upon reported offenses, the UCR Program estimated a rate of 3.8 homicides for each 100,000 inhabitants for these community types. Nonmetropolitan counties, comprised of mostly unincorporated areas, accounted

for approximately 10.4 percent of the Nation's population and 6.4 percent of its homicides. These community types had a rate of 3.5 murder offenses per 100,000 inhabitants. (See Table 2, community type estimates.)

### Population Groups: Trends and Rates

The UCR Program presents crime statistics by population groups, which include cities, metropolitan counties, and non-metropolitan counties. Collectively, the Nation's cities experienced a 2.7-percent increase in the number of murders in 2003 compared to the 2002 number. Those cities with 250,000 or more in population and those with populations within the 50,000 to 99,999 range showed virtually no change in the number of murders from the previous year's number (+ 0.1 percent and - 0.1 percent, respectively). However, a comparison of the data from 2002 and 2003 showed increases in the number of murders in all other population groups labeled city. Cities with 100,000 to 249,999 inhabitants experienced an increase in murders of 6.8 percent, those with 25,000 to 49,999 populations had an increase of 5.5 percent, and those with populations of 10,000 to 24,999 showed a rise of 8.5 percent. The 2-year trend data indicated that the number of murders in cities with fewer than 10,000 inhabitants increased 20.0 percent from 2002 to 2003. The Nation's metropolitan counties and nonmetropolitan counties, however, experienced decreases in the number of murders—3.3 percent and 2.3 percent, respectively—when comparing data from 2003 and 2002. (See Table 12.)

U.S. cities collectively had a murder rate of 7.1 murders per 100,000 inhabitants for 2003. The highest rate was 13.2 in cities with 250,000 or more inhabitants. The lowest rate was computed for cities with populations of 10,000

to 24,999—2.7 murders per 100,000 inhabitants. Metropolitan counties had a rate of 4.0 murders, and nonmetropolitan counties had a rate of 3.4 murders per 100,000 inhabitants. (See Table 16.)

### Supplementary Homicide Reports

During 2003, law enforcement agencies contributing data to the UCR Program submitted Supplementary Homicide Reports (SHRs) for 14,408 homicides. The SHR supplies data on the age, sex, and race of both the victim and the offender; the type of weapon used; the relationship of the victim to the offender; and the circumstance surrounding the incident.

**Table 2.6**

#### Murder Victim/Offender Relationship by Age, 2003 [Single victim/single offender]

Age of victim	Total	Age of offender		
		Under 18	18 and over	Unknown
Total	7,024	346	6,089	589
Under 18	728	111	589	28
18 and over	6,199	231	5,424	544
Unknown	97	4	76	17

NOTE: This table is based upon incidents where some information about the offender is known by law enforcement. It excludes incidents reported with a value of "unknown offender."

**Table 2.7**

#### Murder Victim/Offender Relationship by Race and Sex, 2003 [Single victim/single offender]

Race of victim	Total	Race of offender				Sex of offender		
		White	Black	Other	Unknown	Male	Female	Unknown
White victims	3,603	3,017	501	44	41	3,199	363	41
Black victims	3,147	226	2,864	8	49	2,793	305	49
Other race victims	199	47	26	122	4	179	16	4
Unknown race	75	33	21	2	19	49	7	19

Sex of victim	Total	Race of offender				Sex of offender		
		White	Black	Other	Unknown	Male	Female	Unknown
Male victims	4,987	2,163	2,642	111	71	4,417	499	71
Female victims	1,962	1,127	749	63	23	1,754	185	23
Unknown sex	75	33	21	2	19	49	7	19

NOTE: This table is based upon incidents where some information about the offender is known by law enforcement. It excludes incidents reported with a value of "unknown offender."

### Victims

Based on 2003 SHR data (where age, sex, or race were known for the victims), 90.6 percent of murder victims were adults. Males accounted for 77.6 percent of murder victims. Just over 8 percent (8.2 percent) of male victims and 13.5 percent of female victims were under the age of 18. By race, 48.7 percent of murder victims were white, 48.5 percent were black, and the remainder were of other races (American Indian, Alaskan Native, Asian, or Pacific Islander). (Based on Table 2.4.)

### Offenders

A review of the SHR data for known murder offenders showed that 90.1 percent were identified as male and 92.0 were over 18 years of age. A breakdown of murder offenders for whom race was known showed that 51.3 percent were black, 45.9 percent were white, and 2.8 percent were of other races. (Based on Table 2.5.)

Data from single victim/single offender incidents indicated that 92.4 percent of black victims were slain by black offenders, and 84.7 percent of white victims were murdered by white offenders. (Based on Table 2.7.)

### Weapons

Of the homicides for which the weapon type was specified on the 2003 SHR, 70.9 percent involved a firearm. Breaking down those incidents further indicated that 79.9 percent of all incidents in which a firearm was used involved handguns; 4.0 percent, rifles; 4.7 percent, shotguns; and 11.4 percent, other type or unknown firearms. Offenders used knives or cutting instruments in 13.4 percent of the murders, personal weapons (hands, fists, feet, etc.) in 7.0 percent, and blunt objects in 4.8 percent of the incidents. Other weapon types (poison, arson, narcotics, etc.) accounted for approximately 4.0 percent of murder weapons. (Based on Table 2.9.)

### Victim/Offender Relationships

The relationship of the victim to the offender was unknown for 44.5 percent of the homicides reported on the SHR for 2003. An analysis of the 55.5 percent of the victims for whom the relationships to their offenders were known revealed that 77.6 percent knew their assailants and that 22.4 percent were slain by strangers. Among the incidents in which the victims knew their assailants, 70.9 percent were acquainted with their

murderers, and 29.1 percent were related to them. Husbands and boyfriends killed 32.3 percent of female victims, and wives and girlfriends murdered 2.5 percent of male victims. (Based on Table 2.11.)

### Circumstances

The circumstance was unknown for 33.9 percent of the homicides reported on the SHR for 2003. The supplemental data indicated that 16.4 percent of the homicides for which circumstances were known involved the commission of another felony such as robbery or narcotic drug laws. Investigators suspected that another 0.6 percent of homicides likely resulted from a felonious activity. Investigators cited arguments as the cause of 28.6 percent of the killings. Other types of circumstances, such as juvenile gang killings, sniper attacks, and brawls involving alcohol or drugs, were documented in 20.4 percent of the murders. (Based on Table 2.13.)

### Clearances

In the UCR Program, law enforcement clearances occur by arrest or, in certain specific circumstances, by exceptional means, i.e., when elements beyond the control of law enforcement prevent the placing of formal charges against the offender. (Section III provides more information regarding clearances.) Typically, the crime of murder has the highest percentage of clearances. During 2003, law enforcement cleared 62.4 percent of murders reported nationwide. (See Table 25.) Of the total clearances for murder, 5.2 percent involved only juvenile offenders. (See Table 28.)

During 2003, law enforcement in the Nation's cities collectively cleared 61.9 percent of reported murders.

Among the city population groupings, those with populations of 10,000 to 24,999 had the highest percentages of

clearances for murder, 71.8 percent. Law enforcement agencies in metropolitan counties cleared 60.0 percent, and those in nonmetropolitan counties cleared 76.3 percent of reported murders. (See Tables 25.)

### Arrests

The UCR Program estimates the number of arrests nationwide for all Part I and Part II offenses; these data are presented in Table 29. All other tabular presentations are based upon data from agencies that submitted reports for all 12 months of the year.

#### Total Arrests

Nationwide, there were an estimated 13,190 arrests for murder during 2003. (See Table 29.) Adults, defined by the UCR Program as individuals 18 years of age and older, accounted for 91.4 percent of murder arrestees. (Based on Table 38.) Overall, 48.9 percent of those arrested for murder were under the age of 25, and 8.6 percent were under the age of 18. (See Table 41.)

#### Arrest Rates

Based upon 2003 arrest data and population figures, nationwide, the arrest rate for murder was 4.5 arrests per 100,000 inhabitants. By region, the South had

the highest murder arrest rate at 5.6 arrests; the West followed with 4.4 arrests, the Midwest with 4.2 arrests, and the Northeast with 3.1 murder arrests per 100,000 inhabitants. (See Table 30.)

Among the population groups in 2003, the Nation's cities collectively had a murder arrest rate of 4.8 per 100,000 persons. Law enforcement in the largest cities, those with more than 250,000 inhabitants, had the highest rate of arrests for murder, 9.4 for every 100,000 in population. Law enforcement in cities with 10,000 to 24,999 residents had the lowest rate, 2.1 murder arrests per 100,000 individuals. Metropolitan and nonmetropolitan counties both had a murder arrest rate of 3.8 for every 100,000 inhabitants. (See Table 31.)

#### Arrest Trends

A comparison of 2003 data to those of 2002 indicated an overall 6.6-percent drop in arrests for murder. The number of juveniles arrested for murder declined 10.0 percent, and the number of adults decreased 6.2 percent. By gender, the number of males arrested for murder decreased 5.9 percent and the number of females decreased 11.4 percent. (See Tables 36 and 37.)

The 5-year trend data showed that the number of arrests for murder in 2003

dropped 5.1 percent compared to the 1999 number. Arrests of juveniles fell 18.3 percent, and arrests of adults decreased 3.6 percent. An analysis of gender data for 1999 and 2003 showed that arrests of males for murder declined 4.3 percent over the time period, and arrests of females fell 11.5 percent. (See Tables 34 and 35.)

A review of the 10-year trend data showed 36.2 percent fewer arrests for murder in 2003 than in 1994. Arrests of juveniles were 67.6 percent lower and arrests of adults were 29.6 percent lower than the 1994 figure. The 10-year trend also revealed that arrests of males for murder were down 36.9 percent, and arrests of females for murder were down 30.1 percent from the 1994 figure. (See Tables 32 and 33.)

#### Arrest Distribution by Age, Sex, and Race

Based upon arrest data for 2003, males comprised 89.7 percent of all murder arrestees. (See Table 42.) By race, whites accounted for 49.1 percent of the murder arrestees, and blacks made up 48.5 percent of the total murder arrestees. Other races accounted for the remainder of persons arrested for murder. (See Table 43.)

## **Justifiable Homicide**

The UCR Program defines justifiable homicide as the killing of a felon by a peace officer in the line of duty or the killing of a felon, during the commission of a felony, by a private citizen. Because these willful killings are determined through law enforcement investigation to be justifiable, or excusable, they are tabulated separately from the murder and nonnegligent manslaughter classification.

During 2003, contributing law enforcement agencies provided supplemental data for 616 justifiable homicides. According to those data, law enforcement officers justifiably killed 370 felons, and private citizens justifiably killed 246 felons. Tables 2.15 and 2.16 provide additional information about justifiable homicides.

*Information regarding the UCR Program's statistical methodology and table construction can be found in Appendix I.*

# Forcible Rape

## Definition

Forcible rape, as defined in the Uniform Crime Reporting (UCR) Program, is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) and other sex offenses are excluded.

## Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2002	95,235	33.1
2003	93,433	32.1
Percent change	-1.9	-2.8

## Offense Methodology

The UCR Program counts one offense per victim when a female of any age is forcibly raped or upon whom an assault to rape or attempt to rape is made. Additionally, the Program classifies all sex offenses (except forcible rape) as Part II offenses and, as such, collects only arrest data, which are presented in aggregated totals. (See Appendix II.) Consequently, statutory rapes of female victims where no force is used and the victim is under the age of consent are included in sex offenses. Sexual attacks on males are classified as assaults or sex offenses depending on the nature of the crime and the extent of injury.

## National Volume, Trends, and Rate

Based on law enforcement reports, an estimated 93,433 forcible rape offenses occurred nationwide in 2003. This figure was 1.9 percent lower than the 95,235 forcible rapes estimated for 2002. Five- and 10-year trend comparisons revealed that the 2003 volume was 4.5 percent above the estimated 89,411 offenses in 1999 but 8.6 percent below the 102,216 forcible rapes recorded in 1994. (See Table 1, national estimates.) Of the total number of forcible rapes estimated for 2003, rapes by force accounted for 91.0 percent. The remainder was attempts. (Based on Table 19.)

Throughout this publication, the UCR Program calculated forcible rape rates (including those listed above and those in subsequent tables) using estimates of the total U.S. population. Within this narrative, however, the forcible rape rates were based on the U.S. Census Bureau's 2003 estimate of the Nation's female population. According to those calculations, 63.2 forcible rapes occurred per 100,000 females in 2003, a 2.7-percent decrease from the 2002 rate of 65.0. The 2003 rate of forcible rape declined 1.4 percent from the 1999 rate of 64.1 (the 5-year trend) and fell 17.9 percent from the 1994 estimate of 77.0 forcible rapes per 100,000 females (the 10-year trend).

**Figure 2.5**

**Forcible Rape**  
Percent Change from 1999

## Regional Offense Trends and Rates

For data analyses, the UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (A map delineating these regions is published in Appendix III.) Overall, the rate of forcible rape declined in all four regions from 2002 to 2003. Regional tabulations of forcible rape data (based on Tables 3 and 4, regional estimates) revealed the following:

### The Northeast

Law enforcement agencies in the Northeast reported an estimated 12,511 forcible rape offenses—13.4 percent of the forcible rape total—in 2003. In that region, which accounted for 18.7 percent of the total U.S. population, 45.3 forcible rapes occurred per 100,000 female inhabitants. The rate of forcible rape for 2003 was a 2.9-percent decrease from the 46.6 rapes per 100,000 females in 2002.

### The Midwest

In 2003, an estimated 23,404 forcible rape offenses occurred in the Midwest, where 22.5 percent of the Nation's population resided. Forcible rape offenses in that region comprised 25.0 percent of the national forcible rape volume.

**Table 2.17**

**Forcible Rape by Month**  
Percent Distribution, 1999-2003

Month	1999	2000	2001	2002	2003
January	8.1	8.0	7.7	7.6	7.9
February	7.3	7.5	7.1	7.0	6.8
March	8.2	8.5	8.4	7.8	8.3
April	8.2	8.0	8.3	8.6	8.1
May	8.6	9.0	8.8	9.0	9.0
June	8.8	9.1	8.7	9.0	8.7
July	9.6	9.5	9.7	9.6	9.5
August	9.5	9.3	9.4	9.5	9.6
September	8.3	8.4	8.6	9.1	8.9
October	8.3	8.3	8.5	8.4	8.4
November	7.9	7.5	7.6	7.4	7.7
December	7.2	6.9	7.2	6.9	7.1

Females were victims of forcible rape in the Midwest at a rate of 70.4 offenses per 100,000 female inhabitants in 2003, a 3.5-percent decline from the 2002 rate of 73.0 forcible rapes per 100,000 female population.

### The South

Based on law enforcement reports from the South, an estimated 35,133 forcible rape offenses were committed in that region in 2003. The South, which comprised 35.9 percent of total U.S. population, had 37.6 percent of the forcible rape offenses that occurred nationwide. The rate of forcible rape in the South was 66.1 offenses per 100,000 females in 2003, a 2.7-percent decrease from the 68.0 rapes per 100,000 female inhabitants in 2002.

### The West

In 2003, law enforcement agencies in the West reported an estimated 22,385 forcible rape offenses, which equated to 24.0 percent of all forcible rapes nationwide. In that region, where 22.9 percent of the Nation's population resided, forcible rapes were committed at a rate of 66.3 per 100,000 females in 2003, a 1.9-percent decline from the 2002 rate of 67.5.

## Community Types

The UCR Program aggregates data for three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties. (Appendix III further explains the composition of these community types.) In 2003, the rate of forcible rape among MSAs was 64.5 offenses per 100,000 females. The highest forcible rape rate, recorded for cities outside metropolitan areas, was estimated at 75.1 rapes per 100,000 female inhabitants. Lastly, nonmetropolitan counties had 45.7 forcible rapes per 100,000

female population. (Based on Table 2, community types estimates.)

## Clearances

Clearances occur either by arrest or by exceptional means, i.e., when elements beyond the control of law enforcement prevent the placing of formal charges against the offender. (Section III provides more information regarding clearances.) During 2003, law enforcement cleared 44.0 percent of forcible rapes that were reported in the United States. By population grouping, agencies in cities (collectively) cleared 43.4 percent of all rape offenses. The percentage of forcible rape offenses cleared in the Nation's largest cities, those with 1 million and more inhabitants, was 48.5 percent. Law enforcement agencies in metropolitan counties cleared 45.4 percent of the reported forcible rapes in their communities, and agencies in nonmetropolitan counties cleared 46.8 percent. (See Table 25.)

Law enforcement agencies in the Northeast cleared 48.5 percent of the forcible rape offenses brought to their attention in 2003, the highest clearance percentage among law enforcement in all four regions. Agencies in the South cleared 46.8 percent of forcible rape offenses, and those in the West cleared 41.9 percent of the region's forcible rape offenses. Law enforcement in the Midwest cleared 38.5 percent of forcible rape offenses by arrest or exceptional means. (See Table 26.)

### Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program records the incident as a clearance by arrest even though a physical arrest may not have occurred. In addition, according to Program definitions,

clearances involving both adult and juvenile offenders are classified as adult clearances. Therefore, the following clearance data do not necessarily depict the full extent to which juveniles were offenders of forcible rape.

Nationwide, the clearance of rape offenses involving juveniles only accounted for 11.5 percent of total forcible rape clearances in 2003. Law enforcement agencies in cities (collectively) reported that 10.6 percent of all forcible rape clearances involved only juveniles. Among the Nation's cities, the highest percentage of forcible rape clearances involving only juveniles, 13.4 percent, was in cities with populations of 25,000 to 49,999. Forcible rape clearances involving only juveniles comprised 7.2 percent, the lowest percentage, of forcible rape clearances in cities with populations of 250,000 and over. Clearances of offenders under the age of 18 made up 13.6 percent of all forcible rape clearances in metropolitan counties and 16.0 percent of those in nonmetropolitan counties. (See Table 28.)

## Arrests

Law enforcement agencies nationwide made an estimated 26,350 arrests for forcible rape in 2003. (See Table 29.) The national rate of arrests for forcible rape was 9.0 arrests per 100,000 U.S. inhabitants. In cities, collectively, law enforcement made 9.4 arrests per 100,000 in population. Agencies in metropolitan counties and nonmetropolitan counties recorded 7.8 arrests and 8.9 arrests per 100,000 persons of their respective populations. (See Table 31.)

Based on the data of those arrested for forcible rape, 45.9 percent were under 25 years old, and 30.9 percent were

under 21 years old. Further, the data showed that 16.1 percent of forcible rape arrestees were under the age of 18, and 6.0 percent were under 15 years old. (See Table 41.) Adults, defined by the UCR Program as individuals 18 years of age and older, accounted for 83.9 percent of forcible rape arrestees. (See Table 38.)

Race distributions for adults and juveniles arrested for forcible rape were similar for 2003. Of those adults arrested for the offense, 64.1 percent were white, 33.3 percent were black, and 2.6 percent were other races. (See Table 43.) Among juvenile arrestees, 64.1 percent were white, 33.4 percent were black, and 2.5 percent were other races. (See Table 43.)

## Arrest Trends

When compared to the arrest volume recorded for 2002, the number of arrests for forcible rape decreased 5.1 percent overall in 2003. The 2-year trend (2002 and 2003) showed that arrests of adults for the offense declined 4.3 percent and those of juveniles decreased 9.0 percent. (See Table 36.) Five-year trend data (from 1999 and 2003) revealed a 5.0-percent decrease in the number of persons arrested for forcible rape in 2003, with the number of arrests for forcible rape involving adult arrestees down 3.8 percent and that involving juvenile arrestees down 10.5 percent. (See Table 34.) Ten-year trend data (those from 1994 and 2003) indicated a 22.3-percent drop in the number of persons arrested for forcible rape; forcible rape arrests of adults and juveniles decreased 21.8 percent and 24.7 percent, respectively. (See Table 32.)

# Robbery

## Definition

The Uniform Crime Reporting (UCR) Program defines robbery as the taking or attempted taking of anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or putting the victim in fear.

## Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2002	420,806	146.1
2003	413,402	142.2
Percent change	-1.8	-2.7

## National Volume, Trends, and Rates

There were an estimated 413,402 robberies in the Nation in 2003, a 1.8-percent decrease from the 2002 estimate. Five- and 10-year trend data indicated that the number of robberies in 2003 rose 1.0 percent when compared to 1999 data; the number of robberies in 2003 fell 33.2 percent from the 1994 figure. (See Table 1, national estimates.) Robbery accounted for 29.9 percent of all violent crimes in 2003. (Based on Table 1, national estimates.)

National trend data also showed that in 2003 robbery offenses occurred at a

rate of 142.2 offenses per 100,000 inhabitants, a 2.7-percent decrease from the 2002 estimate, a 5.3-percent decline from the 1999 data, and a 40.2-percent drop from the 1994 rate. (See Table 1, national estimates.)

## Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (Geographic region breakdowns can be found in Appendix III.) Data collected by the UCR Program and aggregated by region concerning robbery reflected the following:

### The Northeast

The Northeast was home to 18.7 percent of the Nation's population in 2003; 19.6 percent of the Nation's robberies were reported in that region. Law enforcement in the region reported a 0.3-percent increase in the volume of robberies in 2003 when compared to the volume of robberies reported in 2002. In 2003, an estimated 148.7 robberies per 100,000 inhabitants were committed in the Northeast, a 0.2-percent decline from the 2002 rate. (See Tables 3 and 4, regional estimates.)

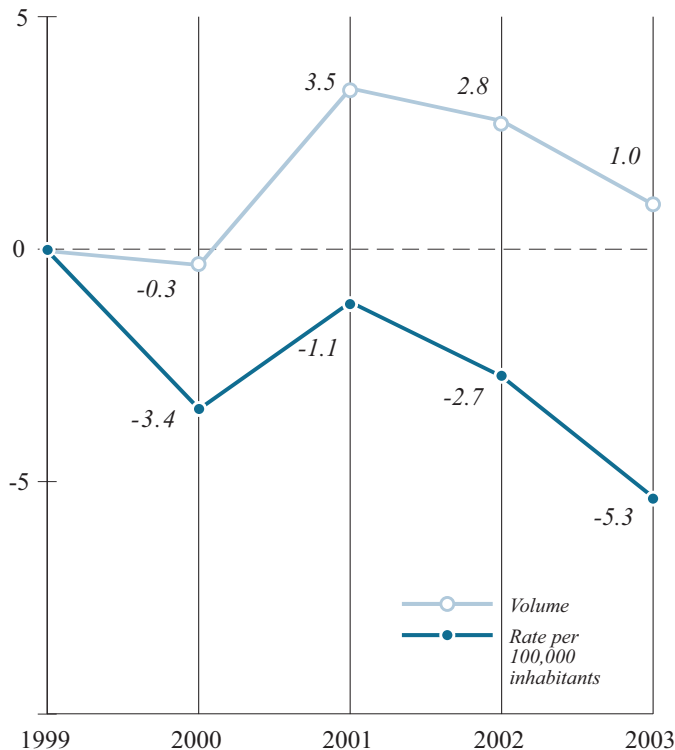

### The Midwest

The Midwest had 22.5 percent of the

Figure 2.6

## Robbery

Percent Change from 1999

Nation's population. Law enforcement in the Midwest Region reported 5.7 percent fewer robberies in 2003 from the 2002 volume. The number of robberies in the Midwest accounted for 18.8 percent all robberies in the Nation in 2003. The rate of robberies in the Midwest, 118.5 per 100,000 inhabitants, declined 6.1 percent from the 2002 rate. The Midwest Region had the lowest volume of robberies and the lowest rate of robberies per 100,000 inhabitants of the four regions in 2003. (See Tables 3 and 4, regional estimates.)

### The South

Nearly 36 percent (35.9) of the Nation's population resided in the South in 2003, and law enforcement agencies in the

region reported an estimated 38.9 percent of the country's robberies. The South had the highest volume, 160,675 estimated offenses, and rate, 153.7 per 100,000 population, of the four geographic regions. The number of robberies reported in the South declined 0.9 percent from the 2002 number, and the rate of robberies per 100,000 inhabitants declined 2.1 percent from the 2002 figure. (See Tables 3 and 4, regional estimates.)

### The West

The West accounted for 22.9 percent of the Nation's total population and 22.8 percent of the country's robberies in 2003. The region had a 1.6-percent decrease in robberies from the 2002 estimate, and a rate of 141.9 robberies per 100,000 in population, a 3.1-percent decline from the 2002 rate. (See Tables 3 and 4, regional estimates.)

tion lived in MSAs in 2003. Residents of cities outside MSAs accounted for 6.8 percent of the country's population, and 10.4 percent of the population lived in nonmetropolitan counties. (Based on Table 2, community type estimates.) The Nation's MSAs had a rate of 164.8 robberies per 100,000 inhabitants in 2003. Cities outside MSAs had a rate of 60.0 robberies per 100,000 inhabitants, and nonmetropolitan counties had a rate of 15.8 robberies per 100,000 in population. (See Table 2, community type estimates.)

### Population Groups: Trends and Rates

The UCR Program aggregates crime statistics by population groups. (An explanation of these groupings can be found in Appendix III.) The Nation's cities collectively reported a 2.2-percent decrease in the number of robberies in 2003. Among population groups with the label *city*, cities with populations of 250,000 or more had the largest decrease, 3.1 percent, in robberies from the 2002 figure. Cities with 10,000 to 24,999 inhabitants had the largest increase, 1.3 percent, in the volume of robberies reported to law enforcement. Metropolitan counties had a 0.6-percent increase in robberies; the number of robberies reported in nonmetropolitan counties remained virtually unchanged (+0.1 percent) from the 2002 number. Additional data for population groups are provided in Table 12.

In terms of the rate of robberies, the country's cities collectively had a rate of 201.1 robbery offenses per 100,000 inhabitants. Of the population groups, the Nation's largest cities, those with 250,000 or more inhabitants, had the highest rate at 379.7 robbery offenses per 100,000 inhabitants, and the Nation's smallest cities, those with less

### Community Types

The UCR Program aggregates data by three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan statistical areas, and nonmetropolitan counties. (Additional in-depth information regarding community types is located in Appendix III.) Nearly 83 percent (82.8) of the Nation's popula-

than 10,000 inhabitants, had the lowest rate at 55.2 per 100,000 population. Law enforcement personnel in metropolitan counties reported 72.3 robberies per 100,000 inhabitants, and those in nonmetropolitan counties reported a rate of 16.7 offenses per 100,000 population. Robbery rates for each of the population groups are furnished in Table 16.

### Offense Analysis

Supplemental data concerning robberies reported by law enforcement personnel to the national UCR Program during 2003 indicated the following:

#### Robbery by Weapon

An examination of information collected about weapons used in the commission of a robbery showed that firearms were again the weapon of choice. During 2003, offenders used firearms in 41.8 percent of all reported robberies. Strong-arm tactics such as hands, fists, and feet were used in 39.9 percent of robberies, and knives or other cutting instruments were used in 8.9 percent of robberies. Other weapons were employed in 9.4 percent of the robberies

reported in 2003. (See Tables 2.21 and 19.) Table 21 provides a state-by-state breakdown of the weapons used in robberies.

#### Loss by Dollar Value

Robbery offenders took an estimated \$514 million from their victims in 2003. (Based on Tables 1 and 23.) Nationally, the average monetary value of property stolen during a robbery was \$1,244. (See Table 23.) Banks lost an average of \$4,767 per robbery, and commercial houses (such as supermarkets, department stores, restaurants, taverns, finance companies, hotels, and motels) lost an average of \$1,778 per robbery. The estimated value of losses from robberies of residences was \$1,472 per robbery. Losses to victims of robberies on streets or highways averaged \$898, and to victims of robberies of convenience stores, \$813. Owners of gas/service stations lost an average of \$690 per robbery. Robberies that occurred at unspecified locations (denoted as miscellaneous) cost victims an average of \$1,258 per incident. (See Table 23.)

#### Robbery Trends by Location

The only type of location for which law enforcement reported an increase in the number of robberies in 2003 when compared to 2002 data were residences at 2.4 percent. Among the types of locations, the location type with the largest decrease, 3.0 percent, was convenience stores. The remaining location types and their decreases were gas/service stations, 2.4 percent; banks, 2.2 percent; street/highway, 1.9 percent; and commercial houses, 1.0 percent. Collectively, the number of robberies at miscellaneous locations decreased 2.5 percent. (See Table 23.)

#### Percent Distribution

In 2003, 43.4 percent of all robberies occurred on streets or highways; 14.6 percent of all robberies happened in commercial houses. Robberies in residences accounted for 13.7 percent of robberies, and robberies of convenience stores made up 6.2 percent of the Nation's reported robberies. Robberies of gas/service stations accounted for 2.7 percent of the Nation's robberies, and robberies of banks comprised 2.3

**Table 2.20**

### Robbery Percent Distribution by Population Group, 2003

Type	Group I (58 cities, 250,000 and over; population 37,217,317)	Group II (146 cities, 100,000 to 249,999; population 21,875,380)	Group III (353 cities, 50,000 to 99,999; population 24,412,026)	Group IV (684 cities, 25,000 to 49,999; population 23,742,865)	Group V (1,512 cities, 10,000 to 24,999; population 23,834,682)	Group VI (5,925 cities, under 10,000; population 19,204,778)	County agencies (3,302 agencies; population 74,231,706)
<b>Total<sup>1</sup></b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>	<b>100.0</b>

<sup>1</sup> Because of rounding, the percentages may not add to 100.0.

percent of all robberies in 2003. Seventeen percent of robberies occurred at miscellaneous venues. (See Table 23.)

## Clearances

The UCR Program considers an offense to be cleared by arrest or solved for crime reporting purposes when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. A clearance by exceptional means can be recorded when the offender has been identified and located and there is enough evidence to support an arrest but conditions beyond law enforcement's control prevent the agency from bringing charges. Section III of this publication provides additional information regarding clearances.

Nationally, law enforcement agencies cleared 26.3 percent of robberies; in the Nation's cities collectively in 2003, law enforcement personnel cleared 25.7 percent of robberies by arrest or exceptional means. Among population groups labeled *city*, cities with less than 10,000 inhabitants had the highest percentage of robberies cleared at 33.6 percent; cities with populations of 250,000 and over had the lowest percentage of clearances at 23.0 percent. Law enforcement in metropolitan counties cleared 29.0 percent of reported robberies, and those in nonmetropolitan counties cleared 43.1 percent of robberies. (See Table 25.)

### Clearances and Juveniles

When an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers the incident as cleared by arrest even though a physical arrest may not have occurred. Also, the UCR Program considers clearances involving both juvenile and adult offenders as adult clearances. Throughout the Nation, 14.1 percent of robbery

clearances involved only juveniles. In 2003, juveniles (persons under the age of 18) accounted for 14.2 percent of robbery clearances in the Nation's cities collectively. An analysis of the data by population group showed that law enforcement in cities with populations of 50,000 to 99,999 inhabitants reported the highest percentage of clearances of robberies involving only juveniles at 15.6 percent; those in cities with populations of 250,000 or greater reported the lowest percentage at 13.1 percent. In the country's metropolitan counties, 13.8 percent of robbery clearances involved juveniles only, and in the nonmetropolitan counties, 8.6 percent of robbery clearances involved juveniles only. (See Table 28.)

## Arrests

Table 29 in this book provides the estimated number of arrests in the Nation for the 29 offenses for which the UCR Program collects arrest data. The remaining tables in Section IV of this publication contain actual arrest data for those agencies that provided 12 months of arrest data to the national UCR Program.

### Total Arrests

In 2003, law enforcement agencies throughout the Nation reported an estimated 107,553 arrests for robbery, which comprised 18.0 percent of all arrests for violent crime. (Based on Table 29.)

### Arrest Trends

An examination of the number of arrests for robbery in the Nation showed that the volume of robbery arrests in 2003 remained virtually unchanged when compared to the number of arrests in 2002. Throughout the Nation, the number of arrests of adults for robbery decreased 0.8 percent, but the number of arrests of juveniles for robbery rose 2.5 percent

when compared to the 2002 figure. (See Table 36.) The number of males arrested for robbery in 2003 was virtually unchanged (-0.2 percent), but the number of females arrested for robbery rose 1.6 percent when compared to the 2002 figure. (See Table 37.)

The 5-year trend for arrest data for robbery showed that the number of arrests for robbery showed little change (+0.2 percent) when the 2003 data were compared to those from 1999. The number of juveniles arrested for robbery decreased 7.6 percent from the 1999 figure, but the number of adults arrested for robbery increased 3.0 percent. (See Table 34.) The number of males arrested for robbery in 2003 declined 0.4 percent from the 1999 figure; however, the number of females arrested for robbery rose 5.8 percent. (See Table 35.)

The 10-year trend data for robbery arrests showed that the number of robbery arrests in 2003 declined 25.0 percent from the 1994 number. An examination of that trend data by age showed that the number of arrests of juveniles for robbery dropped 43.1 percent and the number of arrests of adults fell 16.9 percent. (See Table 32.) By gender, a comparison of data regarding arrestees for robbery indicated that the number of males arrested for robbery in 2003 was 26.2 percent less than in 1994, and the number of females arrested for robbery was 12.4 percent less. (See Table 33.)

### Arrest Rates

Nationally, the robbery arrest rate in 2003 was 37.1 arrests per 100,000 inhabitants. In those population groups labeled as *city*, the rate of robbery arrests in cities collectively was 45.6 arrests per 100,000 inhabitants. Cities with populations of 250,000 or more inhabitants had the highest rate at 76.1 arrests per 100,000 inhabitants, and cities with less than 10,000 in population had the lowest

rate at 19.5 arrests per 100,000 citizens. Law enforcement agencies in metropolitan counties recorded 22.9 robbery arrests per 100,000 inhabitants, and those in nonmetropolitan counties recorded 9.1 arrests for robbery per 100,000 in population. (See Table 31.)

By region, law enforcement agencies in the Northeast reported 41.6 arrests for robbery per 100,000 population; those in the West, 39.6; in the South, 37.9; and in the Midwest, 28.5 arrests for robbery per 100,000 inhabitants. (See Table 30.)

#### ***Distribution by Age, Sex, and Race***

An analysis of arrest data by age showed that adults comprised 76.3 percent of all persons arrested for robbery in the Nation in 2003. (Based on Table 38.) A gender breakdown of the data showed

**Table 2.21**

#### **Robbery, Types of Weapons Used Percent Distribution by Region, 2003**

<i>Region</i>	<i>Total all weapons<sup>1</sup></i>	<i>Armed</i>			
		<i>Firearms</i>	<i>Knives or cutting instruments</i>	<i>Other weapons</i>	<i>Strongarm</i>
<b>Total</b>	<b>100.0</b>	<b>41.8</b>	<b>8.9</b>	<b>9.4</b>	<b>39.9</b>
Northeast	100.0	35.0	11.2	8.6	45.2
Midwest	100.0	43.4	6.3	10.0	40.3
South	100.0	47.9	8.0	9.6	34.6
West	100.0	35.3	10.3	9.5	44.9

<sup>1</sup> Because of rounding, the percentages may not add to 100.0.

that the majority (89.6 percent) of robbery arrestees were male. (See Table 42.) By race, 54.4 percent of robbery arrestees were black, 43.9 percent were white, and the remainder were of other races. (See Table 43.) Further breakdowns of robbery arrestees by age and sex are presented in Tables 39 and 40.

# Aggravated Assault

## Definition

According to the Uniform Crime Reporting (UCR) Program, an aggravated assault is an unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault is usually accompanied by the use of weapon or by means likely to produce death or great bodily harm. Attempts involving the display or threat of a gun, knife, or other weapon are included because serious personal injury would likely result if the assault were completed.

## Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2002	891,407	309.5
2003	857,921	295.0
Percent change	-3.8	-4.7

## National Volume, Trends, and Rates

Nationally, 2003 marked the tenth consecutive decline in the volume of aggravated assaults. The estimated total, 857,921 offenses, represents a 3.8-percent decline from the 2002 figure. The 2003 estimate was 5.9 percent lower than the 1999 volume and 22.9 percent below the volume recorded for 1994. Likewise, the rate of

aggravated assaults, 295.0 per 100,000 persons, decreased 4.7 percent from the previous year's rate. Five- and 10-year trend data revealed that the 2003 rate was 11.8 percent lower than the 1999 rate and 31.0 percent lower than the 1994 estimate. (See Table 1, national estimates.)

Figure 2.8

**Aggravated Assault**  
Percent Change from 1999

## Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (A map delineating the regions can be found in Appendix III.) The offense of aggravated assault declined in both volume and rate per 100,000 persons in all four regions when comparing 2003 to 2002 estimates.

### The Northeast

In 2003, the Northeast Region, which had the smallest proportion of the U.S. population (18.7 percent) also had the smallest proportion of aggravated assaults, 14.3 percent of the total. (See Table 3, regional estimates.) States in the Northeast collectively had a 6.0-percent decline—the largest decline among the regions—in the number of aggravated assaults from 2002. These states also

showed the largest decline in the rate of aggravated assaults: the 225.0 offenses per 100,000 persons was a 6.4-percent drop from the previous year's rate. (See Table 4, regional, divisional, state estimates.)

### The Midwest

Accounting for 22.5 percent of the national population, the Midwest had approximately 18.2 percent of the aggravated assaults in 2003. (See Table 3, regional estimates.) Compared to 2002 data, the region had a 5.4-percent decline in the number of aggravated assaults. The 2003 rate of 238.1 offenses per 100,000 persons was a 5.8-percent decrease from the 2002 rate. (See Table 4, regional, divisional, state estimates.)

### The South

In 2003, the South, the Nation's most

populous region (35.9 percent of the population), accounted for an estimated 43.3 percent of the aggravated assaults in the United States. (See Table 3, regional estimates.) The number of aggravated assault offenses dropped 3.6 percent from the prior year's estimate. The South had a rate of 355.1 aggravated assaults per 100,000 inhabitants, which represented a 4.8-percent decline from the 2002 rate. (See Table 4, regional, divisional, state estimates.)

### The West

Comprising 22.9 percent of the population, the West accounted for a 24.3 percent of the aggravated assaults in the Nation in 2003. (See Table 3, regional estimates.) By volume, the number of offenses estimated for the Western States was 1.4 percent lower than the 2002 estimate. The region had a rate of 313.8 aggravated assaults per 100,000 people. That rate was a decrease of 2.8 percent from the 2002 rate. (See Table 4, regional, divisional, state estimates.)

adjacent areas with strong economic or cultural ties to the principal city as measured through commuting. Metropolitan counties are composed of mostly incorporated areas, and nonmetropolitan counties are mostly unincorporated.

MSAs, which accounted for 82.8 percent of the Nation's population and had 87.9 percent of the aggravated assaults in 2003, had a rate of 313.1 aggravated assaults per 100,000 inhabitants. Cities outside metropolitan areas, with 6.8 percent of the population and 6.5 percent of aggravated assaults, had a rate of 283.0 aggravated assaults per 100,000 inhabitants. Nonmetropolitan counties, accounting for 10.4 percent of the national population and 5.6 percent of aggravated assaults, had a rate of 159.0 aggravated assaults per 100,000 persons. (Based on Table 2, community type estimates.)

### Population Groups: Trends and Rates

In order to establish a 2-year trend, the UCR Program reviewed data from all agencies that submitted aggravated assault data for at least 6 common months in both 2002 and 2003. Collectively, cities had a 5.1-percent decline in the number of aggravated assaults in 2003, and the Nation's largest cities, those with populations of 250,000 and over, showed an 8.0-percent drop from the previous year's data. Nonmetropolitan counties experienced a decrease of 4.2 percent. Metropolitan counties recorded a decrease of 1.3 percent. (See Table 12.)

The UCR Program calculated offense rates for the population groups by reviewing reports from all agencies that provided 12 months of data. Based upon that review, the Nation's cities collectively had an aggravated assault rate of 352.7 per 100,000 inhabitants.

**Table 2.22**

#### Aggravated Assault by Month Percent Distribution, 1999-2003

Month	1999	2000	2001	2002	2003
January	7.9	7.5	7.5	7.5	7.5
February	7.0	7.2	6.7	6.7	6.4
March	8.0	8.3	8.1	8.0	8.3
April	8.3	8.4	8.5	8.4	8.5
May	9.1	9.3	9.0	9.0	9.2
June	8.8	8.9	8.9	9.2	9.1
July	9.5	9.5	9.6	9.6	9.4
August	9.2	9.1	9.0	9.4	9.4
September	8.5	8.6	8.8	9.4	8.7
October	8.6	8.6	8.7	8.4	8.7
November	7.7	7.3	7.7	7.3	7.7
December	7.5	7.2	7.5	7.1	7.1

**Table 2.23**

#### Aggravated Assault, Types of Weapons Used Percent Distribution by Region, 2003

Region	Total all weapons <sup>1</sup>	Firearms	Knives or cutting instruments	Other weapons (clubs, blunt objects, etc.)	Personal weapons
<b>Total</b>	<b>100.0</b>	<b>19.1</b>	<b>18.2</b>	<b>35.9</b>	<b>26.9</b>
Northeast	100.0	14.8	19.6	34.0	31.6
Midwest	100.0	18.0	16.7	34.9	30.3
South	100.0	21.0	19.9	38.2	20.9
West	100.0	18.2	15.5	33.3	33.0

<sup>1</sup> Because of rounding, the percentages may not add to 100.0.

Among the Nation's population groups labeled city, those with populations of 250,000 and over had the highest aggravated assault rate of 533.2 offenses per 100,000 persons. Within that population group, those cities with 500,000 to 999,999 had the highest rate, 537.4 per 100,000 individuals. Cities with populations from 10,000 to 24,999 had the lowest rate of aggravated assaults, 212.9 per 100,000 inhabitants; the Nation's smallest cities, those with fewer than 10,000 in population, had a rate of 249.1. Collectively, agencies in metropolitan counties recorded a rate of 242.8 aggravated assaults per 100,000 in population, and those in nonmetropolitan counties recorded a rate of 175.1. (See Table 16.)

### Offense Analysis

By weapon type, personal weapons, such as hands, fists, and feet, were used in 26.9 percent of the aggravated assaults, firearms in 19.1 percent, and knives or other cutting instruments in 18.2 percent. Other weapon types were used in 35.9 percent of the aggravated assaults in 2003. (Based on Table 19.)

A breakdown of the aggravated assault rates per 100,000 persons by type of weapon revealed the following: For every 100,000 individuals, there were 80.9 attacks using personal weapons (hands, fists, feet, etc.), 57.5 attacks using a firearm, 54.8 attacks with a knife or cutting instrument, and 108.1 attacks using another weapon (blunt instrument, club, etc.). (See Table 19.)

### Clearances

Nationwide in 2002, law enforcement agencies cleared 55.9 percent of reported aggravated assaults. Collectively, cities cleared 54.6 percent of aggravated assaults. Law enforcement agencies in the Nation's largest cities, those with populations of 250,000 and over, cleared

50.6 percent of the aggravated assaults that came to their attention. Agencies in the smallest cities (those with fewer than 10,000 in population) showed the highest percentage of clearances for the offense of aggravated assault—64.5 percent. Agencies serving metropolitan counties cleared 58.8 percent, and those in nonmetropolitan counties cleared 62.9 percent of the reported aggravated assaults in their jurisdictions. (See Table 25.)

Law enforcement agencies nationwide cleared 63.9 percent of the aggravated assaults involving personal weapons such as hands, fists, or feet and 61.4 percent of the aggravated assaults involving knives or cutting instruments. In addition, agencies cleared 39.7 percent of the aggravated assaults that involved firearms and 55.6 percent of those that involved other weapon types. (See Table 27.)

Law enforcement in the Northeastern states cleared the highest percentage of aggravated assaults, 61.9 percent. Law enforcement in the Western states cleared 57.1 percent of aggravated assaults, followed by agencies in the Southern states with 54.2 percent, and those in the Midwestern states with 53.8 percent. (See Table 26.)

### Clearances and Juveniles

When an offender under the age of 18 is arrested or cited to appear in juvenile court or before other juvenile authorities, the UCR Program considers that incident as a clearance by arrest. However, according to Program definitions, clearances involving both adult and juvenile offenders are classified as adult clearances.

Of all aggravated assault clearances reported nationally in 2003, 11.9 percent involved only juveniles, defined by the UCR Program as persons under the age of 18. In the Nation's cities,

collectively, 12.0 percent of clearances for aggravated assault involved only juveniles. In metropolitan counties, 12.6 percent of aggravated assault clearances involved only persons under the age of 18; in nonmetropolitan counties, 9.4 percent of aggravated assault clearances involved only juveniles. (See Table 28.)

### Arrests

In 2003, the UCR Program estimated arrests for aggravated assault at 449,933. Arrests for aggravated assault comprised an estimated 75.4 percent of all violent crime arrests and 3.3 percent of all arrests. (Based on Table 29, which presents the estimated number of arrests for the Nation.)

### Arrest Trends

Nationally, aggravated assault arrests declined 2.5 percent from the previous year's figure. (See Table 36.) The 5- and 10-year trend data showed declines in arrests for this offense of 4.6 percent and 12.3 percent, respectively. (See Tables 32 and 34.)

### Arrest Distribution by Age, Sex, and Race

Of those persons arrested for aggravated assault in 2003, 86.3 percent were adults. (Based on Table 38.) A review of the total arrests for this offense indicated that 39.9 percent of arrestees were under the age of 25, approximately 25 percent (24.8) were under the age of 21, and 5.0 percent were under the age of 15. (See Table 41.) The number of adult arrests for aggravated assault declined 2.9 percent when compared to the number in 2002, 3.8 percent when compared to that in 1999, and 9.8 percent compared to the 1994 figure. The number of juveniles arrested for aggravated assault in 2003 showed virtually no change from the previous year's rate (+ 0.1 percent). However, the number of

juveniles arrested for aggravated assault declined 9.1 percent from the 1999 total and 25.8 percent from the 1994 number. (See Tables 32, 34, and 36.)

Persons arrested for aggravated assault during 2003 were overwhelmingly male—79.3 percent. (See Table 42.) Of the males arrested for this offense, 86.8 percent were adults. Of juvenile males arrested for aggravated assault, 35.5 percent were under the age of 15. (Based on Table 39.) A review of the data concerning females arrested for aggravated assault

demonstrated that 84.4 percent were adults. Of the female juveniles arrested for aggravated assault in 2003, 38.5 percent were under the age of 15. (Based on Table 40.)

When distributed by race, the data showed that 64.7 percent of all persons arrested for aggravated assault were white and 33.0 percent were black. The two other racial groups, Asian or Pacific Islanders and American Indians or Alaskan Natives, accounted for 1.2 percent and 1.1 percent of arrestees, respectively. (See Table 43.)

# Property Crime

## Definition

In the Uniform Crime Reporting (UCR) Program, property crime includes the offenses of burglary, larceny-theft, motor vehicle theft, and arson. The object of the theft-type offenses is the taking of money or property, but there is no force or threat of force against the victims. The property crime category includes arson because the offense involves the destruction of property; however, arson victims may be subjected to force. Because of limited participation and varying collection procedures by local agencies, only limited data are available for arson. Arson statistics are included in trend, clearance, and arrest tables throughout *Crime in the United States*, but they are not included in any estimated volume data. The arson section in this report provides more information on that offense.

## Trend

Year	Number of offenses <sup>1</sup>	Rate per 100,000 inhabitants <sup>1</sup>
2002	10,455,277	3,630.6
2003	10,435,523	3,588.4
Percent change	-0.2	-1.2

<sup>1</sup>Does not include arson. See Offense Tabulations.

**Figure 2.9**

**Property Crime**  
Percent Change from 1999

## National Volume, Trends, and Rates

### Volume

In 2003, law enforcement agencies reported an estimated 10,435,523 property crimes. The figure was 0.2 percent lower than the 2002 estimate. Further trend analyses of 5- and 10-year volumes for property crime indicated that the 2003 figure was 2.2 percent higher than the 1999 number and 14.0 percent lower than the number in 1994. (See Table 1, national estimates.)

Among individual property crimes in 2003, burglary offenses rose 0.1 percent, and motor vehicle theft increased 1.1 percent when compared to the 2002 estimates. Larceny-theft decreased 0.5 percent. (See Table 1, national estimates.)

### Rate

The Nation's rate of property crime offenses in 2003 was measured at 3,588.4 offenses per 100,000 inhabitants. The 2003 rate decreased 1.2 percent compared to the previous year's rate. When

measured against the rates from 5 and 10 years ago, property crime rates declined 4.1 percent from the 1999 rate and fell 23.0 percent from the 1994 rate. (See Table 1, national estimates.)

### Regional Offense Trends and Rates

The UCR Program divides the United States into four regions for data analyses: the Northeast, the Midwest, the South, and the West. (Appendix III provides more information on UCR area definitions.) An examination of 2003 data showed the following information regarding the Nation’s four regions.

#### The Northeast

Property crimes reported by law enforcement agencies in the Northeast accounted for an estimated 12.6 percent of property crimes nationwide. (See Table 3, regional estimates.) Compared to the 2002 volume, property crime decreased 2.3 percent in the Northeast in 2003. The rate of property crime offenses in the Northeast—2,410.1 per 100,000 inhabitants—also showed a decline, 2.7 percent from the previous year’s rate. (See Table 4, regional, divisional, state estimates.)

#### The Midwest

Property crimes reported by the Midwest’s law enforcement agencies were estimated at 21.1 percent of the Nation’s property crime total. (See Table 3, regional estimates.) The region’s volume showed a 2.3-percent decrease from the 2002 volume. When compared to the 2002 rate, the Midwest’s property crime rate, 3,369.5 property crimes per 100,000 inhabitants, declined 2.7 percent. (See Table 4, regional, divisional, state estimates.)

#### The South

Law enforcement agencies in the South had an estimated 41.2 percent of the property crimes nationwide. (See Table 3, regional estimates.) A comparison to the previous year’s volume showed that property crime reported for 2003 increased 0.3 percent in the South. The 2003 rate of 4,115.6 property crimes per 100,000 population in the South was a 1.0-percent decrease from the 2002 rate. (See Table 4, regional, divisional, state estimates.)

#### The West

Law enforcement agencies in the West had an estimated 25.1 percent of the Nation’s property crime. (See Table 3, regional estimates.) The volume of property crime offenses in the West increased 2.0 percent from the volume reported for 2002. The West’s property crime rate of 3,939.3 offenses per 100,000 population was 0.5 percent above the rate for the previous year. (See Table 4, regional, divisional, state estimates.)

estimated 82.8 percent of the Nation’s population, had an estimated property crime rate of 3,783.0 offenses per 100,000 persons. Cities outside MSAs, with 6.8 percent of the population, had a rate of 4,147.5 property offenses per 100,000 inhabitants. Nonmetropolitan counties, making up 10.4 percent of the overall population, had a rate of 1,677.1 property crimes per 100,000 in population. (See Table 2, community type estimates.) For more information on UCR area definitions, see Appendix III.

### Population Groups: Trends and Rates

The UCR Program aggregates crime statistics by population groups; an explanation of these groupings can be found in Appendix III. Among population groups in 2003, property crime decreased 0.3 percent in the Nation’s cities collectively. Changes from the 2002 percentage for city groupings ranged from a 1.2-percent increase in property crime in the Nation’s smallest cities, those with populations less than 10,000 inhabitants, to a 1.2-percent decrease in the Nation’s largest cities, those with 250,000 and over in population. (See Table 12.)

In terms of reported property crime, the Nation’s cities collectively had a property crime rate of 4,342.8 per 100,000 population. Nonmetropolitan counties had a property crime rate of 1,808.2 per 100,000 people, and metropolitan counties experienced a rate of 2,650.9 property crime offenses per 100,000 inhabitants. (See Table 16.)

### Offense Analysis

In 2003, the estimated dollar loss attributable to property crimes (excluding arson) was nearly \$17 billion. This figure represented an increase of 2.1 percent from the 2002 estimated dollar loss

**Table 2.24**

#### Property Crime by Month Percent Distribution, 1999-2003

Month	1999	2000	2001	2002	2003
January	8.0	7.8	7.8	8.3	8.0
February	7.2	7.3	6.8	7.0	6.7
March	8.0	8.2	7.8	7.8	8.0
April	7.9	7.9	7.9	8.0	8.2
May	8.3	8.6	8.5	8.5	8.6
June	8.6	8.6	8.5	8.4	8.5
July	9.1	9.1	9.1	9.2	9.1
August	9.2	9.2	9.1	9.0	8.9
September	8.5	8.5	8.5	8.6	8.7
October	8.7	8.8	9.2	8.8	8.8
November	8.2	8.1	8.5	8.1	8.1
December	8.4	8.0	8.5	8.3	8.3

### Community Types

When presenting crime data, the UCR Program designates three types of communities: Metropolitan Statistical Areas (MSAs), cities outside of MSAs, and nonmetropolitan counties. In 2003, MSAs, which accounted for an

for property crime. (Based on Table 1, which provides national estimates, and Table 23, which includes data from law enforcement agencies submitting at least 6 months of complete offense reports for 2003.)

Among the individual property crimes, the 2003 estimated dollar losses were \$3.5 billion for burglary, \$4.9 billion for larceny-theft, and \$8.6 billion for motor vehicle theft. (Based on Tables 1 and 23.) Arson (which is excluded from the estimated property crime tabulations because of limited coverage and participation) had an average dollar loss of \$11,942 for the 64,043 offenses for which monetary values were reported. (See Table 2.31.)

## Clearances

In the UCR Program, law enforcement can clear offenses either by arrest or by exceptional means, i.e., when elements beyond the control of law enforcement prevent the placing of formal charges against the offender. (Section III provides more information regarding clearances.) During 2003, law enforcement nationwide cleared 16.4 percent of reported property crimes. (See Table 25.)

By region in 2003, law enforcement in the Northeast cleared 20.1 percent of property crimes; law enforcement in the South cleared 16.6 percent, followed by the Midwest with 16.5 percent, and the West with 14.4 percent of reported property crime. (See Table 26.)

Law enforcement in the Nation's cities collectively cleared 16.3 percent of property crimes in 2003. In nonmetropolitan counties, law enforcement cleared 17.8 percent of property crimes and in metropolitan counties, 16.2 percent. (See Table 25.)

Among the population groups labeled city, law enforcement in cities with populations of 10,000 to 24,999

had the greatest percentage of property crimes cleared, 20.7 percent. Law enforcement in the nation's largest cities, those with populations of over 250,000 inhabitants, cleared the lowest percentage of property crimes during 2003, 12.8 percent. (See Table 25.)

## Clearances and Juveniles

For UCR purposes, when an offender under the age of 18 is cited to appear before juvenile authorities, the incident is cleared by arrest, even though a physical arrest may not have occurred. Additionally, clearances involving both adult and juvenile offenders are classified as adult clearances.

In 2003, clearances involving only juveniles (persons under the age of 18) comprised 19.3 percent of all property crime clearances. By offense breakdown, this age group accounted for 16.8 percent of burglary clearances, 20.2 percent of larceny-theft clearances, and 17.3 percent of motor vehicle theft clearances.

In the Nation's cities during 2003, juvenile clearances accounted for 20.1 percent of all property crime clearances. In nonmetropolitan counties, 15.7 percent of the clearances involved juveniles only and in the metropolitan counties, 16.7 percent. (See Table 28.)

## Arrests

### Total Arrests

Table 29 in this publication provides the estimated number of arrests in the Nation for the 29 offenses for which the UCR Program collects arrest data. The remaining tables in Section IV of this publication contain actual arrest data for those agencies that provided 12 months of arrest data to the national Program.

Law enforcement agencies made an estimated 1.6 million arrests during 2003 for property crime offenses (in-

cluding arson). Property crime arrests accounted for an estimated 11.8 percent of all arrests. Of the estimated arrests for property crimes, arrests for larceny-theft offenses comprised the largest percentage, 71.3 percent. (Additional arrest breakdowns can be found in Table 29.)

## Arrest Rates

In 2003, the national property crime arrest rate was 558.4 per 100,000 inhabitants. Among the regions, the South had the highest arrest rate for property crimes with 604.0 arrests per 100,000 persons. The West had the second highest rate for property crime arrests with 582.2, followed by the Midwest with 562.1, and the Northeast with 438.4 property crime arrests per 100,000 inhabitants. (See Table 30.)

Collectively, the Nation's cities recorded an overall property crime arrest rate of 661.1 arrests per 100,000 inhabitants. Among those population groups labeled as city, the rate of arrests per 100,000 residents ranged from a low of 604.6 in cities with populations under 10,000 to a high of 711.5 in cities with 50,000 to 99,999 in population. The Nation's metropolitan counties had an arrest rate of 361.6 property crime arrests per 100,000 people, and nonmetropolitan counties experienced 277.0 property crime arrests per 100,000 residents. (See Table 31.)

## Arrest Trends

A comparison of the volume of property crime arrests from 2003 to 2002 showed a 0.7-percent increase in the overall category. Property crime arrests increased for burglary by 2.2 percent, for motor vehicle theft by 0.8 percent, and for larceny-theft by 0.5 percent. Arson arrests declined by 5.8 percent. Arrests of adults for property crime in 2003 were up 2.3 percent when compared to the 2002 figure, but arrests of juveniles declined 2.9 percent when compared to the

previous years' arrests. (See Table 36.)

An analysis of 5-year and 10-year trend data revealed a nationwide decline in the number of arrests for property crimes from the 1999 and 1994 levels. Property crime arrests in 2003 were 3.3 percent less than in 1999 and 23.4 percent fewer than in 1994. Tables 32 and 34 provide more information regarding trend data.

#### ***Distribution by Age, Sex, and Race***

Tables 38-43 in Section IV of this report include information on the age, sex, and race of persons arrested for property crimes. In 2003, a total of 71.1 percent of persons arrested for

property crime were adults (persons 18 years and older). Of the adults arrested for property crime offenses, 40.1 percent were 18 to 24 years of age. By gender, 69.2 percent of all persons arrested for property crime were male. By race, 68.2 percent of all persons arrested for property crime were white, 29.1 percent were black, and 2.6 percent were of other races. (See Tables 38, 42, and 43.)

***Information regarding the UCR Program's statistical methodology and table construction can be found in Appendix I.***

# Burglary

## Definition

Burglary is defined in the Uniform Crime Reporting (UCR) Program as the unlawful entry of a structure to commit a felony or a theft. The use of force to gain entry is not required to classify an offense as a burglary. Burglary in the UCR Program is categorized into three subclassifications: forcible entry, unlawful entry where no force is used, and attempted forcible entry.

## Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2002	2,151,252	747.0
2003	2,153,464	740.5
Percent change	+0.1	-0.9

## National Volume, Trends, and Rates

In 2003, burglary offenses in the Nation were estimated at 2,153,464; this number remained virtually unchanged (+0.1 percent) when compared to the 2002 estimate. Burglary offenses accounted for 20.6 percent of all property crimes. Five- and 10-year trends showed that the burglary volume increased 2.5 percent when compared to the 1999 estimate, but fell 20.6 percent when compared to 1994 estimate. (See Table 1, national estimates.)

The estimated burglary rate in 2003 was 740.5 offenses per 100,000 inhabitants. Two-, 5-, and 10-year trend data showed that the 2003 rate was a 0.9-percent decrease when compared to the estimated burglary rate in 2002, a 3.9-percent decrease from the 1999 rate, and a 28.9-percent decrease from the 1994 rate. (See Table 1, national estimates.)

Figure 2.10

## Burglary

Percent Change from 1999

## Regional Offense Trends and Rates

The UCR Program divides the United States into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III.) In 2003, data collected regarding the Nation's four regions reflected the following:

### The Northeast

The Northeast, comprising 18.7 percent of the U.S. population, had an estimated 11.3 percent of the burglaries nationwide. A comparison with 2002 data showed that in 2003 the Northeast experienced a 2.2-percent decrease in the estimated volume of burglaries. The rate of 446.3 burglaries per 100,000 persons was a 2.6-percent decrease from the 2002 rate. (See Tables 3 and 4, regional estimates.)

### The Midwest

The Midwest, accounting for 22.5 percent of the country's population, had an estimated 20.1 percent of all burglaries. In 2003, the region experienced a 3.2-percent decrease in the estimated volume of burglaries from the 2002 estimate. The 2003 rate of an estimated 661.3 burglaries per 100,000 inhabitants was a 3.6-percent decrease from the 2002 estimate. (See Tables 3 and 4, regional estimates.)

### The South

In 2003, the South, the Nation's largest region having 35.9 percent of the U.S. population, experienced an estimated 45.1 percent of the Nation's burglaries—a 0.8-percent increase from the 2002 estimate. The estimated rate of 928.5 burglaries per 100,000 inhabitants was a 0.5-percent decrease when compared to the 2002 rate. (See Table 3 and 4, regional estimates.)

### The West

With 22.9 percent of the Nation's population, the West had an estimated 23.6 percent of all burglaries. When compared to the 2002 estimated volume, the region experienced a 2.9-percent increase in 2003. This was the only region that showed an increase in the burglary

rate with an estimated 763.6 burglaries per 100,000 persons, up 1.4 percent from the 2002 rate. (See Tables 3 and 4, regional estimates.)

### Community Types

Metropolitan Statistical Areas (MSAs), which made up approximately 82.8 percent of the total U.S. population, accounted for an estimated 84.7 percent of the Nation's burglaries. MSAs had a burglary rate estimated at 757.7 burglaries per 100,000 persons in 2003. Cities outside of MSAs, which comprised approximately 6.8 percent of the Nation's population, accounted for 7.5 percent of the burglaries, and these communities had a rate of 815.8 burglaries per 100,000 in population. Nonmetropolitan areas, which comprised approximately 10.4 percent of the U.S. population, accounted for an estimated 7.8 percent of the country's burglaries. These areas had a rate of 554.9 burglaries per 100,000 inhabitants. (See Table 2, community type estimates.)

### Population Groups: Trends and Rates

An examination of the data by population group showed that, collectively, those cities with populations under 10,000 experienced the largest year-to-year increase, 1.5 percent, in reported burglaries from 2002 to 2003. Those cities with populations of 250,000 and over had the largest decrease, 0.4 percent, from the 2002 volume. The Nation's cities collectively saw a 0.2-percent increase in the number of burglaries reported in 2003 when compared to the number of burglaries reported in 2002. Metropolitan counties had an increase of 0.2 percent, and nonmetropolitan counties had a decrease in burglaries of 0.7 percent when compared to the 2002 numbers. (See Table 12.)

In 2003, the Nation's cities collectively had a rate of 829.5 burglaries per 100,000 persons. Those cities with populations 250,000 and over had the highest rate among all population groups at 979.6 burglaries per 100,000 inhabitants. Cities with populations of 10,000 to 24,999 had the lowest burglary rate among the Nation's cities, 645.9 offenses per 100,000 persons. Metropolitan counties had a rate of 637.9 burglaries per 100,000 in population, and nonmetropolitan counties had a rate of 584.5 burglaries per 100,000 persons. (See Table 16.)

### Offense Analysis

Among those agencies that reported burglary statistics for all 12 months of 2003, the data showed that forcible entry burglaries accounted for 62.4 percent of the burglary offenses, unlawful entry comprised 31.2 percent, and attempted forcible entry accounted for approximately 6.3 percent. (Based on Table 19.)

The majority of burglaries, 65.8 percent, were residential, and the remaining 34.2 percent were of nonresidences, such as stores and offices. The data also showed that most residential burglaries, 62.0 percent, occurred during daytime hours, and most nonresidential burglaries, 58.4 percent, occurred at night. The time of occurrence was unknown for 25.3 percent of burglaries. (Based on Table 23.)

Losses due to burglaries totaled an estimated \$3.5 billion in 2003, with an average value of \$1,626 per offense. The losses in residential burglaries averaged \$1,600 per offense, and in nonresidential burglaries \$1,676 per offense. (Based on Tables 1 and 23.)

**Table 2.25**

**Burglary by Month**  
Percent Distribution, 1999-2003

Month	1999	2000	2001	2002	2003
January	8.3	8.1	7.9	8.5	8.1
February	7.2	7.2	6.6	6.9	6.4
March	7.9	8.0	7.6	7.7	7.8
April	7.7	7.8	7.7	7.8	8.1
May	8.2	8.5	8.3	8.5	8.6
June	8.4	8.4	8.2	8.2	8.4
July	9.0	9.2	9.1	9.1	9.1
August	9.1	9.2	9.1	9.0	8.9
September	8.7	8.6	8.6	8.7	8.8
October	8.6	8.7	9.3	8.8	8.9
November	8.4	8.3	8.9	8.2	8.2
December	8.5	8.1	8.8	8.5	8.5

**Figure 2.11****Burglary**  
Percent Change from 1999**Clearances**

The UCR Program considers an offense to be cleared by arrest or “solved” when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. A clearance by exceptional means can be recorded when the offender has been identified and located and there is enough evidence to support an arrest, but conditions beyond law enforcement’s control prevent an agency from bringing charges. (More information about clearances is available in Section III of this publication.)

In 2003, law enforcement cleared 13.1 percent of reported burglaries by arrest or exceptional means. Agencies in cities overall cleared 12.5 percent of burglaries. Within population groups labeled as city, those cities with under 10,000 in population showed 16.5 per-

cent of reported burglaries as cleared, the highest percentage of clearances among the Nation’s cities. Law enforcement in the Nation’s largest cities, those cities with populations 250,000 and over, cleared the lowest percentage of burglaries, 11.0 percent. In nonmetropolitan counties, law enforcement cleared 16.3 percent of reported burglary offenses, and in metropolitan counties, they cleared 13.8 percent. (See Table 25.)

Regionally, law enforcement agencies in the Northeast cleared 17.3 percent of the burglaries brought to their attention. Those in the South cleared 13.1 percent of reported burglaries; in the Midwest, 12.1 percent; and in the West, 11.8 percent. (See Table 26.)

Burglaries involving unlawful entry without use of force were cleared by arrest or exceptional means in 14.1 percent of the reported cases during 2003.

Approximately 12.4 percent of forcible entry burglaries and 11.0 percent of attempted forcible entry burglaries were cleared. (See Table 27.)

**Clearances and Juveniles**

The UCR Program considers an incident involving only offenders under the age of 18 to be cleared by arrest when an offender is cited to appear in juvenile court or before other juvenile authorities, even though a physical arrest may not have occurred. Clearances involving both adult and juvenile offenders are classified as adult clearances. Therefore, clearances involving juveniles who may be participating in a burglary with an adult were not included in these figures.

In 2003, only persons under 18 years of age were involved in 16.8 percent of the burglaries cleared by arrest or exceptional means. A review of the data by city population group showed

that cities with populations under 10,000 had the highest percentage of clearances involving only juveniles at 20.3 percent. Cities with populations of 250,000 and over had the lowest percentage of cleared offenses involving juveniles only at 13.3 percent. Nonmetropolitan county agencies reported that 16.2 percent of the burglary clearances in their jurisdictions were of juveniles, and metropolitan county agencies reported 17.0 percent of their burglary clearances involved juveniles only. (See Table 28.)

## Arrests

The estimated number of burglary arrests for 2003 was 290,956. Burglary arrests accounted for an estimated 18.1 percent of the arrests for property crimes. (Based on Table 29.) The remaining tables in Section IV of this publication provide actual arrest totals for agencies that submitted 12 months of arrest data to the UCR Program.

In 2003, law enforcement agencies in the West reported 122.0 burglary arrests per 100,000 inhabitants. Agencies in the South reported an arrest rate of 107.5, the Midwest a rate of 79.9, and law enforcement in the Northeast, a rate of 78.1 burglary arrests per 100,000 in population. (See Table 30.)

Law enforcement in the Nation's cities collectively reported a rate of 106.3 arrests for burglary per 100,000 inhabitants. Those in cities with populations of 25,000 to 49,999 reported the fewest arrests for burglaries per 100,000 inhabitants, 89.4. Law enforcements in cities with 100,000 to 249,999 inhabitants reported the highest number of arrests per

100,000 population, 125.5. Those in metropolitan and non-metropolitan counties reported rates of 85.5 and 92.3 arrests for burglary per 100,000 inhabitants, respectively. (See Table 31.)

Five- and 10-year trend data showed that burglary arrests overall declined 0.3 percent from burglary arrest totals in 1999 and 23.5 percent from the 1994 number. Additionally, in 2003, arrests of adults for burglary increased 7.1 percent when measured against the number of adults arrested for burglary in 1999 but declined 13.8 percent when compared to 1994 arrest data; arrests of juveniles declined 14.7 percent from the 1999 figure and 39.8 percent from the 1994 figure. (See Tables 32 and 34.)

When compared to 2002 data, overall arrests for burglaries in 2003 increased 2.2 percent. Arrests of adults increased 3.8 percent; however, arrests of juveniles declined 1.2 percent. (See Table 36.)

In 2003, males accounted for 86.3 percent of burglary arrestees. (See Table 42.) Of the male arrestees, 29.9 percent were juveniles (under 18 years of age). (Based on Table 39.) Of the female arrestees, 25.2 percent were juveniles. (Based on Table 40.)

By race, 70.5 percent of all burglary arrestees in 2003 were white, 27.5 percent were black, and 2.0 percent were of other races. Of those adults arrested for burglary, 70.2 percent were white, 28.0 percent were black, and 1.8 percent were of other races. Of burglary arrestees under 18 years of age, 71.4 percent were white, 26.1 percent were black, and 2.5 percent were of other races. (See Table 43.)

# Larceny-theft

## Definition

Larceny-theft is defined as the unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another. It includes crimes such as shoplifting, pocket-picking, purse-snatching, thefts from motor vehicles, thefts of motor vehicle parts and accessories, bicycle thefts, etc., in which no use of force, violence, or fraud occurs. In the Uniform Crime Reporting (UCR) Program, this crime category does not include embezzlement, confidence games, forgery, and worthless checks. Motor vehicle theft is also excluded from this category inasmuch as it is a separate offense.

## Trend

<i>Year</i>	<i>Number of offenses</i>	<i>Rate per 100,000 inhabitants</i>
2002	7,057,379	2,450.7
2003	7,021,588	2,414.5
<i>Percent change</i>	-0.5	-1.5

## National Volume, Trends, and Rates

In 2003, there were more than 7 million estimated larceny-thefts in the Nation, which cost victims an estimated \$4.9 billion in losses. (Based on Table 1, which

includes national estimates, and Table 23, which includes data from those agencies supplying at least 6 months of complete offense reports.)

**Figure 2.12**

**Larceny-theft**  
Percent Change from 1999

Larceny-theft offenses in the United States accounted for 67.3 percent of the estimated total property crimes, i.e., burglary, larceny-theft, and motor vehicle theft. When 2003 data were compared to 2002 data, the estimated number of larceny-thefts in the Nation decreased 0.5 percent. Five- and 10-year trends showed that the estimated volume of larceny-thefts in the Nation increased 0.9 percent from the 1999 estimate but decreased 10.9 percent when compared to the 1994 estimate. (See Table 1, national estimates.)

The rate of larceny-thefts in the Nation for 2003 was an estimated 2,414.5 offenses per 100,000 inhabitants, a 1.5-percent decrease from the 2002 rate. The 2003 estimated rate reflected a 5.3-percent decrease from the 1999 rate and a 20.2-percent drop from the 1994 rate. (See Table 1, national estimates.)

## Regional Offense Trends and Rates

The UCR Program divides the Nation into four regions: the Northeast, the Midwest, the South, and the West. (See Appendix III for a map delineating the regions.) By region, larceny-theft data for 2003 reflected the following:

### The Northeast

The Northeast accounted for 18.7 percent of the Nation's total estimated population and an estimated 13.0 percent of the country's larceny-theft offenses. The estimated volume of larceny-theft offenses occurring in the region dur-

ing 2003 declined 2.1 percent from the 2002 estimate. Among the regions, the Northeast had the lowest rate of larceny-theft offenses per 100,000 inhabitants, estimated at 1,673.0; this was a decline of 2.5 percent from the 2002 rate. (See Tables 3 and 4, regional estimates.)

### The Midwest

With 22.5 percent of the Nation's population, the Midwestern states accounted for 21.9 percent of the Nation's larceny-thefts in 2003. Those data reflected a 2.3-percent decrease in the volume of larceny-theft offenses when compared to the 2002 estimate. The Midwest had an estimated 2,351.2 larceny-theft offenses per 100,000 in population, which was a 2.8-percent decline from 2002 data. (See Tables 3 and 4, regional estimates.)

### The South

The Nation's most populous region, the South, with 35.9 percent of the U.S. population, had 41.3 percent of the Nation's larceny-theft offenses in 2003. From 2002 to 2003, the number of larceny-theft offenses increased slightly, 0.3 percent, but the rate—2,771.0 per 100,000 population—decreased 1.0 percent. (See Tables 3 and 4, regional estimates.)

### The West

Nearly twenty-three percent (22.9) of the Nation's population resided in the West in 2003, and this region accounted for an estimated 23.9 percent of the total larceny-thefts during that year. Despite a 0.8-percent increase in the estimated number of larceny-thefts during 2003, the West recorded a 0.7-percent decline in the rate when compared to 2002 estimate—2,522.9 larcenies per 100,000 inhabitants. (See Tables 3 and 4, regional estimates.)

## Community Types

The UCR Program compiles data for three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties. (Additional information regarding community types is located in Appendix III.) Nearly 83 percent (82.8) of the Nation's estimated population resided in MSAs in 2003, 6.8 percent lived in cities outside MSAs, and 10.4 percent of the population lived in nonmetropolitan counties. (Based on Table 2, community type estimates.) The Nation's MSAs had a rate estimated at 2,534.3 larceny-theft offenses per 100,000 inhabitants during 2003. Cities outside MSAs had a rate of 3,132.2, and nonmetropolitan counties had a rate of 993.6 larceny-thefts per 100,000 inhabitants. (See Table 2, community type estimates.)

**Table 2.26**

<sup>1</sup> Because of rounding, the percentages may not add to 100.0.

## Population Groups: Trends and Rates

The UCR Program aggregates crime statistics into population groups. A list of these groups is located in Appendix III. Collectively, the Nation's cities had a 0.6-percent decrease in the number of larceny-thefts in 2003 when compared to the 2002 figure. The largest decline, 1.4

**Figure 2.13**

**Larceny-theft Categories**  
Percent Change from 1999

percent, occurred in the Nation's largest cities, those with 250,000 or more inhabitants. The Nation's smallest cities, those with under 10,000 inhabitants, had a 1.1-percent increase in larceny-thefts when comparing 2003 to 2002 data. Metropolitan counties showed a 0.5-percent decline in larcenies between 2003 and 2002. Over the same time frame, nonmetropolitan counties experienced a 1.2-percent increase in the number of larceny-thefts. (See Table 12.)

An examination of the rate of larceny-theft by population group indicated that the Nation's cities, collectively, had 2,951.7 larcenies per 100,000 inhabitants in 2003. Of the city population groups, those cities with 100,000 to 249,999 inhabitants had the highest rate, 3,297.7 reported larceny-thefts per 100,000 inhabitants. Cities with populations of 10,000 to 24,999 inhabitants had the lowest rate, 2,583.4 larceny-thefts per 100,000 population. Metropolitan counties had a rate of 1,689.6 larceny-

thefts per 100,000 population, and nonmetropolitan counties had a rate of 1,084.1 per 100,000 inhabitants. (See Table 16.)

## Offense Analysis

### Distribution

A breakdown of larceny-theft offenses showed that thefts from motor vehicles accounted for 26.4 percent of reported larceny-thefts in the Nation during 2003. Shoplifting accounted for 14.4 percent of larceny-thefts, and thefts from buildings made up 12.4 percent of the larceny-theft total. The theft of motor vehicle parts and accessories comprised 11.1 percent of larcenies, and the theft of bicycles accounted for 3.9 percent of larceny-thefts. Thefts from coin-operated machines, purse-snatchings, pocket-pickings, and other miscellaneous types of larceny-thefts comprised the remainder. (See Table 23.)

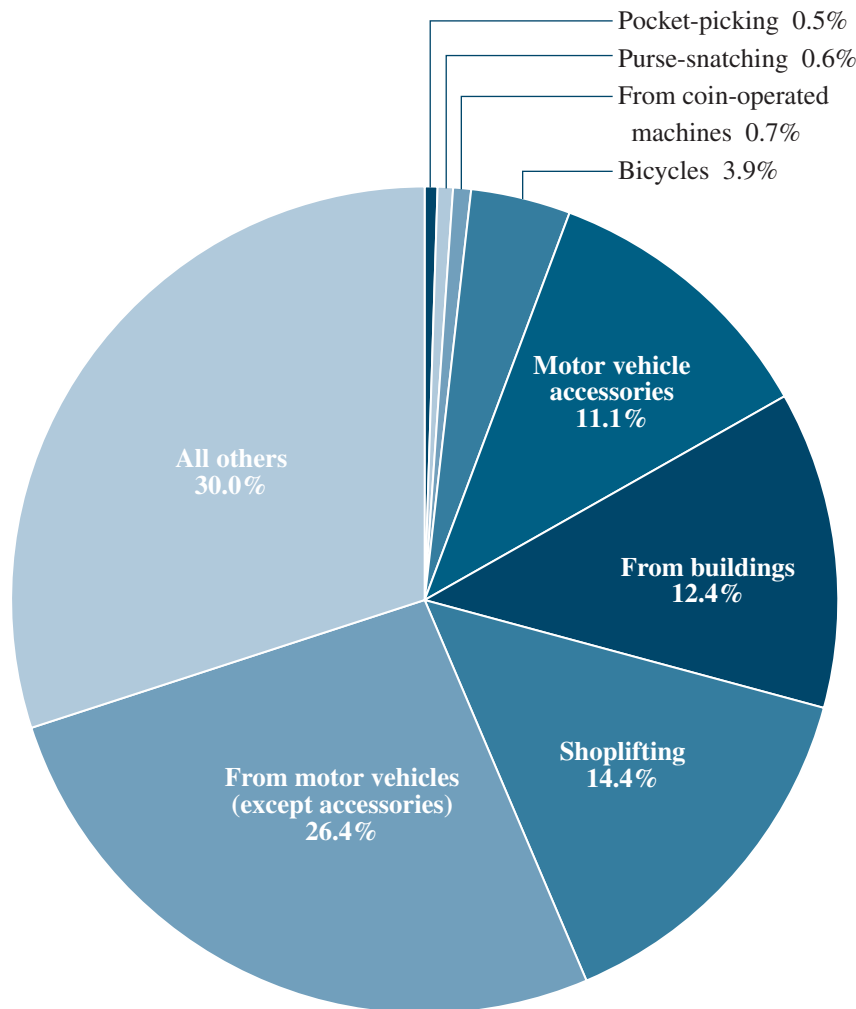

### Loss by Dollar Value

Larceny-theft offenses cost an estimated \$4.9 billion in lost property in 2003. (Based on Table 1, which includes national estimates, and Table 23, which includes data from those agencies supplying at least 6 months of complete offense reports.) The average value of property stolen per offense, \$698, remained virtually unchanged from the 2002 average value of \$699. (See Table 23.)

In 2003, the larceny-theft category with the highest average loss, \$1,030, was thefts from buildings. For thefts from motor vehicles, the average value loss was \$680, and for thefts of motor vehicle parts and accessories, the average loss was \$442. Purse-snatchings had an average value loss of \$367; pocket-pickings, \$294; and thefts of bicycles, \$247. Thefts from coin-operated machines had an average loss of \$262.

**Figure 2.14**

**Larceny-theft**  
Percent Distribution,<sup>1</sup> 2003

<sup>1</sup> Due to rounding, the percentages may not add to 100.0.

The larceny-theft category with the lowest average dollar value was shoplifting at \$163. (See Table 23.)

An examination of larceny-theft offenses by monetary value indicated that incidents in which the stolen property was valued at over \$200 accounted for 39.3 percent of all reported larceny-thefts. Property valued at under \$50 made up 38.1 percent of the reported larceny-theft offenses, and property valued from \$50 to \$200 made up 22.6 percent of the larcenies. (See Table 23.)

### Clearances

In the UCR Program, law enforcement agencies may clear an offense either by the arrest of an individual or by exceptional means, i.e., when elements beyond the control of law enforcement preclude the agency from placing formal charges against the offender. (Section III of this publication provides additional information regarding clearances.) Nationwide, law enforcement cleared 18.0 percent of all reported larceny-theft offenses in 2003.

The Nation's cities, collectively, cleared 18.1 percent of larceny-theft offenses. Cities with 10,000 to 24,999 in population cleared the highest percentage of larceny-thefts, 22.2 percent. The Nation's largest cities, those with populations of 250,000 or more inhabitants, had the lowest percentage of larcenies cleared at 14.2 percent. Law enforcement agencies in metropolitan counties cleared 17.4 percent of larcenies, and agencies in nonmetropolitan counties cleared 17.5 percent of larceny-theft offenses. (See Table 25.)

An examination of larceny-theft clearances by region showed that law enforcement agencies in the Northeast cleared 21.9 percent of the larceny-theft offenses brought to their attention. Law enforcement agencies in the Midwest

cleared 18.1 percent of larceny-theft offenses, those in the South cleared 18.0 percent, and agencies in the West cleared 16.1 percent of reported larceny-thefts. (See Table 26.)

In the UCR Program, a juvenile clearance is counted when an offender under the age of 18 is cited to appear in juvenile court or before other juvenile authorities even though a physical arrest may not have occurred. Clearances involving both adult and juvenile offenders are considered adult clearances and are not counted in the juvenile figures. For 2003, slightly more than 20 percent (20.2) of the larceny-theft clearances in the Nation involved only juveniles. Twenty-one percent of larceny-theft clearances in the Nation's cities, collectively, involved only juveniles. Of all city population groups, cities with populations in the 50,000 to 99,999 range had 23.6 percent of the larceny-theft clearances involve only juveniles—the highest percentage. Law enforcement personnel in cities with populations of 250,000 or more inhabitants cleared 17.0 percent of the larceny-thefts that involved only juveniles—the lowest percentage. Law enforcement agencies in the Nation's metropolitan counties reported that 16.8 percent of larceny-theft clearances involved only juveniles; those in nonmetropolitan counties reported that 15.0 percent of larceny-theft clearances involved only juveniles. (See Table 28.)

### Arrests

Table 29 provides the estimated number of arrests for the Nation for the 29 offenses for which the UCR Program collects arrest data. The remaining tables in Section IV of this publication contain actual arrest data for those agencies that furnished 12 months of arrest data to the national UCR Program.

Law enforcement agencies in the Nation made an estimated 1,145,074 arrests for larceny-theft in 2003, the highest arrest total of all reported property offenses. Arrests for larceny-theft comprised an estimated 71.3 percent of arrests for all property crime offenses. (Based on Table 29.) Nationally in 2003, law enforcement reported a rate of 400.4 larceny-theft arrests per 100,000 inhabitants. A review of larceny-theft arrests by region showed that in 2003 the South had the highest rate, 449.6 arrests per 100,000 inhabitants. Law enforcement agencies in the Midwest made 424.7 arrests for larceny-theft per 100,000 inhabitants; the West, 377.1; and the Northeast, 323.8. (See Table 30.)

The Nation's cities collectively had a rate of 489.9 larceny-theft arrests per 100,000 inhabitants. By city population groups, those cities with 50,000 to 99,999 inhabitants had the highest arrest rate for larceny-theft, 546.5 per 100,000 inhabitants; cities with 250,000 or more inhabitants had the lowest arrest rate, 452.0. The Nation's metropolitan counties had a rate of 231.3 larceny-theft arrests; nonmetropolitan counties had a rate of 150.6 larceny-theft arrests per 100,000 in population. (See Table 31.)

When compared to 2002 figures, the number of larceny-theft arrests during 2003 increased 0.5 percent nationally. The number of arrests of juveniles for larceny-theft in 2003 decreased 3.2 percent from the 2002 figure, and the number of arrests of adults for larceny-theft increased 2.0 percent. (See Table 36.)

The number of arrests of males for larceny-theft in 2003 remained virtually unchanged (+0.1 percent) from the 2002 data; the number of arrests of females for larceny-theft increased 1.1 percent. (See Table 37.)

Of those persons arrested for larceny-theft in the Nation in 2003, 28.4 percent were juveniles. Slightly more than 30 percent (30.2) of all females arrested for larceny-theft in 2003 were under the age of 18. (Based on Tables 38 and 40.) A breakdown of arrest data by gender showed that 62.9 percent of larceny-theft arrestees were male. (See Table 42.) By race,

68.5 percent of larceny-theft arrestees were white, 28.8 percent were black, and the remainder were of other races. Of the juveniles arrested for larceny-theft in 2003, 69.8 percent were white, 26.7 percent were black, and 3.5 percent were of other races. (See Table 43.)

# Motor Vehicle Theft

## Definition

The Uniform Crime Reporting (UCR) Program defines motor vehicle theft as the theft or attempted theft of a motor vehicle. This offense includes the stealing of automobiles, trucks, buses, motorcycles, motorscooters, snowmobiles, etc. The taking of a motor vehicle for temporary use by persons having lawful access is excluded from this definition.

## Trend

Year	Number of offenses	Rate per 100,000 inhabitants
2002	1,246,646	432.9
2003	1,260,471	433.4
Percent change	+1.1	+0.1

## National Volume, Trends, and Rates

In 2003, there were an estimated 1,260,471 motor vehicle thefts in the United States. This number represented a 1.1-percent increase in volume when compared to the 2002 estimate and a 9.4-percent increase over the 1999 estimate. The estimated number of motor vehicle thefts in 2003 was a decrease of 18.1 percent when compared to the 1994 estimate. (See Table 1, national estimates.)

The rate of motor vehicle thefts in the Nation in 2003 was an estimated 433.4 offenses per 100,000 inhabitants, which represented virtually no change (+0.1 percent) over the 2002 rate. The estimated rate of motor vehicle thefts per 100,000 inhabitants increased 2.6 percent when compared to the 1999 rate but decreased 26.7 percent from the 1994 rate. (See Table 1.)

Figure 2.15

Motor Vehicle Theft  
Percent Change from 1999

## Regional Offense Trends and Rates

As shown in Appendix III, the UCR Program divides the Nation into four regions: the Northeast, the Midwest, the South, and the West. An examination of motor vehicle theft data by region indicated the following:

### The Northeast

The Northeast Region, which comprised 18.7 percent of the Nation's population, accounted for an estimated 12.5 percent of all motor vehicle thefts. (See Table 3, regional estimates.) The 2003 estimate was a 3.0-percent decrease from the 2002 estimate. In 2003, the rate of stolen vehicles in the Northeast was an estimated 290.7 offenses per 100,000 inhabitants, a 3.5-percent decrease from the previous year's estimate. (See Table 4, regional, divisional, state estimates.)

### The Midwest

In 2003, 22.5 percent of the U.S. population resided in the Midwest. The region accounted for an estimated 18.5 percent of all motor vehicle thefts in the Nation. (See Table 3, regional estimates.) The estimated number of motor vehicle thefts in the region showed a slight decline, 0.3 percent, from the previous year's estimate. The Midwest had an estimated rate of 356.9 motor vehicle thefts per 100,000 inhabitants, which was a 0.7-percent decline from the 2002 estimate. (See Table 4, regional, divisional, state estimates.)

### The South

The Nation's most populous region, the South, accounted for 35.9 percent of the Nation's inhabitants and had an estimated 34.5 percent of the Nation's motor vehicle thefts. (See Table 3,

regional estimates.) The 2003 estimate of motor vehicle thefts in the region was a 0.9-percent decrease from the 2002 estimate. In 2003, the region had a rate of 416.1 motor vehicle thefts per 100,000 in population, which was a 2.2-percent decrease from the 2002 estimated rate. (See Table 4, regional, divisional, state estimates.)

### The West

The Western Region, with 22.9 percent of the Nation's population, had an estimated 34.4 percent of the motor vehicle theft offenses. (See Table 3, regional estimates.) The West was the only region with an increase in the estimated number of motor vehicle thefts, 5.7 percent over the 2002 estimate. The region had the highest estimated rate, 652.8 motor vehicle thefts per 100,000 inhabitants, among the regions and the only increase, 4.2 percent, in the estimate from 2002 to 2003. (See Table 4, regional, divisional, state estimates.)

information about population groups is located in Appendix III.) In 2003, the Nation's cities collectively had a 0.5-percent increase in the number of motor vehicle thefts reported. Among city groups, those with populations of 100,000 to 249,999 inhabitants had the largest year-to-year increase in motor vehicle thefts, 3.7 percent, from the previous year's total. Those agencies in cities with populations of 250,000 and over, collectively, had the only decrease in motor vehicle thefts, 1.2 percent lower than the 2002 total. (See Table 12.)

Both metropolitan and nonmetropolitan counties had increases in the number of motor vehicle theft offenses when comparing 2002 to 2003 data—a 4.0-percent increase in metropolitan counties and a 2.3-percent increase in nonmetropolitan counties. (See Table 12.)

Cities overall had a rate of 561.6 motor vehicle thefts per 100,000 inhabitants in 2003. The Nation's largest cities, cities with populations of 250,000 and over, had the highest rate among city population groups at 910.9, and the Nation's smallest cities, those with fewer than 10,000 inhabitants, had the lowest rate among the city groups at 230.0 motor vehicle thefts per 100,000 in population. Metropolitan counties had a rate of 323.5 motor vehicle theft offenses per 100,000 inhabitants. In nonmetropolitan counties, the rate was 139.5. (See Table 16.)

**Table 2.28**

**Motor Vehicle Theft by Month**  
Percent Distribution, 1999-2003

Month	1999	2000	2001	2002	2003

Midwest	100.0	76.9	15.1	8.1
South	100.0	68.0	21.2	10.8
West	100.0	72.3	21.2	6.5

<sup>1</sup> Because of rounding, the percentages may not add to 100.0.

### Community Types

The UCR Program defines three community types: Metropolitan Statistical Areas (MSAs), cities outside metropolitan areas, and nonmetropolitan counties. Additional information regarding community types is presented in Appendix III.

In 2003, the estimated motor vehicle theft rate per 100,000 inhabitants was 491.0 in MSAs, 199.5 in cities outside MSAs, and 128.6 in nonmetropolitan counties. (See Table 2, community type estimates.)

### Population Groups: Trends and Rates

In the UCR Program, cities are grouped according to population size and counties are classified as either metropolitan or nonmetropolitan. (Additional

### Offense Analysis

In 2003, automobiles were stolen at a rate of 341.9 cars per 100,000 inhabitants. Trucks and buses (commercial vehicles) were stolen at a rate of 86.2 vehicles per 100,000 in population. Other types of vehicles were stolen at a rate of 38.3 vehicles per 100,000 people. (See Table 19.)

In the Nation, 73.3 percent of stolen vehicles were automobiles. In the Northeast, 88.8 percent of the vehicles stolen were automobiles. In the Midwest, 76.9 percent of the vehicles stolen were automobiles, in the West, 72.3 percent, and in the South, 68.0 percent of the motor vehicles reported stolen were automobiles. (See Table 2.29.)

The average value of motor vehicles reported stolen in 2003 was \$6,797. The estimated total value of all motor vehicles reported stolen in 2003 was \$8.6 billion. (Based on Tables 1 and 23.)

### **Clearances**

The UCR Program considers an offense to be cleared by arrest or solved when at least one person is arrested, charged with the commission of the offense, and turned over to the court for prosecution. A clearance by exceptional means can be recorded when the offender has been identified and located and there is enough evidence to support an arrest, but conditions beyond law enforcement's control prevent an agency from bringing charges. (More information about clearances is available in Section III of this publication.)

Law enforcement agencies cleared 13.1 percent of reported motor vehicle thefts by arrest or exceptional means in 2003. In the Nation's cities overall, law enforcement cleared 12.3 percent of motor vehicle thefts. Of all the city population groupings, the Nation's smallest cities, those with populations under 10,000 persons, had the highest percentage of clearances, 24.2 percent; the Nation's largest cities, those with 250,000 or more inhabitants, had the lowest percentage of clearances, 10.1 percent. Law enforcement in nonmetro-

politan counties cleared 27.1 percent of motor vehicle thefts by arrest or exceptional means, and those in metropolitan counties cleared 14.7 percent. (See Table 25.)

By region, law enforcement agencies in the South had the highest clearance rate, 14.9 percent. Agencies in the Midwest cleared 14.6 percent of the motor vehicle theft offenses reported in that region and those in the Northeast cleared 14.4 percent. The West's law enforcement agencies cleared 10.4 percent of the motor vehicle thefts brought to their attention. (See Table 26.)

### **Clearances and Juveniles**

The UCR Program also considers an incident cleared by arrest if an offender under the age of 18 is physically arrested or if the individual is cited to appear before juvenile authorities. According to UCR guidelines, any clearance that involves both adult and juvenile offenders is listed as an adult clearance. Clearances involving only juveniles (those under age 18) accounted for 17.3 percent of all reported motor vehicle theft clearances. In cities overall, 17.8 percent of motor vehicle theft clearances involved only juveniles. Among the city population groups, those cities with populations of 250,000 and over inhabitants had the highest percentage of clearances involving only juveniles at 18.9 percent. Cities with populations of 100,000 to 249,999 had the lowest percentage of clearances involving juveniles at 15.7 percent. Law enforcement officials in nonmetropolitan counties reported 17.6 percent of clearances involving only juveniles; metropolitan county law enforcement agencies reported 15.3 percent of motor vehicle theft clearances involving only juveniles. (See Table 28.)

### **Arrests**

In 2003, there were an estimated 152,934 arrests for motor vehicle theft in the United States. (See Table 29.) Table 29 provides estimated arrest data for the Nation, however, the remaining tables in Section IV of this publication furnish actual arrest totals based on agencies that submitted 12 months of arrest data to the UCR Program.

Two- and 5-year trend data showed that the number of motor vehicle theft arrests in the Nation was 0.8 percent higher than in 2002 and 5.5 percent higher than the number of motor vehicle theft arrests in 1999. However, the 10-year trend data showed the number of motor vehicle theft arrests during 2003 was 26.5 percent lower than for 1994. (See Tables 32, 34, and 36.)

In the Nation, the rate of motor vehicle theft arrests was 52.1 per 100,000 inhabitants. Among the four geographic regions, the West had the highest arrest rate for motor vehicle theft at 77.3 per 100,000 inhabitants, followed by the Midwest, 52.1; the South, 41.2; and the Northeast, 31.4. (See Table 30.)

In cities overall, law enforcement reported a rate of 59.3 motor vehicle thefts per 100,000 persons. By city population groups, the Nation's largest cities, those with 250,000 inhabitants or greater, had the highest arrest rate for motor vehicle theft at 111.5 per 100,000 in population. Cities with populations of 10,000 to 24,999 had the lowest arrest rate for motor vehicle theft at 32.4 per 100,000 in population. Law enforcement agencies in metropolitan counties reported a motor vehicle theft arrest rate of 39.5 per 100,000 inhabitants; nonmetropolitan law enforcement agencies reported a rate of 29.5. (See Table 31.)

By age, 62.3 percent of those persons arrested for motor vehicle thefts in 2003 were under the age of 25, and 29.1 percent were under the age of 18. Adults comprised 70.9 percent of motor vehicle theft arrestees. (See Tables 38 and 41.)

In 2003, 83.4 percent of arrestees for motor vehicle theft were male. Arrests of male juveniles decreased 3.3 percent from the 2002 number. Arrests of females increased 1.9 percent from 2002 to 2003; however, arrests of female juveniles

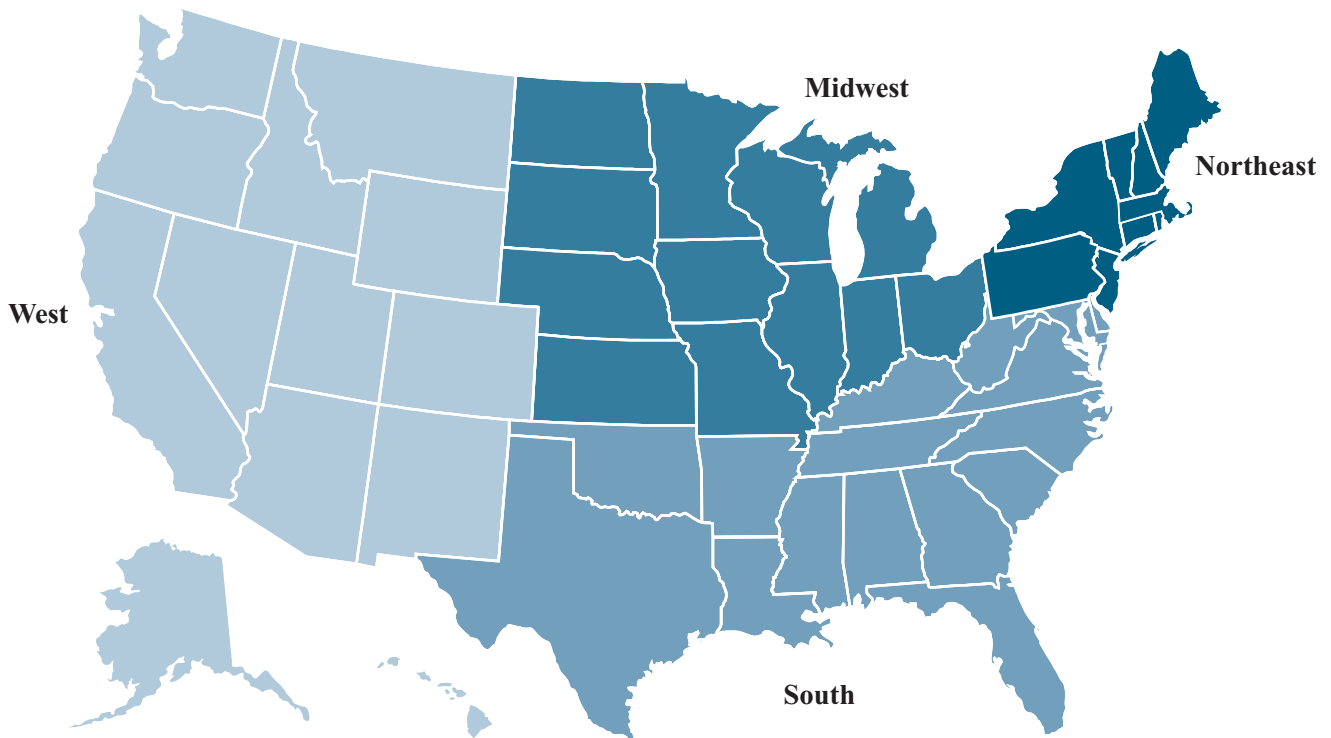

from 2002 to 2003 declined 5.3 percent. (See Tables 37 and 42.)

By race, 61.3 percent of arrestees for motor vehicle theft were white, 35.9 percent were black, and the remainder were of other races. Whites accounted for 56.1 percent of juveniles arrested for motor vehicle theft, and blacks comprised 40.3 percent of juveniles arrested for motor vehicle theft. (See Table 43.)

**Figure 2.16**

**Regional Crime Rates 2003**

Violent and Property Crimes per 100,000 Inhabitants

# Arson

## Definition

The Uniform Crime Reporting (UCR) Program defines arson as any willful or malicious burning or attempt to burn, with or without intent to defraud, a dwelling house, public building, motor vehicle or aircraft, personal property of another, etc.

## Offense Methodology

According to the UCR Program's data collection guidelines, only fires determined through investigation to have been willfully or maliciously set are classified as arsons. Fires of suspicious or unknown origins are excluded from this classification.

Due to the limited reporting of arson offenses by law enforcement, certain UCR data presentations are not possible. Because the UCR Program does not estimate for arson offenses, it does not include them in Tables 1-7, which all contain offense estimations. The UCR Program does, however, present the total

number of arsons reported by individual law enforcement agencies in Tables 8-11 in this report. Though arson is not included in national rate calculations, the UCR Program computes arson rates separately (based on the data of those agencies for which 12 months of complete data were submitted) and publishes them in Table 2.30. Tables 12-15 in this report provide 2-year arson trend data. Clearance data for arson are published in Table 2.31 and Tables 25-28. Additional information regarding the specific composition of each table is provided in the Table Methodology section of Appendix I.

## National Coverage

In 2003, 12,776 law enforcement agencies provided to the UCR Program 1 to 12 months of arson data, which included 71,319 offenses. Of the 12,776 agencies, 12,738 submitted additional information (such as the structure type and the estimated value of property damage) for 64,043 arsons. (See Table 2.31.) Of those agencies submitting supplemental information, 9,790 agencies covering 72.0 percent of the population provided 12 months of complete data. (See Table 2.30.)

## Population Groups: Trends and Rates

### Trends

The UCR Program aggregates data by various population groups, which include cities, metropolitan counties, and

nonmetropolitan counties. (See Appendix III.) A comparison of 2003 data to those from 2002 showed that the number of arson offenses was down 6.3 percent nationwide. The 2-year trend also showed that cities, collectively, experienced a 6.8-percent decline in the number of arsons within their boundaries. Among the population groups labeled city, the Nation's smallest cities, those with 10,000 or fewer inhabitants, had the most significant decrease, 11.8 percent, in their arson offenses. The largest cities, those with 250,000 or more inhabitants, had a 9.1-percent decline in their arson offenses from 2002 to 2003. Law enforcement agencies in metropolitan counties recorded a 6.1-percent decline in the number of arsons from the 2002 level, and nonmetropolitan county law enforcement agencies recorded a 0.6-percent decrease in their number of reported arsons. (See Table 12.)

### Rates

Based on 12 months of complete data, 9,790 law enforcement agencies in the Nation measured arson at a rate of 30.4 offenses per 100,000 in population in 2003. Collectively, cities had a rate of 33.6 arsons per 100,000 inhabitants. Among city population groupings, the country's largest cities, those with populations of 250,000 and over, experienced the greatest frequency in reported arson offenses at 52.8 offenses per 100,000 persons. Arson offenses occurred in metropolitan counties at a rate of 25.8 offenses per 100,000 inhabitants, and

**Table 2.30**

### Arson Rate

by Population Group, 2003

[9,790 agencies; 2003 estimated population 209,483,192; rate per 100,000 inhabitants]

Population group	Rate
<b>Total</b>	<b>30.4</b>
Total cities	33.6
Group I (cities 250,000 and over)	52.8
(cities 1,000,000 and over)	48.8
(cities 500,000 to 999,999)	52.7
(cities 250,000 to 499,999)	58.1
Group II (cities 100,000 to 249,999)	34.5
Group III (cities 50,000 to 99,999)	28.0
Group IV (cities 25,000 to 49,999)	23.4
Group V (cities 10,000 to 24,999)	20.4
Group VI (cities under 10,000)	22.3
Metropolitan counties	25.8
Nonmetropolitan counties	17.7
Suburban area <sup>1</sup>	23.4

<sup>1</sup> Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

they happened in nonmetropolitan counties at a rate of 17.7 arsons per 100,000 in population. (See Table 2.30.)

### Offense Analysis

Supplemental arson data submitted by law enforcement agencies throughout the country revealed the following information about the types of fires reported and the resulting monetary losses.

#### Type

The UCR Program collects arson data according to the type of property burned: structure (residential, commercial, industrial, etc.), mobile (motor vehicles, trailers, etc.), and other (crops, timber, etc.). (See Table 2.31.)

In 2003, structural arson accounted for 42.1 percent of reported arson. Among these types of fires, residential properties were the target in 61.0 percent of the offenses. Of residential property targets, 73.3 percent were single-occupancy dwellings. Nearly 19 percent

(18.5) of all structure arsons were abandoned or unused properties at the time of the fire. Mobile property arson made up 33.3 percent of the total arson reported in 2003. The majority of mobile property arson, 95.2 percent, was of motor vehicles. Other types of property comprised the remaining 24.6 percent of properties targeted by arsonists. (See Table 2.31.)

A comparison of arson property data for 2002 and 2003 showed that the number of structural arsons declined 3.9 percent, and arson incidents involving mobile property decreased 6.8 percent. Arsons of other types of property in 2003 also decreased, down 7.3 percent from the 2002 number. (See Table 15.)

#### Dollar Loss

The average dollar loss for property damaged or destroyed by arson in 2003 was \$11,942 per offense. Overall, structural losses averaged \$21,276. Arsons of industrial and manufacturing structures resulted in the highest average dollar

loss during 2003, \$136,644 per offense. Residential structure losses averaged \$19,062 for single-occupancy dwellings, and losses in other residential-type dwellings averaged \$23,977 per offense. Mobile property losses averaged \$6,381 per arson offense, and other property types, averaged losses of \$3,467. (See Table 2.31.)

### Clearances

In the UCR Program, law enforcement clears offenses when an officer arrests an offender or when elements beyond the control of law enforcement prevent the placing of formal charges against the offender, i.e., exceptional means. (Section III provides more information regarding clearances.)

In 2003, law enforcement cleared 16.7 percent of the arson offenses reported in the United States. With the highest clearance percentage among the Nation's regions, law enforcement in the Northeast cleared 20.7 percent of report-

ed arson. Law enforcement agencies in the Midwest cleared 16.1 percent, and those in the South cleared 18.9 percent. The percentage of arson offenses cleared in the West was 13.5 percent. (See Table 26.)

Data aggregations by population group showed that law enforcement agencies in cities, collectively, cleared 16.5 percent of arson offenses reported within their jurisdictions. Among city population groupings, agencies in the Nation's smallest cities, those with populations of 10,000 and under, cleared 27.6 percent of their reported arson offenses; this was the highest percentage of clearances for arson among cities, as well as for all population groups. Law enforcement agencies serving the Nation's largest cities, those with populations of 250,000 and over, cleared 10.9 percent of reported arson, the lowest clearance percentage among city population groups. Law enforcement in metropolitan counties throughout the Nation cleared 16.0 percent of reported arson offenses, and nonmetropolitan county law enforcement cleared 23.5 percent of the reported arson during 2003. (See Table 25.)

Based on supplemental arson data for 2003 (from 12,738 agencies regarding structural property and mobile property arson), law enforcement cleared 22.0 percent of structural property arson nationwide. Additionally, agencies cleared 6.9 percent of mobile property arson. (See Table 2.31.)

An analysis of clearances by population group further revealed that law enforcement agencies in cities with populations under 10,000 cleared the highest percentages of reported structural and mobile property arson offenses during 2003. These agencies cleared 31.6 percent of structural property arson and 17.8 percent of mobile property ar-

son. Cities with populations of 10,000 to 24,999 cleared the greatest proportion of arson offenses for other property types of arson, 28.4 percent. (See Table 27.)

### *Clearances and Juveniles*

The UCR Program lists any clearance involving both adults (those aged 18 and over) and juveniles (persons under age 18) as an adult clearance. In addition, if an offender under the age of 18 is cited to appear before juvenile authorities, the UCR Program considers that incident as cleared by arrest even though a physical arrest may not have occurred.

Clearances involving only juveniles comprised 41.3 percent of total arsons cleared nationwide during 2003. Of all offenses collected by the UCR Program, arson was the offense with the greatest degree of juvenile involvement. Clearances involving only juvenile offenders accounted for 44.2 percent of all arsons clearances in cities collectively. In the Nation's largest cities, those with populations of 250,000 and greater, clearances involving juveniles only comprised 38.7 percent of all arson clearances. Clearances of offenders under the age of 18 accounted for approximately 48.0 percent of the arson clearances in cities with populations of 24,999 inhabitants or less. In the country's metropolitan and nonmetropolitan counties, clearances involving juveniles only comprised 37.1 percent and 24.6 percent, respectively, of the total number of arsons cleared. (See Table 28.)

An examination of clearance data for the different types of arson showed that clearances involving juveniles only accounted for 40.2 percent of the clearances that involved structure arson. Of these, 73.4 percent of the clearances for community/public structure arson involved juveniles only. Clearances involving mobile property arsons had the

least juvenile-only involvement, 21.2 percent. (See Table 2.31.)

## **Arrests**

### *Total Arrests and Rates*

In 2003 law enforcement personnel arrested an estimated 16,163 people for committing arson offenses. (See Table 29.) Based on the 9,790 agencies that submitted 12 months of complete arrest data for arson, the national arrest rate for the offense was 5.6 arrests per 100,000 inhabitants. Among the Nation's geographic regions, the West had the highest arson arrest rate, 5.8 arrests per 100,000 persons. Law enforcement agencies in the South made 5.6 arson arrests per 100,000 persons, and the Midwest and the Northeast arrested 5.5 and 5.1 persons per 100,000, respectively. (See Table 30.)

By population group, law enforcement in the Nation's cities made 5.8 arson arrests for every 100,000 inhabitants. Within city population groupings, those with 10,000 or fewer inhabitants had the highest arson arrest rate, 7.0. Law enforcement agencies in metropolitan counties arrested 5.4 persons for arson per 100,000 population, and those in nonmetropolitan counties arrested 4.6 arson suspects per every 100,000 in population. (See Table 31.)

### *Arrest Trends*

Nationwide, the number of arrests for arson in 2003 declined 5.8 percent from the number of arrests recorded for 2002. Arrests of adults for arson decreased 8.3 percent, and arrests of juveniles declined 3.5 percent from the previous year's number. (See Table 36.) By gender, the number of males arrested for arson was down 6.1 percent from the 2002 figure, and the number of females arrested for arson decreased 4.1 percent. (See Table 37.)

Five-year arrest trends for the Nation showed that the number of arson arrests for 2003 declined 7.9 percent when compared to 1999 arrest data. Law enforcement agencies reported a 3.6-percent decrease in the number of adults arrested for arson and an 11.6-percent drop in the number of juveniles arrested for arson for the period. (See Table 34.) Overall, the number of males and the number of females arrested for arson declined 8.6 percent and 3.6 percent, respectively. (See Table 35.)

A 10-year comparison of arson arrest data indicated that there were 28.5 percent fewer arson arrests in 2003 than in 1994. According to trend data for those years, the number of adults arrested for arson was down 17.7 percent, and the number of juveniles arrested for the offense decreased 36.2 percent. (See Table 32.) By sex, there were 29.3 percent

fewer arrests of males for arson in 2003 than in 1994. Arrests of females for the offense also declined by 23.7 percent for the same years. (See Table 33.)

#### ***Distribution by Age, Sex, and Race***

Data regarding the age, sex, and race of persons arrested for arson in 2003 indicated that juveniles accounted for 50.8 percent of all arrestees for arson; 31.2 percent of all arson arrestees were juveniles under the age of 15. (See Table 41.) Males comprised 84.4 percent of the total of arson arrestees. (See Table 42.) By race, 77.5 percent of all individuals arrested for arson were reported as being white, 20.9 percent of arson arrestees were black, and 1.6 percent were persons of other races. (See Table 43.)

# Hate Crime

## Definition

A hate crime, also known as a bias crime, is a criminal offense committed against a person, property, or society that is motivated, in whole or in part, by the offender's bias against a race, religion, disability, sexual orientation, or ethnicity/national origin.

## Background

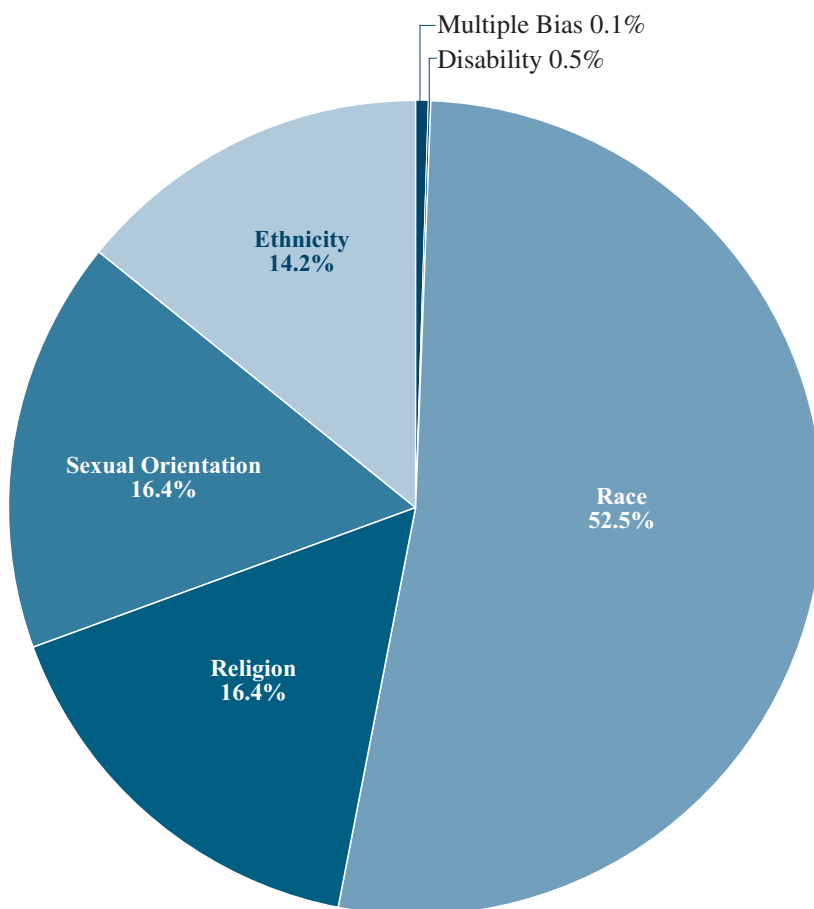

In response to mounting national concern over crimes motivated by bias, Congress enacted on April 23, 1990, the Hate Crime Statistics Act of 1990. This law required the Attorney General to collect data "about crimes that manifest evidence of prejudice based on race, religion, sexual orientation, or ethnicity." The Attorney General

delegated the responsibilities of developing the procedures for implementing, collecting, and managing hate crime data to the Director of the FBI, who in turn assigned the tasks to the Uniform Crime Reporting (UCR) Program. In September 1994, Congress passed the Violent Crime Control and Law Enforcement Act, which amended the Hate Crime Statistics Act to include both physical and mental disabilities as potential bias factors, and collection of this data began in January 1997. Lastly, the Church Arson Prevention Act of 1996 mandated that hate crime data collection become a permanent part of the UCR Program.

Those who developed the guidelines for hate crime data collection recognized that hate crimes are not separate, distinct crimes; instead, they are traditional offenses motivated by the offender's bias. After much consideration, the developers decided that hate crime data could be derived by capturing the additional element of bias in those offenses already being reported to the UCR Program. Attaching the collection of hate crime statistics to the established UCR data collection procedures, they concluded, would fulfill the directives of the Hate Crime Statistics Act without placing an undue additional reporting burden on law enforcement and, in time, would develop a substantial body of data about the nature and frequency of bias crimes occurring throughout the Nation. As a result, the law enforcement agencies that participate in the national

Anti-Physical	24	30	32	24
Anti-Mental	9	10	11	11
Multiple-Bias Incidents <sup>3</sup>	4	9	9	7

<sup>1</sup>The term *victim* may refer to a person, business, institution, or society as a whole.

<sup>2</sup>The term *known offender* does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified, which distinguishes him/her from an unknown offender.

<sup>3</sup>A multiple-bias incident occurs only when two or more offense types are committed in a single incident. In a situation where there is more than one offense type, the agency can indicate a different bias motivation for each offense type. In the case of a single offense type, only one bias motivation can be indicated.

**Table 2.33****Incidents, Offenses, Victims, and Known Offenders  
by Offense Type, 2003**

Other <sup>4</sup>	28	28	37	29
Crimes against society <sup>4</sup>	59	59	59	92

<sup>1</sup>The actual number of incidents is 7,489. However, the column figures will not add to the total because incidents may include more than one offense type, and these are counted in each appropriate offense type category.

<sup>2</sup>The term *victim* may refer to a person, business, institution, or society as a whole.

<sup>3</sup>The term *known offender* does not imply that the identity of the suspect is known, but only that an attribute of the suspect is identified, which distinguishes him/her from an unknown offender. The actual number of known offenders is 6,934. However, the column figures will not add to the total because some offenders are responsible for more than one offense type, and they are, therefore, counted more than once in this table.

<sup>4</sup>Includes additional offenses collected in NIBRS.

hate crime program collect details about an offender's bias motivation associated with the following offense types: murder and nonnegligent manslaughter, forcible rape, aggravated assault, simple assault, intimidation, robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism of property. (The law enforcement agencies participating in the UCR Program's National Incident-Based Reporting System also collect additional offenses for crimes against persons and crimes against property, which the Program publishes as "Other." In addition, these agencies collect hate crime data for another category called "Crimes Against Society.")

An abstract based on the information received from law enforcement agencies that provided 1 to 12 months of hate crime reports during 2003 follows.

**Participation**

A total of 11,909 law enforcement agencies participated in the hate crime program during 2003, a 1.4 percent decrease from the 12,073 agencies that participated in 2002. Of the agencies that participated in 2003, 1,967 (16.5 percent) reported 7,489 hate crime incidents to the FBI. (See Table 2.35.) The number of incidents reported to the FBI in 2003 was 27 more than the number reported during 2002.

**Law Enforcement Reports**

The UCR Program data collection guidelines stipulate that a hate crime may involve multiple offenses, victims, and offenders within one incident. Accordingly, the 7,489 hate crime incidents reported to the FBI in 2003 involved 8,715 separate offenses, 9,100 victims,

and 6,934 known offenders. (See Table 2.32.) (The term *known offender* does not imply that the identity of the suspect is known but only that an attribute of the suspect has been identified, distinguishing him or her from an unknown offender.)

### Incidents

Of the 7,485 single-bias incidents reported in 2003, 51.4 percent were motivated by racial bias, 17.9 percent were driven by prejudice against a particular religion, 16.6 percent involved a sexual-orientation bias, 13.7 percent resulted from a bias against an ethnicity or national origin, and 0.4 percent of the incidents were motivated by a disability bias. (Based on Table 2.32.)

In addition to single-bias incidents, hate crime data collection guidelines permit the identification of multiple-bias incidents. These are incidents in which two or more types of offenses were committed as a result of two or more bias motivations. Four of the 7,489 incidents reported in 2003 met that criterion. (See Table 2.32.)

### Offenses

According to the UCR definition, a victim of an offense motivated by a bias may be a person, a business, an institution, or society as a whole. When aggregating the number of hate crime offenses committed against individuals, the UCR Program counts one offense for each victim. The offense types of murder, forcible rape, aggravated assault, simple assault, and intimidation are crimes against persons. When counting crimes against property, the UCR Program allots one offense for each distinct incident regardless of the number of victims. Robbery, burglary, larceny-theft, motor vehicle theft, arson, and destruction/damage/vandalism comprise the offense types that the Program considers to be crimes against property.

During 2003, a total of 5,517 (63.3 percent) reported hate crime offenses were crimes against persons, and 3,139 (36.0 percent) were crimes against property. Fifty-nine crimes against society (0.7 percent) were reported in 2003. Intimidation continued to be the most frequently reported hate crime and accounted for 49.7 percent of all crimes against persons and 31.5 percent of all hate crime offenses. Destruction/damage/vandalism of property was the

Wisconsin	16	1,337,978	16	31
Wyoming	36	294,947	4	12

most frequently reported crime against property in 2003, comprising 83.4 percent of those offenses. Additionally, destruction/damage/vandalism accounted for 30.0 of all hate crime offenses. (Based on Table 2.33.)

### ***Victims***

A total of 9,100 individuals, businesses, institutions, or society as a whole were victims of hate crimes in 2003. Approximately 52.3 percent of all single-bias hate crime victims were targets of racial prejudice. Of these victims, 66.3 percent were attacked because of an anti-black bias motivation, and 21.2 percent were attacked because of an anti-white bias motivation. Of the total victims of single-bias hate crimes, 16.4 were targets because of the offender's

bias toward a particular religion. Of these, 68.8 percent were targeted because of an anti-Jewish bias motivation, and 11.5 percent were victims of anti-Islamic bias. Additionally, 16.3 percent of total single-bias hate crime victims were attacked because of the offender's prejudice against sexual-orientation; among these victims, 61.5 percent were victims of an anti-male homosexual bias motivation. Approximately 14.6 percent of hate crime victims in single-bias incidents were targets of a bias against ethnicity or national origin. Of these, 44.9 percent were victims of anti-Hispanic sentiment. Of the victims of single-bias motivations, 43 victims were attacked because of the offenders' biases against a disability. Nine victims were attacked

in 2003 as a result of their attackers' multiple biases. (Based on Table 2.32.)

### ***Offenders***

In 2003, there were 6,934 known offenders who committed crimes motivated by their perceived biases. The majority of these known hate crime offenders, 62.3 percent, were white; 18.5 percent were black; 6.3 were identified as groups of offenders with individuals of more than one race; and 2.2 percent of known offenders were of other races. The races of 10.7 percent of offenders were not determined. (Based on Table 2.34.) More detailed information concerning the characteristics of hate crime can be found in the UCR Program's annual publication *Hate Crime Statistics*.

# Offense Tabulations

The tables in Section II—Offenses Reported—organize crime data in many ways. First, the data are categorized for the Nation as a whole, then by geographic divisions; individual states; Metropolitan Statistical Areas (MSAs); and cities, towns, and counties. The data are presented as crime volume and/or crime rate (occurrence per 100,000 U.S. inhabitants).

The exact number of crimes occurring within the United States is unknown. The UCR Program estimates the level of criminal activity based upon the number of offenses that are known to law enforcement and, using these estimates, computes crime rates for each 100,000 population segment. The Program uses current, permanent population counts in computing crimes rates. The reader should be aware that all communities are affected to some degree by seasonal or transient population changes, and the Program's crime rates do not account for these short-term variations. In addition, the reader should remember that many factors influence the amount and type of crime occurring from place to place, and shifting variables may cause crime to vary from time to time within the same place. Other factors contributing to the level of crime in a given area are discussed in Crime Factors (page v).

One tool that law enforcement administrators can use in analyzing the volume of local crime and the performance of the law enforcement agencies is national data. That analysis, however, should not end with a comparison based solely on data presented in this publica-

tion. A true assessment of a community's crime problem or the effectiveness of law enforcement operations can be made only by including all the factors that shape local crime.

## Brief Description of the Tables

An in-depth discussion of table construction methodology can be found in Appendix I. The following summarizes the contents of the tables contained in Section II—Offenses Reported.

Table 1 is a 20-year table that sets forth national estimates of volume and rate per 100,000 inhabitants for the Part I offenses. Table 2 shows estimates of crime volume and rates for 2003 for the Nation as a whole and for the Nation disaggregated by community type: MSAs, nonmetropolitan counties, and cities and towns outside metropolitan areas. Definitions of these community types can be found in Appendix III.

Data showing the regional distribution of estimated Part I crimes along with proportional population estimates are provided in Table 3. A map of the United States illustrating the regions and divisions employed by the UCR Program appears in Appendix III.

Table 4 offers a 2-year trend in the volume and rate estimates by region, geographic division, and state. The estimated volume and rate of Part I offenses for each state by community type is shown in Table 5, and for individual MSAs in Table 6. Table 7 provides breakdowns for the offenses of robbery (by location), burglary (by time of day), and larceny-theft (by type) over the past 5 years.

Offenses known to police for cities over 10,000 in population are presented in Table 8, and Table 9 shows the number of offenses occurring on college and university campuses as reported to the UCR Program by college and university law enforcement agencies. The UCR Program does not assign population to educational institutions, but does provide student enrollment information when available.

Offenses reported by metropolitan and nonmetropolitan county law enforcement agencies are presented in Table 10. Table 11 provides offenses reported by state law enforcement agencies, including state police, and federal agencies. Tables 12–19 supply crime trends for volumes and rates by population groupings. The UCR Program's definition of the population groups can be found in Appendix III.

Data concerning weapons used in the violent crimes of murder, robbery, and aggravated assault are presented in Tables 20–22. Tables 23 and 24 provide an analysis of the value of property lost through the crimes of robbery, burglary, motor vehicle theft, and larceny-theft, and offer breakdowns by type and value of property stolen and recovered.

## Note

*Because the UCR Program does not estimate for arson, arson offenses are not included in the tables containing offense estimates. However, arson offenses reported by individual law enforcement agencies are displayed in Tables 8–11. Two-year arson trends are shown in Tables 12–15.*

<sup>1</sup> Populations are U.S. Census Bureau provisional estimates as of July 1 for each year except 1990 and 2000 which are decennial census counts.

<sup>2</sup> The murder and nonnegligent homicides that occurred as a result of the events of September 11, 2001, are not included in this table.

<sup>3</sup> The 2002 crime figures have been adjusted.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<sup>1</sup> Populations are U.S. Census Bureau provisional estimates as of July 1, 2003, and July 1, 2002.<sup>2</sup> The 2002 crime figures have been adjusted.<sup>3</sup> Limited data for 2003 were available for Illinois and Kentucky. See Offense Estimation, Appendix I, for details.<sup>4</sup> Includes offenses reported by the Zoological Police and the Metro Transit Police.

\* Less than one-tenth of 1 percent.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

<b>Yauco, Puerto Rico M.S.A.</b>	<b>120,750</b>									
(Includes Guanica, Guayanilla, Penuelas, and Yauco Municipios.)										
Total area actually reporting	100.0%	253	10	11	145	87	1,495	598	815	82
Rate per 100,000 inhabitants		209.5	8.3	9.1	120.1	72.0	1,238.1	495.2	674.9	67.9

<sup>1</sup> Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

<sup>2</sup> The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.

NOTE: Although arson data are included in the trend and clearance tables, sufficient data are not available to estimate totals for this offense.

Due to rounding, the estimated totals of the individual Metropolitan Divisions may not add to the estimated totals of their Metropolitan Statistical Area.

<sup>1</sup> If the FBI does not receive 12 months of arson data from either the agency or the state, no arson will be shown.  
<sup>2</sup> Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.  
<sup>3</sup> The population for the city of Mobile, Alabama, includes 55,864 inhabitants from the jurisdiction of the Mobile County Sheriff's Department.  
<sup>4</sup> Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape and violent crime categories.  
<sup>5</sup> Limited data for 2003 were available for Illinois and Kentucky.  
<sup>6</sup> Louisville Metro, Kentucky, is a city-county government that includes the Louisville and Jefferson County Police Departments.  
<sup>7</sup> Aggravated assault figures furnished by these agencies were not in accordance with national UCR guidelines; therefore, the figures were excluded from the aggravated assault and violent crime categories.

**Table 9**

**Offenses Known to Law Enforcement**  
by University and College, 2003—Continued

University/College by state	Student enrollment <sup>1</sup>	Violent crime	Violent crime				Property crime				
			Murder and non-negligent manslaughter	Forcible rape	Robbery	Aggravated assault	Property crime	Burglary	Larceny-theft	Motor vehicle theft	Arson <sup>2</sup>
<b>WYOMING</b>											
Sheridan College	2,729	0	0	0	0	0	12	3	9	0	0
University of Wyoming	12,366	0	0	0	0	0	222	17	203	2	0

<sup>1</sup> The student enrollment figures provided by the United States Department of Education are for the 2001 school year, the most recent available. The enrollment figures include full-time and part-time students. See Appendix I for details.

<sup>2</sup> If the FBI does not receive 12 months of arson data from either the agency or the state, no arson will be shown.

<sup>3</sup> Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

<sup>4</sup> Student enrollment figures were not available.

<sup>5</sup> Limited data for 2003 were available for Illinois and Kentucky.

NOTE: Caution should be exercised in making any intercampus comparisons or ranking schools, as university/college crime statistics are affected by a variety of factors. These include demographic characteristics of the surrounding community, ratio of male to female students, number of on-campus residents, accessibility of outside visitors, size of enrollment, etc.

<sup>1</sup>Data provided for nonmetropolitan counties are inclusive of only those counties that are 25,000 and over in population.

<sup>2</sup>If the FBI does not receive 12 months of arson data from either the agency or the state, no arson will be shown.

<sup>3</sup>Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

<sup>4</sup>Limited data for 2003 were available for Illinois and Kentucky.

NOTE: Tables 10 and 11 have been restructured. See Appendix I, Table Methodology.

National Park Service	367	8	48	65	246	3,795	468	3,192	135	89

<sup>1</sup>If the FBI does not receive 12 months of arson data from either the agency or the state, no arson will be shown.

<sup>2</sup>Limited data for 2003 were available for Illinois and Kentucky.

<sup>3</sup>Due to changes in reporting practices, annexations, and/or incomplete data, figures are not comparable to previous years' data.

<sup>4</sup>Figures reported are the number of crimes occurring in New Jersey.

<sup>5</sup>Figures reported are the number of crimes occurring in New York.

NOTE: Tables 10 and 11 have been restructured. See Appendix I, Table Methodology.

<sup>1</sup> Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were excluded from the forcible rape and violent crime categories.

<sup>2</sup> Includes state police agencies that report aggregately for the entire state.

<sup>3</sup> Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.

\*Less than one-tenth of 1 percent.

<sup>1</sup> Forcible rape figures furnished by the state Uniform Crime Reporting (UCR) Program administered by the Illinois State Police were not in accordance with national UCR guidelines; therefore, the figures were estimated for inclusion in the forcible rape and violent crime categories. See Appendix I for details.

<sup>2</sup> Includes state police agencies that report aggregately for the entire state.

<sup>3</sup> Suburban area includes law enforcement agencies in cities with less than 50,000 inhabitants and county law enforcement agencies that are within a Metropolitan Statistical Area (see Appendix III). Suburban area excludes all metropolitan agencies associated with a principal city. The agencies associated with suburban areas also appear in other groups within this table.
