

RENAULT MASTER

4th January 2024

Renault Master, a vehicle for everyone

As the undisputed reference in utility vehicles, Renault Master comes in three body height and three body lengths to adapt to the needs of all users.

With rear doors opening at 180° and a cabin area designed to provide the comfort and practicality of a 'mobile office', your work life will become even more efficient.

08. customisation

robust and high-status

Renault Master is instantly distinguished by a dynamic front-end design featuring signature C-shaped lighting. An elevated bonnet line and vertical front grille complete the revised look. Useful and stylish, your perfect work partner.

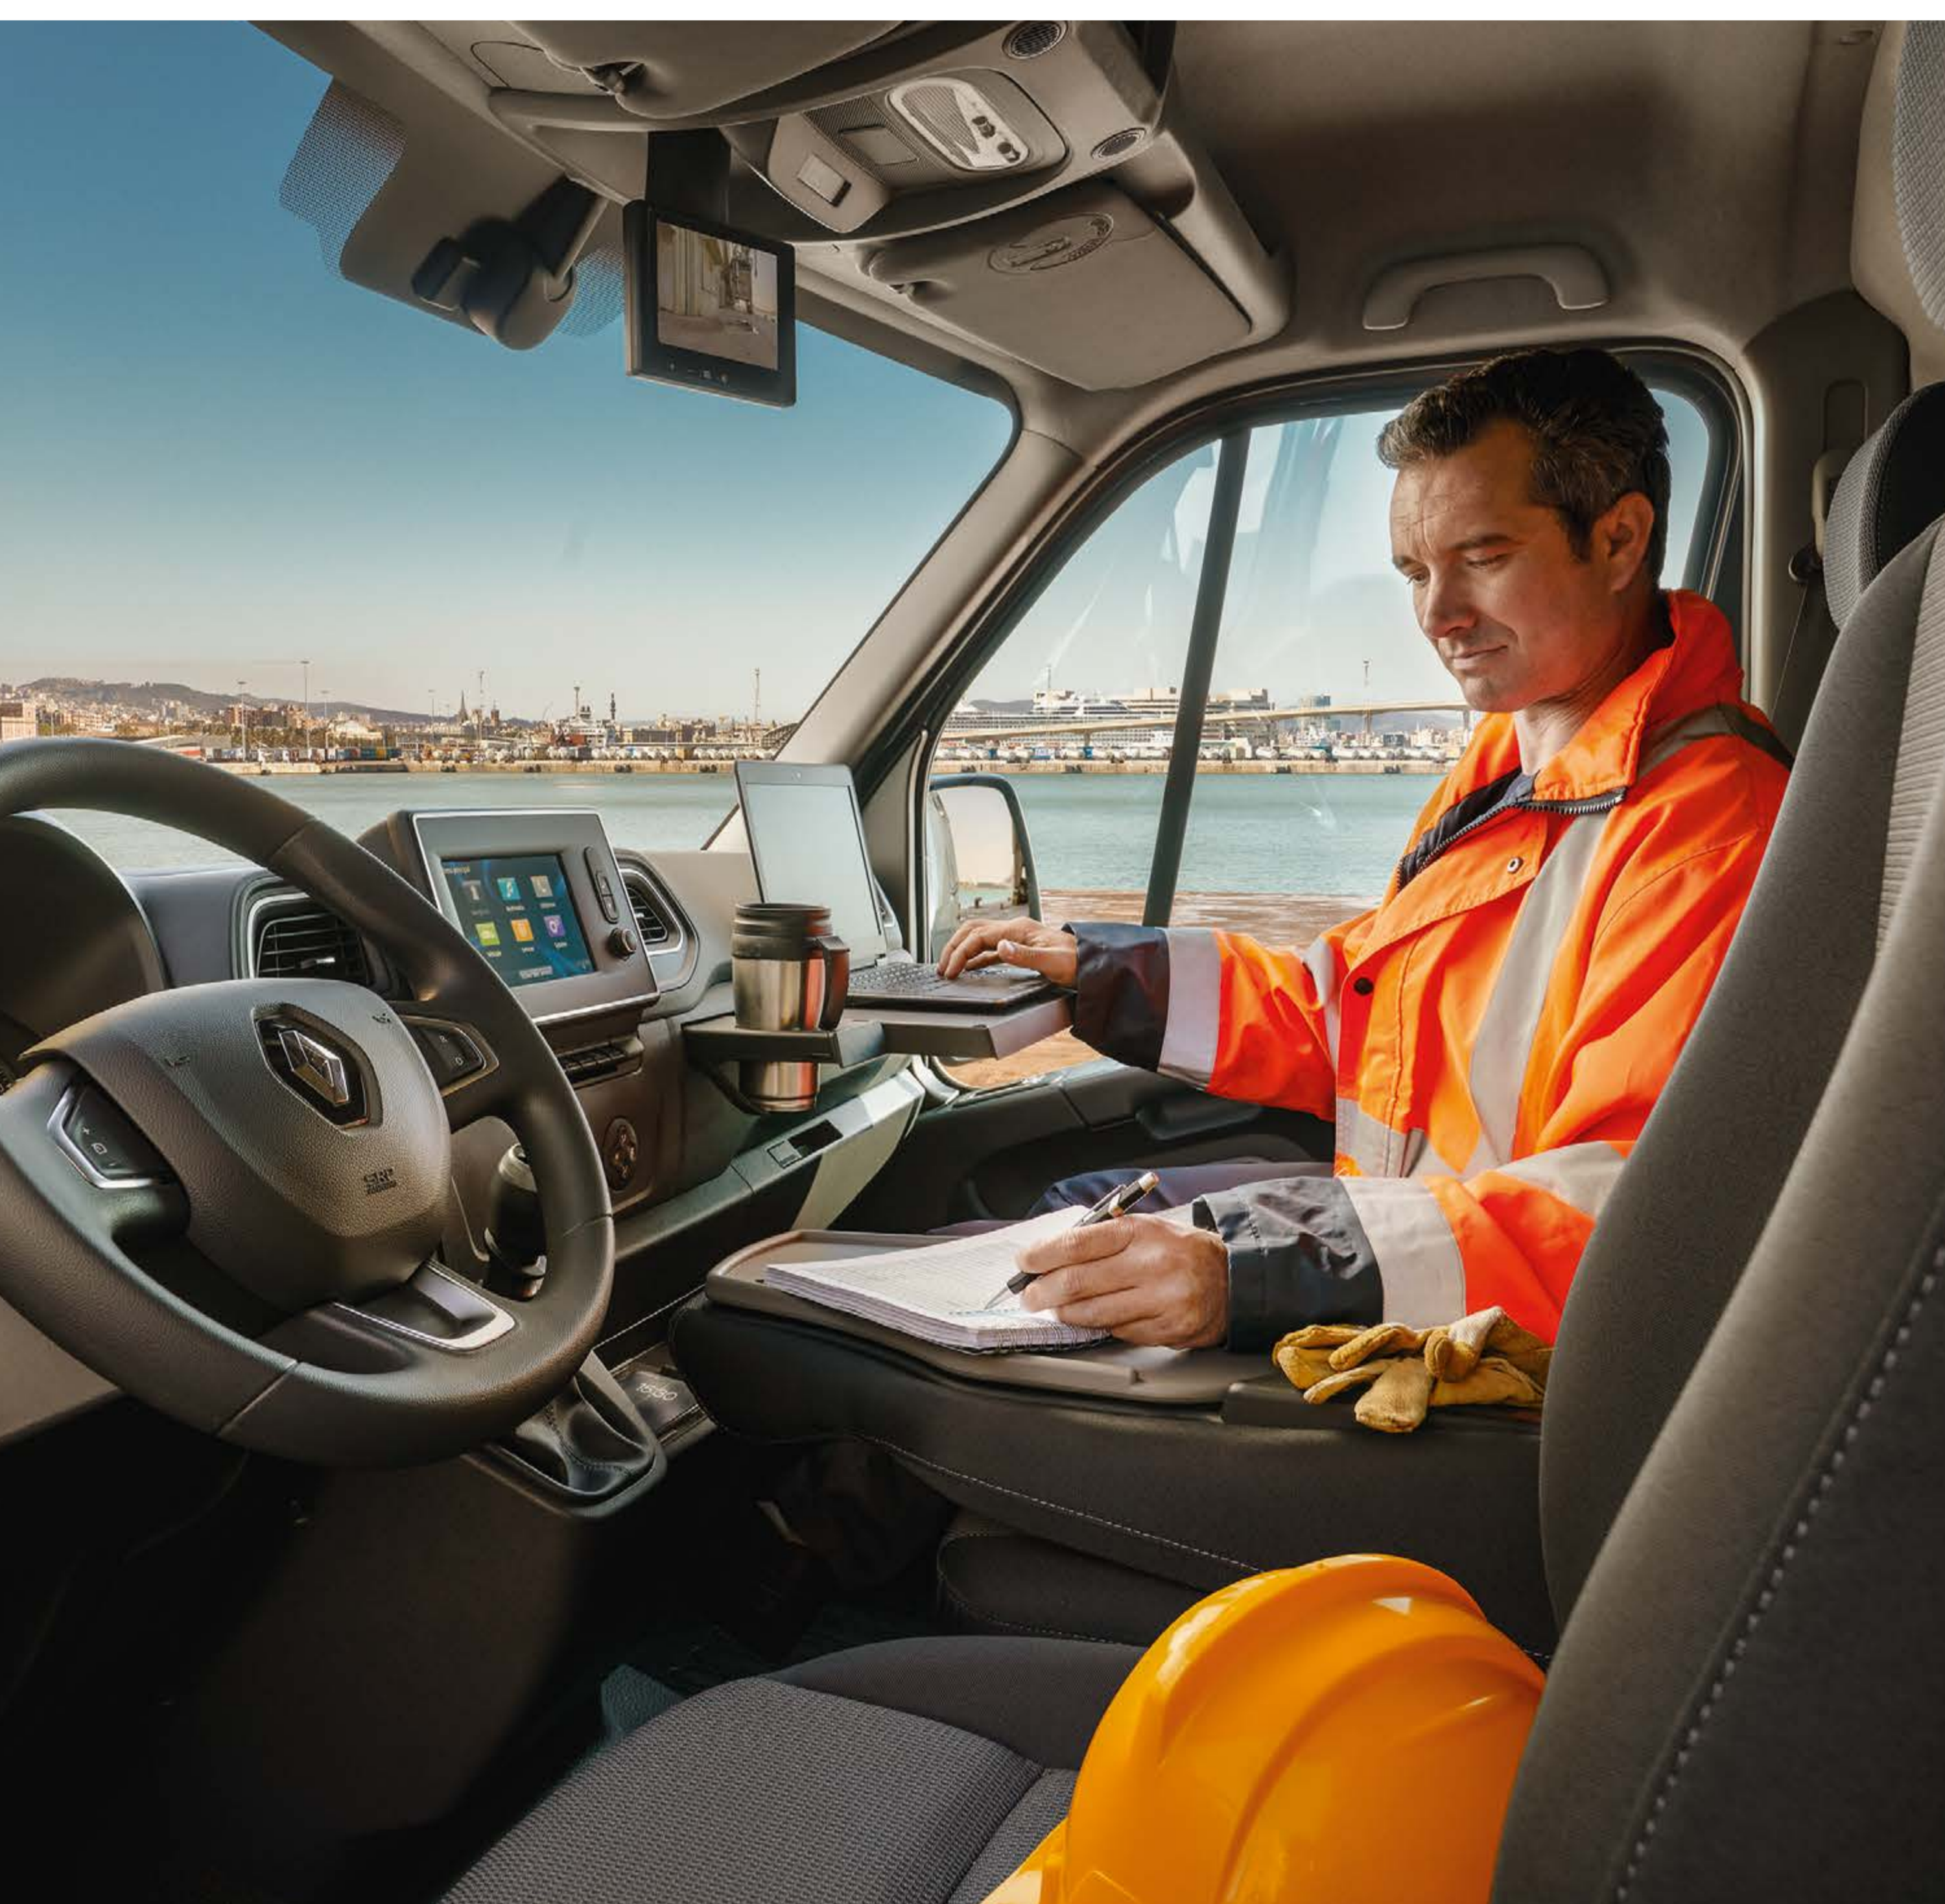

build yours →

02. interior space

useful and practical

Professionals have tough and busy days; this is why the Renault Master cabin area has been designed to provide the comfort and practicality of a 'Mobile Office'. Packed with clever solutions, such as hidden laptop storage, that help to keep you connected on the go (standard on Advance specifications).

mobile office: back of the central folding seat designed to hold your folders or computer

build yours →

easy and secure loading

The rear doors open at 270°* and the low sill means you can easily load bulky objects. Up to 10 anchorage points secure the goods, and the handles, located on the sides of the side and rear doors, save you effort in loading and unloading from the rear area.

With its wide rear and side openings and optimum load volume (from 8 m³ to 17 m³), Master adapts to the needs of all users.

handle located on the side of the side door

* available as an option, depending on version.

build yours →

tailor made for your business

With a wide range of body styles and specific versions, Renault Master adapts to unique requirements: 3 lengths, 3 heights, a gross vehicle weight from 2,800 kg to 3,900 kg, front or rear-wheel drive ...

double cab tipper version

Renault Master is easy to convert to a more bespoke vehicle using either a panel van, chassis (single or double cab) or platform cab with thanks to one of our many Renault approved converters across the UK.

discover conversions →

05. range and charge

up to 126 mile* range

Ideal for the final mile for deliveries in town and city centres, Renault Master E-Tech 100% electric supports you in quieter driving and without producing pollutant emissions.

chassis with 52 kWh battery

Its platform hosts a new fully usable 52 kWh lithium-ion battery and a 57 kW electric engine for a driving range of up to 126 miles*.

eco mode

When you activate this, you reduce the power output of the vehicle so that you can travel further (less abrupt acceleration and maximum speed of 50 mph).

regenerative braking

With Renault Master E-Tech 100% electric, the energy produced when decelerating or every time the brake is used recharges your battery.

low consumption tyres

Their low rolling resistance helps to preserve driving range without adversely affecting road holding or braking quality.

* WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. The WLTP electric range shown has been achieved using the new (WLTP) test procedure. Figures obtained after the battery was fully charged. Actual real world driving results may vary depending on factors such as the starting charge of the battery, accessories fitted after registration, weather conditions, driving styles and vehicle load.

05. range and charge

electric life

Enjoy continuous access to a broad range of customised solutions for charging at home, at work, or when you're out and about. Renault Master E-Tech 100% electric is delivered with a mode 3 cable that can be used with a domestic⁽¹⁾ or public charging station.

charging at work, at home or elsewhere

Charge Renault Master E-Tech 100% electric easily on the domestic grid using a domestic charging station,⁽¹⁾ a reinforced domestic socket⁽¹⁾ or a standard domestic socket.

At home or at work, **Mobilize power solutions** offers you the most needs-adapted range of charging stations and sockets, and helps you with installation and maintenance.

roadside charging

In action? Take the opportunity to charge your vehicle using the network of public charging stations.

driving range

Master E-Tech electric is now available with the E-Tech electric battery giving a WLTP* range of 160.52 miles on one charge, meaning range anxiety is a thing of the past. With real life estimates of 126 miles in summer and 100 miles in winter**.

WLTP range* combined cycle (miles)	WLTP range* city cycle (miles)	summer (+20°C)	winter** (-5°C)	cost in pence p/per mile [†]	cost per full recharge [†]
126	160.52	126	100	less than 12p	less than £15

charging solutions – options that suit your needs!

We offer you several charging solutions to make sure your vehicle is always ready to go!

type of charger	where to use it	power required	charging times (0-100%)	charging times (20-80%)	
wallbox / public charging point	home / office / on the go	3.7kW/10A	19 hours	16 hours	leaving the Master to charge overnight on a 7.4kW charger ensures that it will be ready for when you to begin your next day.
	home / office / on the go	7.4kW/32A	9 hours 30 minutes	5 hours	
public charging point	on the go	22kW	3 hours	1 hour 30 minutes	a charging time of 3 hours means your vehicle is ready to go when you are.

* What is WLTP and why the real-life range is similar to it? Worldwide Harmonized Light Vehicles Test Procedures (WLTP), this new homologation protocol gives fuel consumption and driving range results that are much closer to real life conditions figures than the NEDC protocol. While the old NEDC test determined test values based on a theoretical driving profile, the WLTP cycle was developed using real-driving data, gathered from around the world. WLTP therefore better represents everyday driving profiles.

** Why is the range reduced in winter? Like all batteries, those in E-Tech electric vehicles are less efficient in cold weather than at warmer ambient temperatures. This means that you can expect a reduction in the range of your Master E-Tech electric in the winter. Also, in winter you are more likely to use the heating, which means Master E-Tech electric consumes more energy.

[†] Less than £15 full recharge cost based on 8.5 hours of 28p per kWh (Source: UK Power) Illustration of the 52 kWh battery.

[^] For illustration purposes only, may not reflect real-life journeys.

front or rear-wheel drive

Renault Master has two technical choices to meet your requirements: a front-wheel drive version and a rear-wheel drive version.

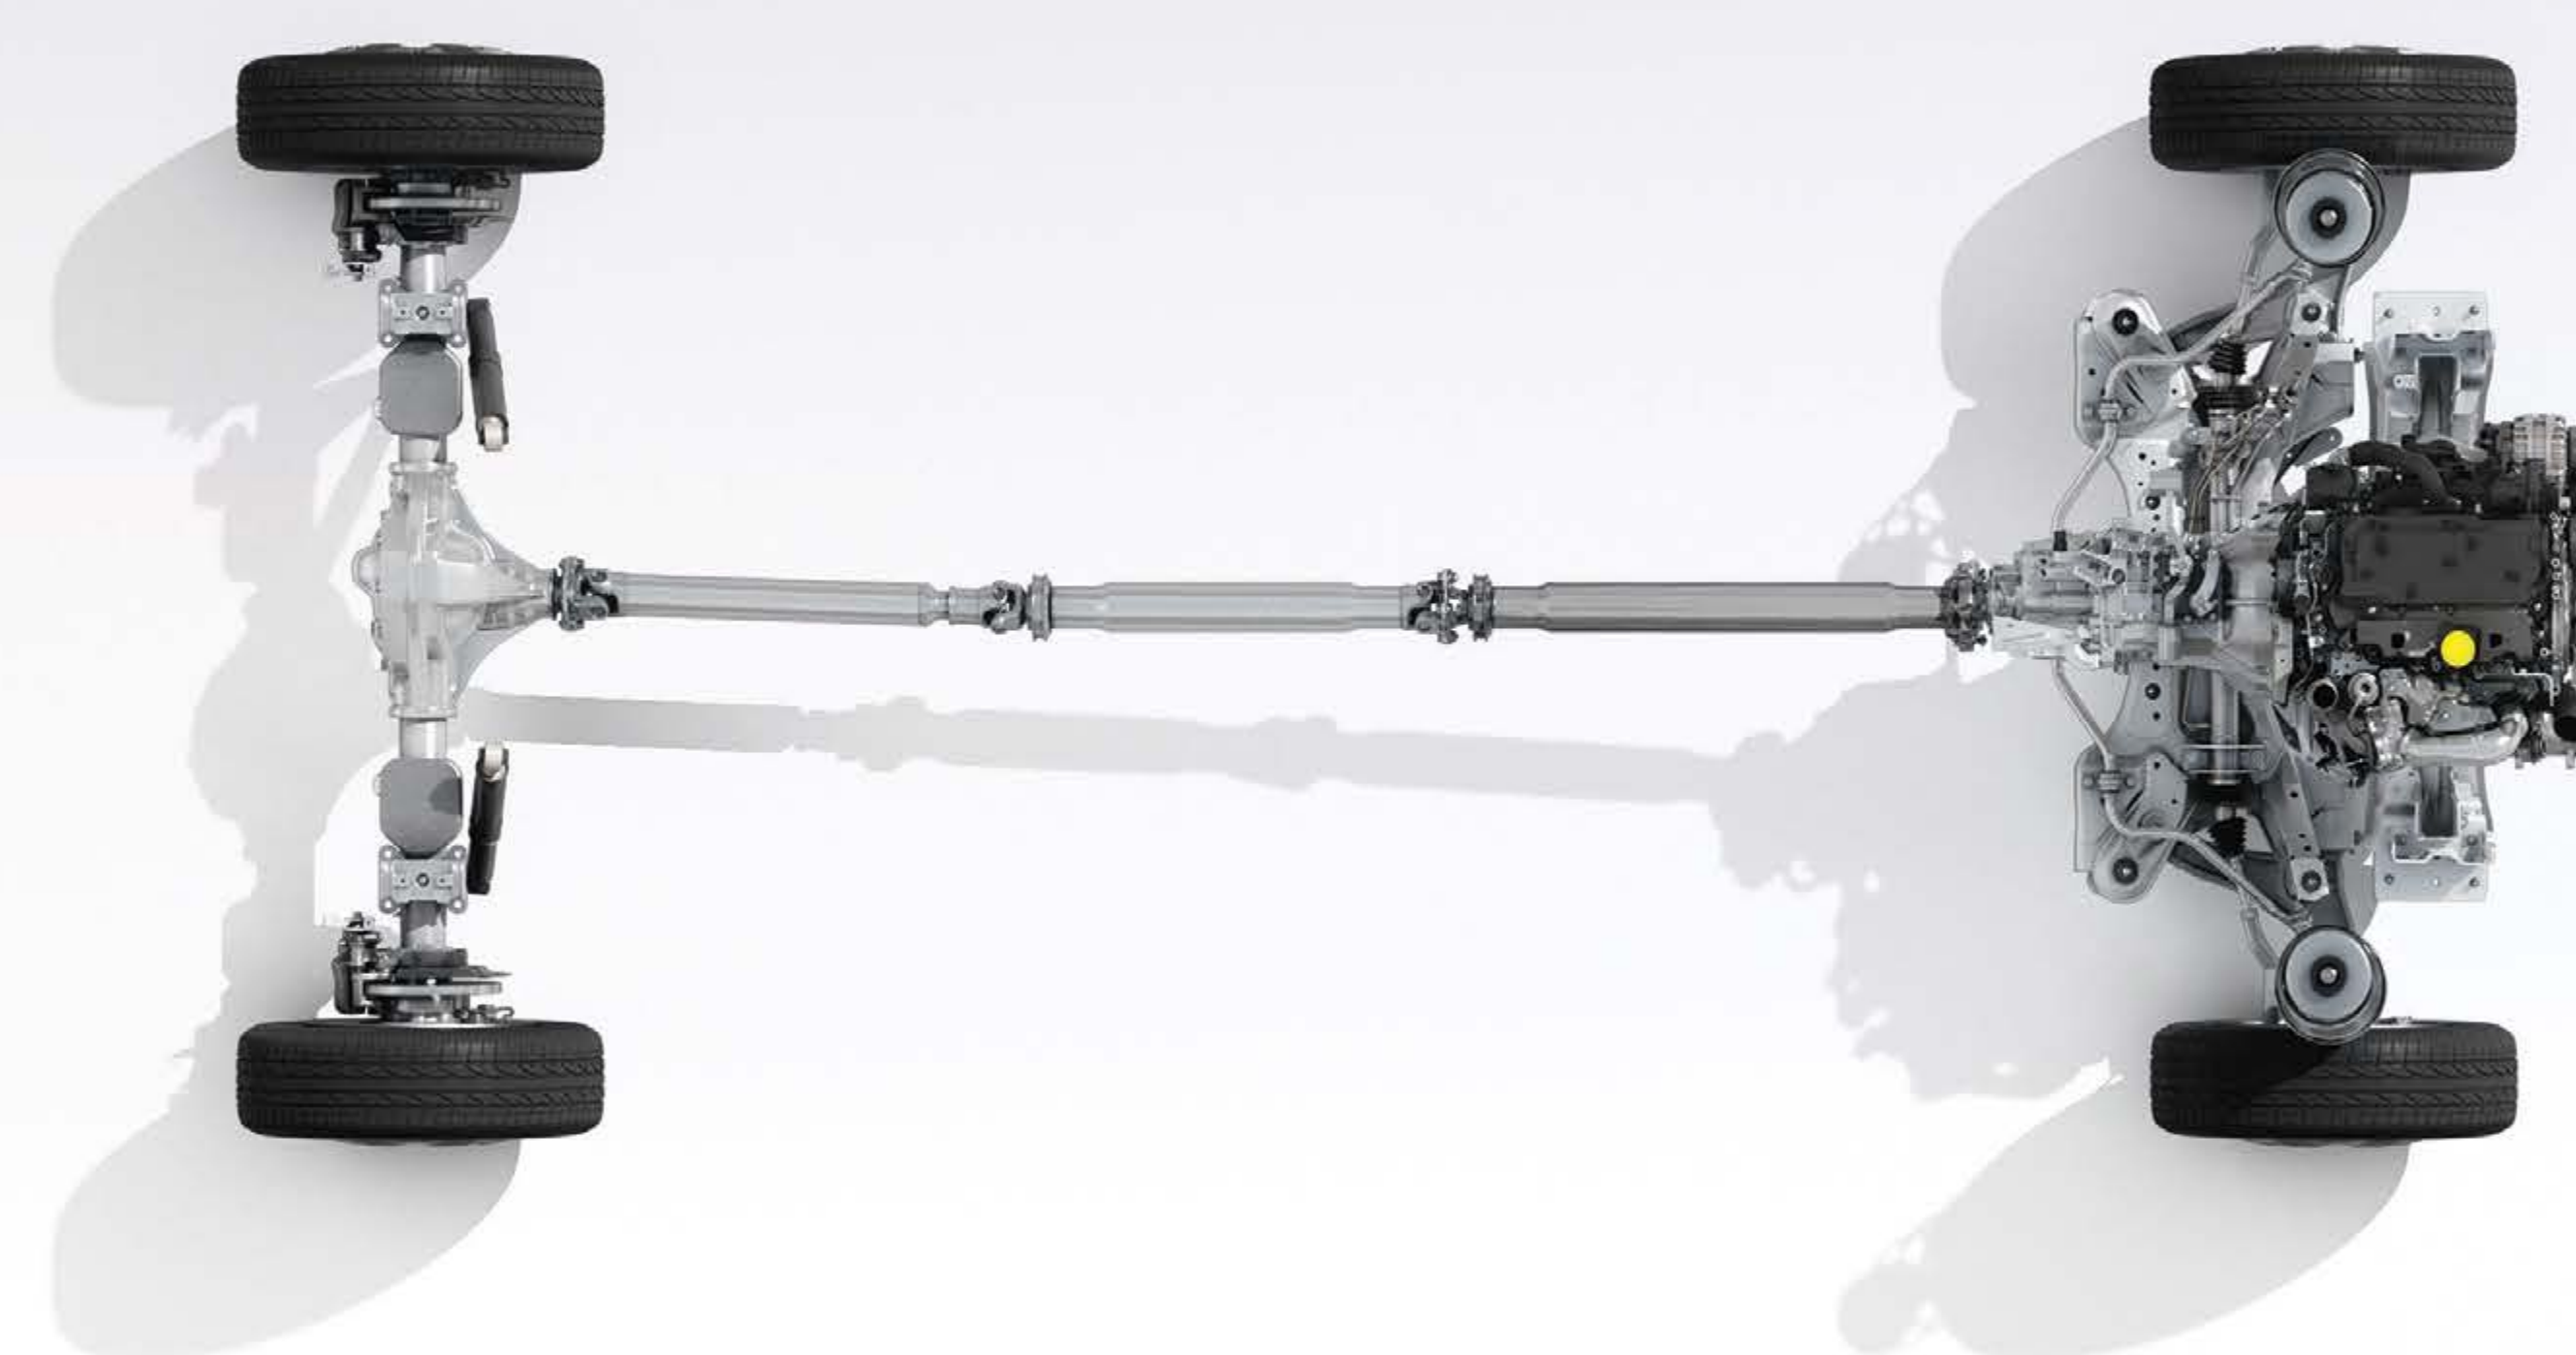

single cab tipper version

With a low loading sill, Master frontwheel drive* and its 3 different lengths is perfect for payload and road transport. But if you're looking for traction as a priority, choose Master rear-wheel drive, capable of transporting the heaviest loads on the rear axle (in particular with twin wheels) and towing a trailer up to 3.5 t, on all types of terrain. After all, what better than to have a choice?**

front-wheel drive

rear-wheel drive

* GVWR up to 3.5t.

** twin wheel rear-wheel drive chassis version.

07. advanced driver assistance systems

11 advanced driver assistance systems

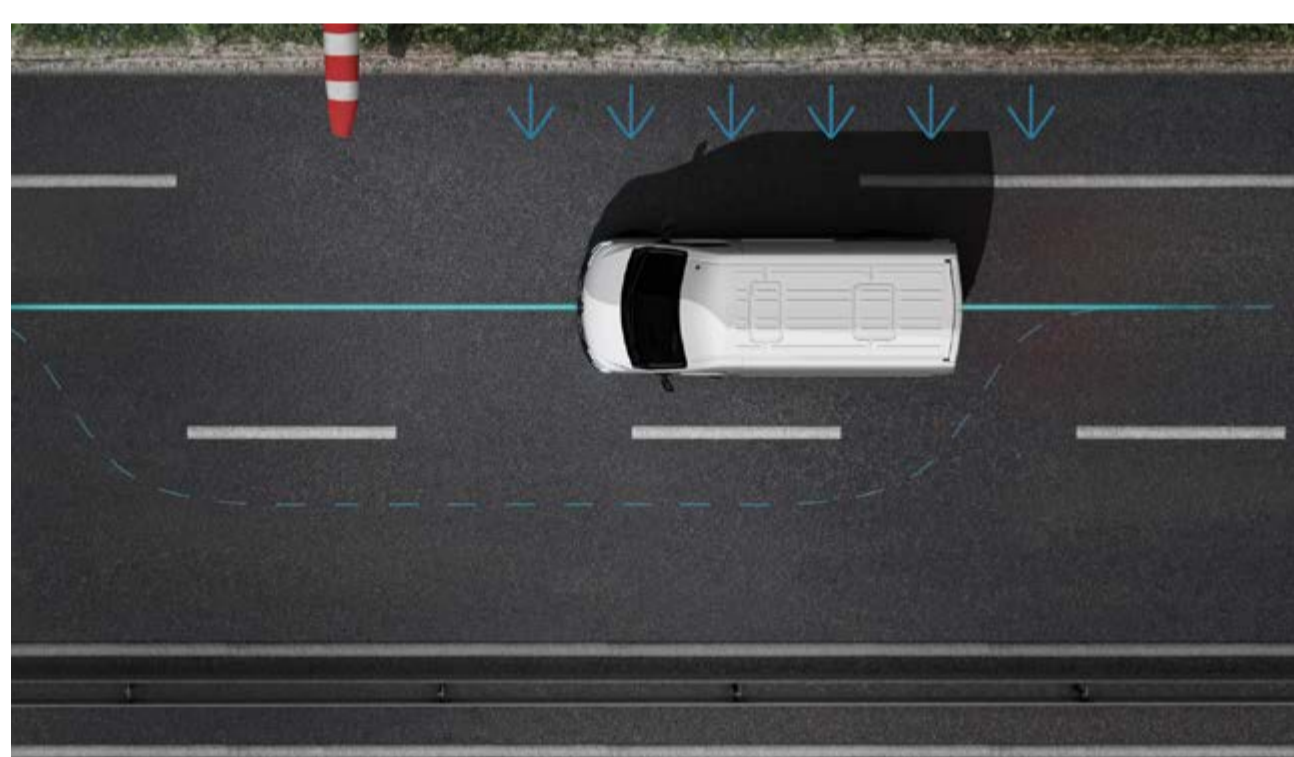

Renault Master is equipped with 11 innovative advanced driver assistance systems.

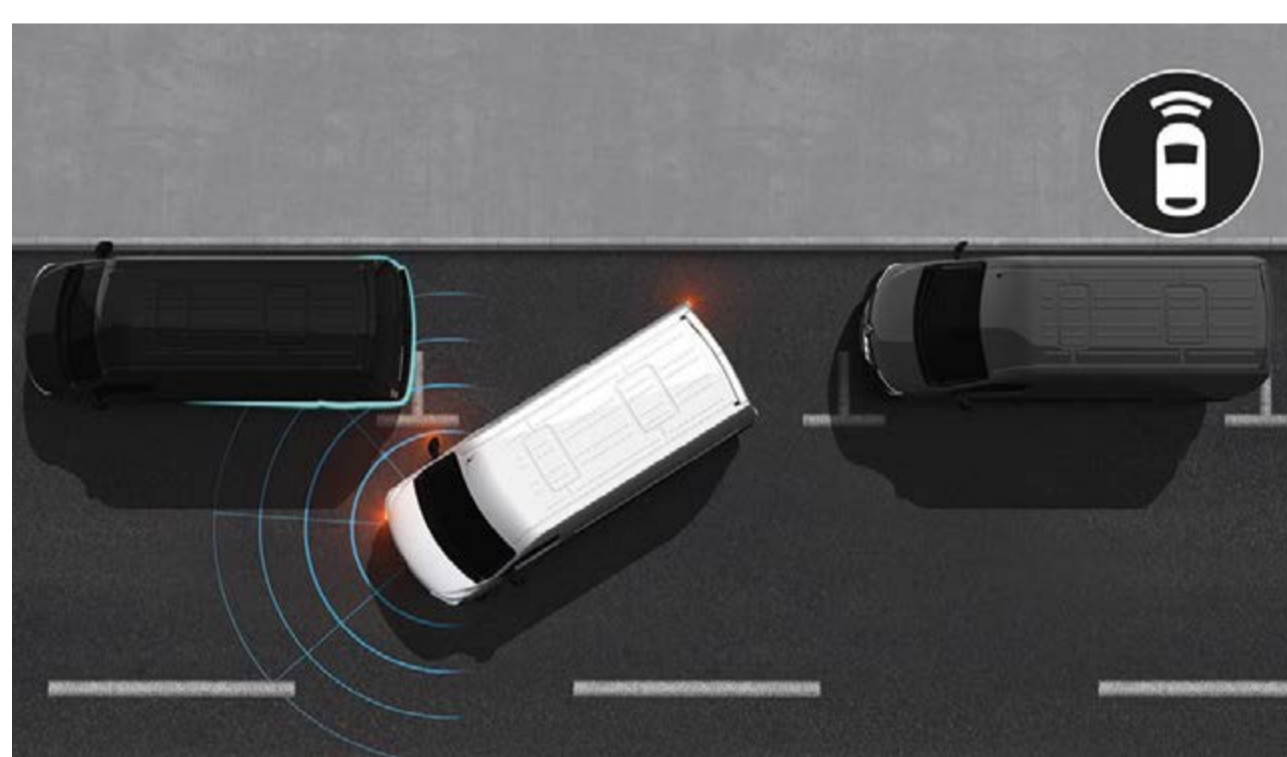

rear view assist camera (optional)
Using a rear-mounted camera, it provides excellent medium and long-distance vision of the surroundings via an in-cab digital display.

advanced emergency braking system (optional)
An active safety system able to detect moving or stationary vehicles. Automatic emergency braking is triggered and takes charge of braking if you react with a delay.

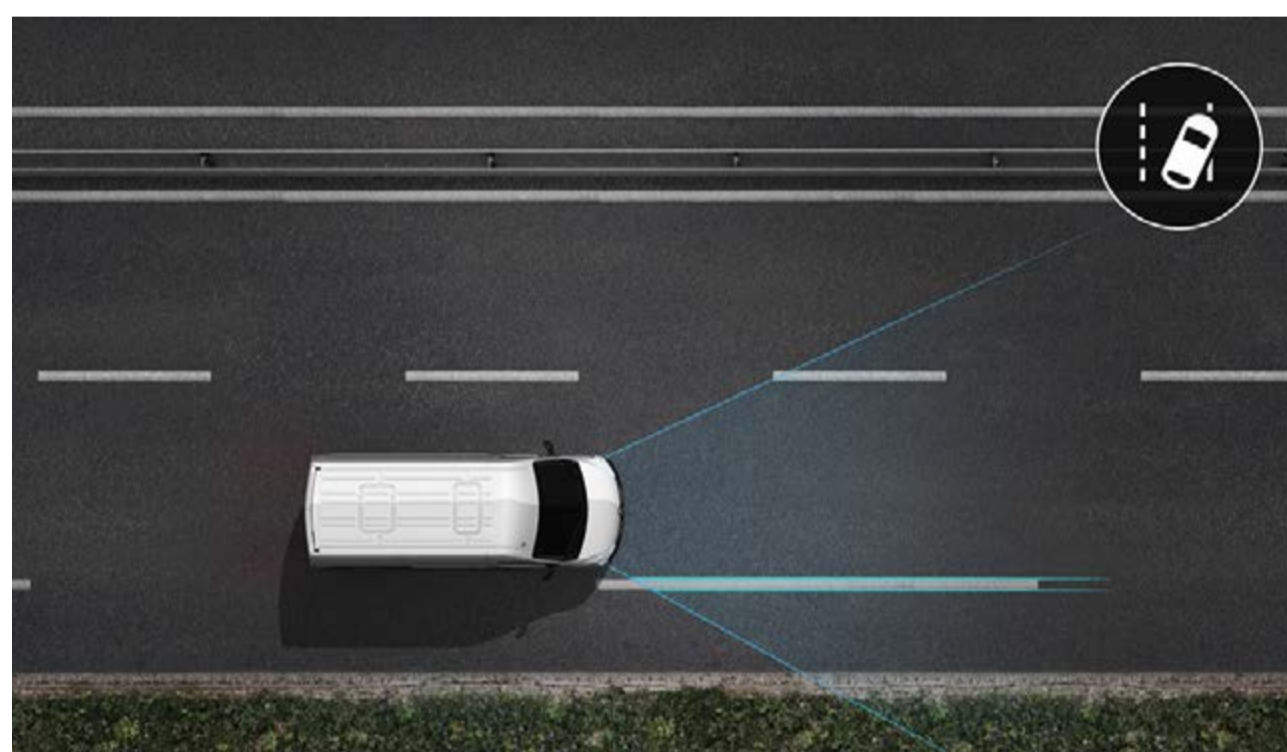

side wind assist (standard)
Master is fitted with a system that helps maintain its trajectory above 43 mph when it is subjected to strong side winds or when a vehicle is overtaking it.

front parking sensors (optional)
Makes parking and manoeuvres easier, letting you know when you are getting close to obstacles via an audio signal. The sensors located at the front of the vehicle thus help reduce the risk of collisions.

hill start assist (standard)
Combined with ESC, hill start assist maintains brake pressure automatically for 2 seconds to give you time to lift your foot from the brake pedal and press the accelerator. The system activates when the slope exceeds 3%.

lane departure warning (optional)
This system analyses the driver's behaviour based on the movement of the steering wheel, and prompts them to take a break with a visual and audio message on the instrument panel.

accessories

roof bars

Very practical for transporting professional equipment and all other bulky loads. These roof bars meet all safety and quality standards and are available in either a set of 2 bar (maximum load: 89.5kg) or 4 bars (maximum load: 181.5kg).

rubber floor mat

These waterproof and easy-to-maintain mats ensure total protection for the floor of your Master. They are quick to attach using 2 safety clips and come in packs of 2 or 4.

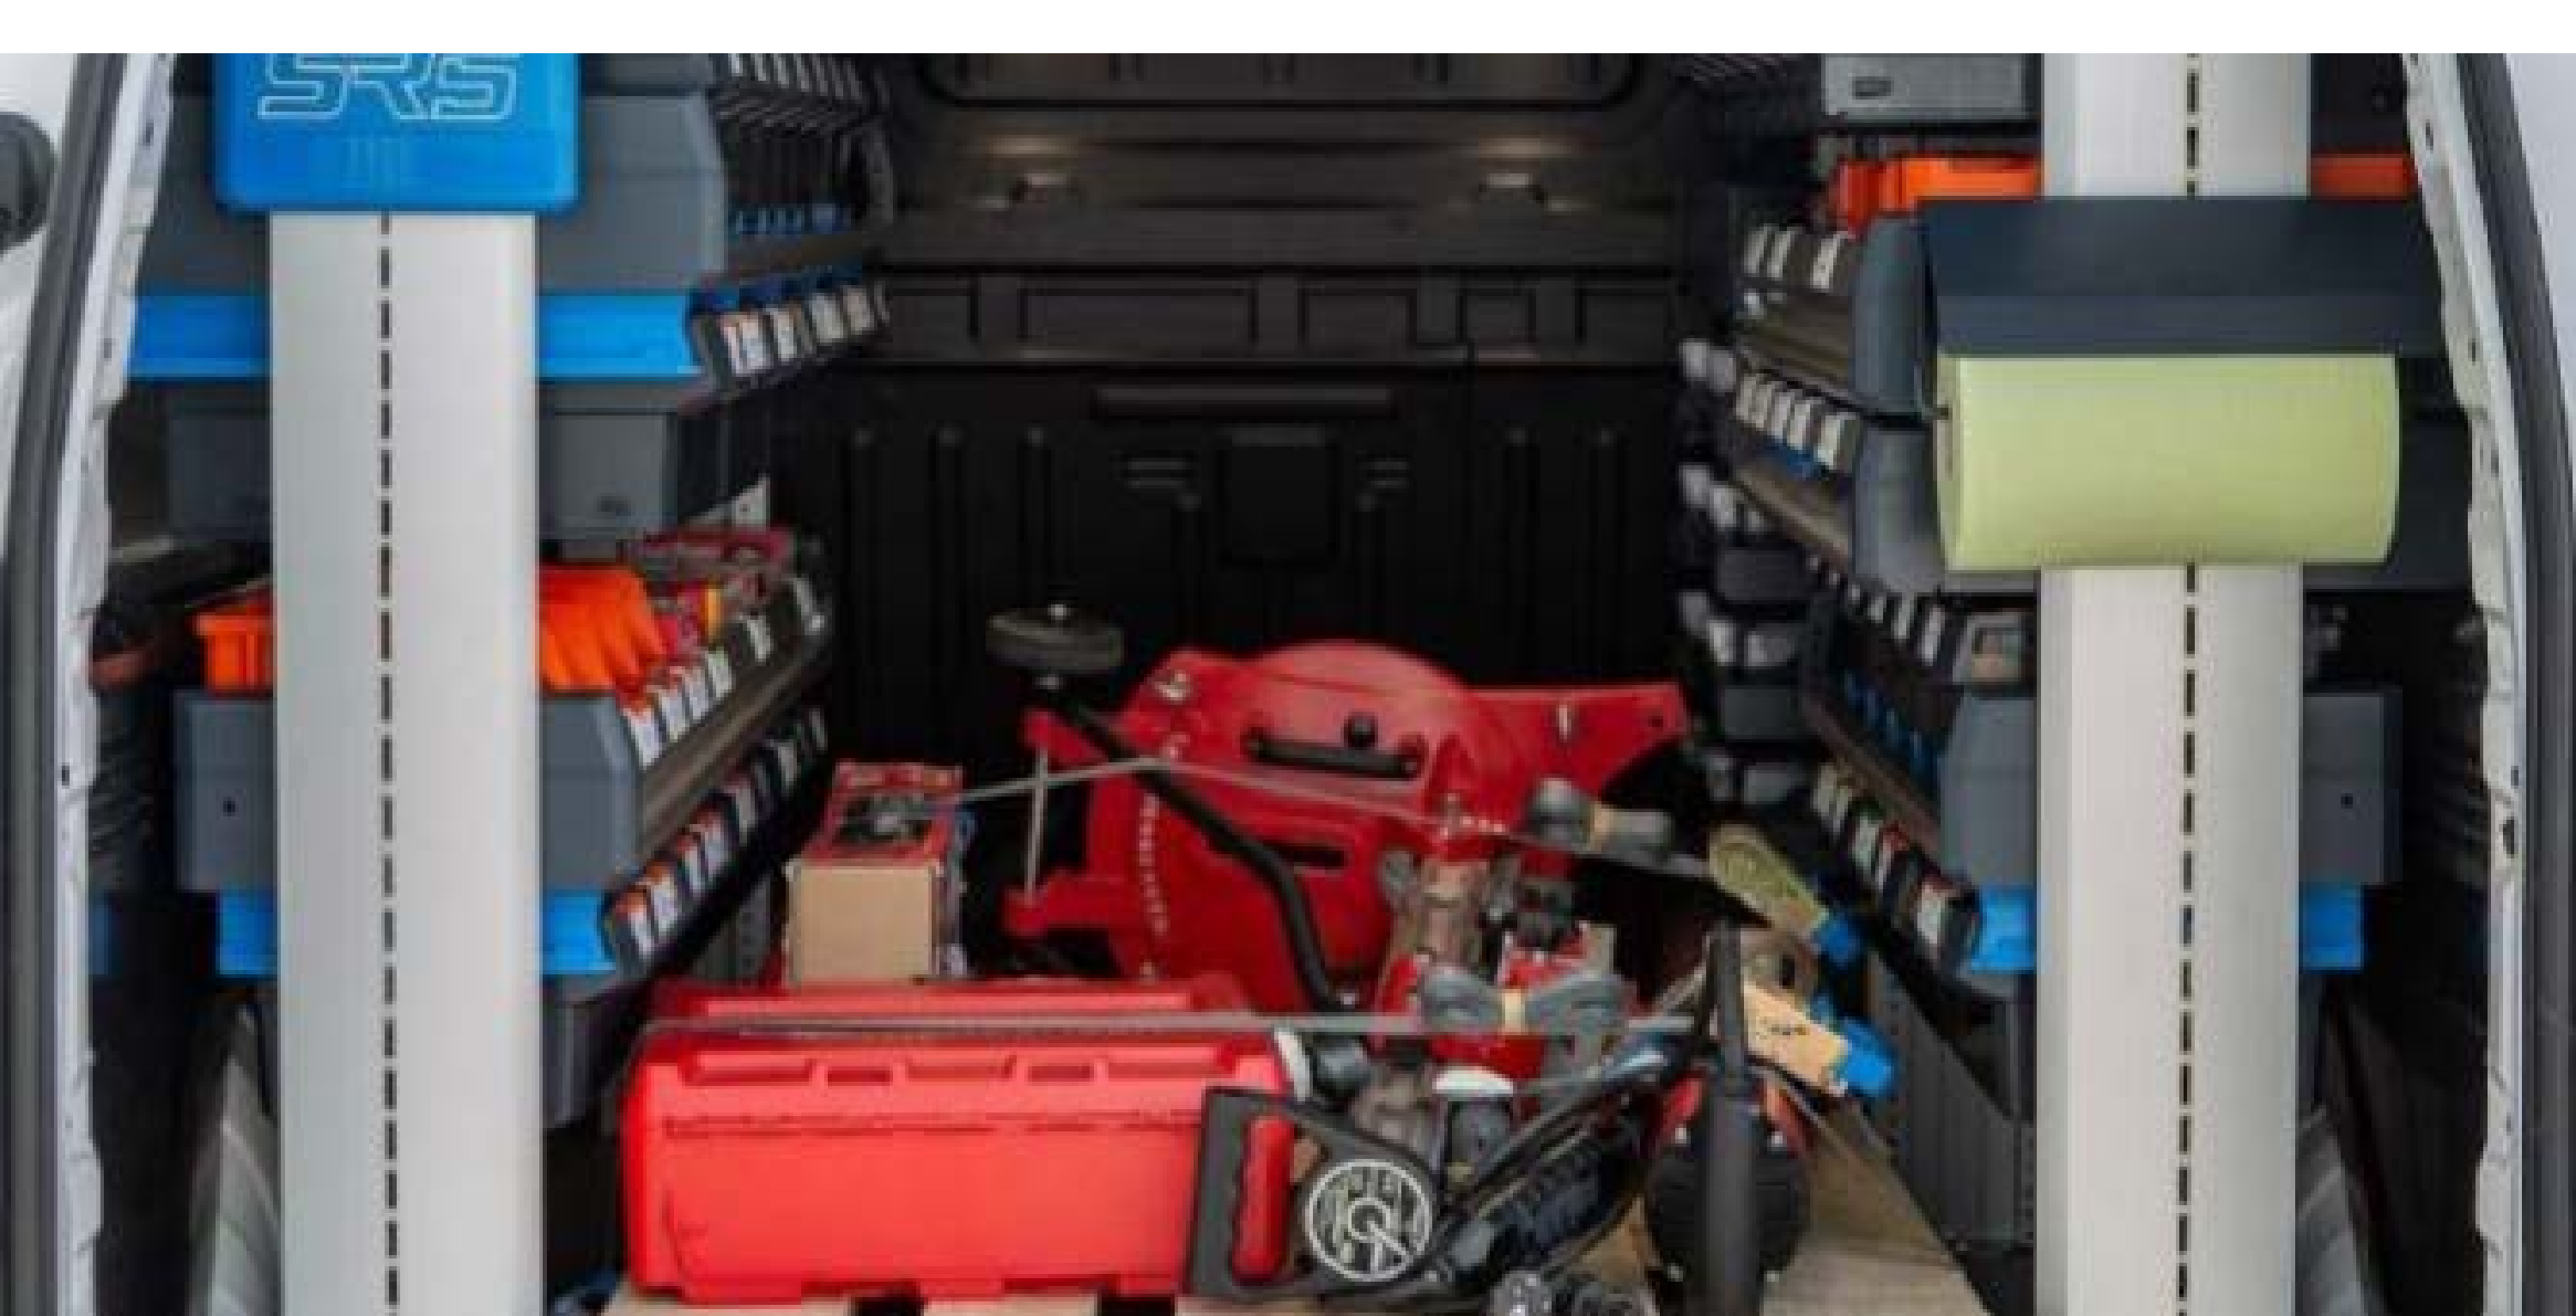

loading pack*

Essential for easy access to the roof. Pack includes the steel ladder, mounted inside the door for a better hold, and the aluminium roof rack, supplied with rear roller for easy loading.

Kenwood dashcam

The Kenwood DVR-A501W dashcam is a great addition for added security and reassurance on the road. The on-board camera automatically starts recording as the vehicle ignition is switched on. The dashcam is designed to give drivers a peace of mind, as video footage is widely accepted and used for insurance claims. The pack includes a GPS integrated dashboard camera, touch panel control and parking mode recording.

Sortimo racking

Racking solutions available giving you more room & space for what matters.

*All accessories are available to order individually. Accessories are fitted post production and may have an impact on WLTP fuel (actual) consumption and CO₂ figures.

Information correct at time of publication * Inc VAT † WLTP figures shown are for comparability purposes; only compare figures with vehicles tested to the same technical procedures. Actual real world driving results may vary depending on factors such as weather conditions, driving styles, vehicle load or any accessories fitted after registration. WLTP is a new test used for fuel consumption and CO₂ figures. Please visit renault.co.uk/configure for WLTP figures for any selected options.

Renault services

3 years warranty

Your vehicle is covered by a warranty package for up to 3 years from date of first registration (unlimited mileage during the first 24 months, followed by a further 1 year limited to a total mileage of 100,000). Your Renault Dealer is able to repair or replace without charge, parts that are found to have a material or assembly defect that is recognised by Renault. The paintwork warranty runs for 3 years and the anti-corrosion warranty for 6 years.

For Warranty Terms and Conditions please visit www.renault.co.uk/warranty.

3 years Renault assistance

Should you need it, we'll provide emergency roadside repairs or tow you to the nearest Renault Dealer. This service is available 24 hours a day and is provided for 36 months from the date of first registration (unlimited mileage for first 24 months, then limited to a total of 100,000 miles or 3 years, whichever comes first). Assistance is provided within the UK & Northern Ireland only at roadside, home and includes national recovery and onward travel. Assistance applies to mechanical or electrical defects which are covered by warranty.

For Renault Assistance Terms and Conditions please visit www.renault.co.uk/assistance.

LCV service plans & extended warranties

Renault's LCV Service Plans are the ultimate package to provide care free servicing for your new Renault LCV. It really is the hassle free way to take care of your Renault and benefits from;

- Inflation Proof Servicing - You know exactly what you'll pay and there are no hidden costs
- Peace of Mind - No matter where life takes you, we'll be there in over 5000 workshops across Europe
- Renault Expertise & Quality - Our highly trained technicians know your Renault inside out

The Renault LCV Service Plan contains Renault services in-line with the manufacturer's service schedule, plus comes with a complimentary vehicle safety check to ensure your Renault is in the best condition possible.

Renault LCV Extended Warranty enhancements also available. Refer to the Price Guide for more details.

service intervals

Master E-Tech electric Service: Year 1/12,000 miles, Year 2/24,000 miles and then every 2 years/24,000 miles thereafter

Master all other engines and versions: 24,000 miles / 2 years

For servicing plan terms and conditions visit www.renault.co.uk/serviceplan

*Finance provided by Renault Finance, P.O. Box 149, Watford, WD17 1FJ. Guarantees and indemnities may be required. You must be at least 18 and a UK resident (excludes Isle of Man and Channel Islands) to apply. Subject to status, terms and conditions apply. †Calls to 0330 numbers are free if used as part of your inclusive mobile minutes and are charged at local rates from landlines. Renault UK Limited (company number 82932), registered at The Rivers Office Park, Denham Way, Maple Cross, Rickmansworth, Hertfordshire, WD3 9YS.

Renault Network Services

No-one is better placed than Renault to maintain, fit and repair your Renault, fast. The Renault Minute (maintenance and repair with no appointment necessary) and Renault Rapide Bodycare (bumper scuffs, dings and dents, windscreen, stone chips and interior repairs...) services deliver the highest level of repair and maintenance and offer a full year's guarantee on Original Renault Parts. And don't forget to have a look at our wide range of additional equipment and accessories!

Renault iCare

Renault iCare is an innovative Service, Maintenance & Repair product that supplies Business customers with a fully supported, managed hassle free service and maintenance package.

Renault iCare is a "Pay-As-You-Go" product that insures your vehicle is maintained by Renault technical experts when work is required.

iCare provides the following benefits:

- Full Service, Maintenance & Repair cover in the Renault Dealer Network
- Tyres can be included within the contract at an additional fixed cost
- Ancillary equipment can also be included (at an additional fixed monthly cost)
- Excludes: Damage/Neglect/Abuse/Glass & Bulbs
- A fixed, pre agreed pence per mile rate
- No excess mileage charges at the end of the contract
- No pooled mileage administration
- Minimalise downtime

For more information and to obtain a quote based on your requirements, please speak to your local Renault Business dealer or visit www.renault.co.uk/icare

customer relations

Renault knows the value of communicating with its customers and we have established effective ways to keep in touch with you. If, after speaking to your local Renault dealership, you are not completely satisfied, please contact the Renault UK Customer Relations Team on 0344 3350000[†] (Mon-Fri 8.00am to 6.00pm, Closed on Bank Holidays. Live Chat Mon-Fri 8.00am to 9.00pm). You can also visit our website www.renault.co.uk or write to us at: Renault UK Ltd, The Rivers Office Park, Denham Way, Maple Cross, Rickmansworth, Hertfordshire, WD3 9YS.

finance options*

There are a wide variety of ways in which the purchase of a new vehicle can be financed. Renault Finance offers all of them, so whether you're a fleet buyer or private buyer, Renault Finance is ideally placed to tell you which plan or combination of plans best suits your needs and circumstances.
