

...Serubuga, Bagasora, Buregeya, Rwagafilita and others played a role in the attack. I don't know anything about the assassination of our paratroopers.

Nothing allowed us to think that such a thing could happen.

I did not hear the communications of the Paras who were killed.

With regard to radio RTL, I only listen to it rarely, but I heard the translations made by the staff because the essential part of the broadcasts were in Kinyarwanda. Comments have been broadcast in the style: "the Belgians have money, it's from them that we should take it", "The Belgians killed your president, you should kill a Belgian at this or that place" or things of this kind.

I did not hear them personally.

As far as I'm aware, the FAR shouldn't have had missiles.

(After reading, he remained and signed our information register).

In witness whereof.
