MEMO N° 11 TO BERNARD CAZENEUVE

My previous memo mentioned the absence of communication of certain diplomatic telegrams. It must also be noted that, depending on the months, the number of telegrams communicated is highly variable. This entails not only lack of knowledge but also serious doubts.

One example: in my memo n° 7 I stressed the problem of the SAMs recovered by the FAR from the FPR. Captain Ducoin, in a report dated 10 January 1991, notified this situation. He spoke about it again in his half-yearly report of 15 July 1991. And yet, there are only 10 TDs for the period of January 1991 and none for the aforementioned dates... I reiterate that all those of February, March and April are missing. For the month of May, we have only 9 TDs, 5 for June, 6 for July, and the number rises again afterwards.

I believe that, from a checklist of the TDs communicated which all have a number and a date, we must ask for very clear further precisions from the persons concerned who are sending us this puzzle.
