More cabin space

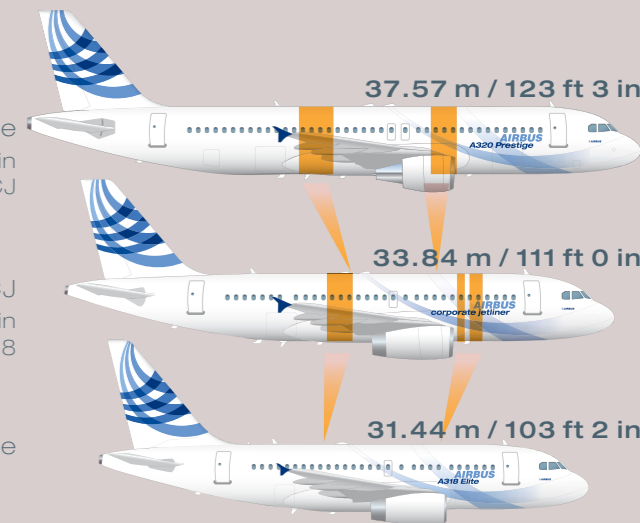

The A320 Prestige features the most spacious cabin in the corporate jet market, with the same wide cross section as the A318 Elite and the ACJ.

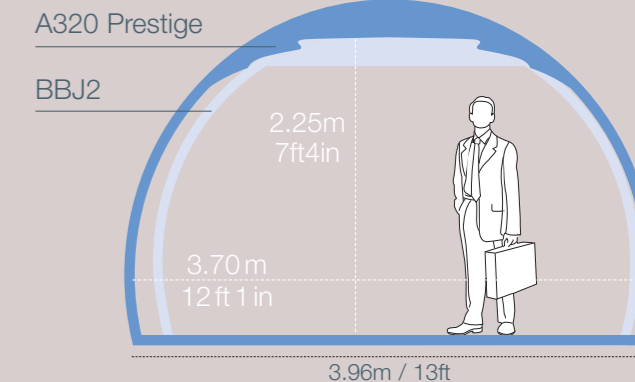

With 100 m² (1100 ft²) of cabin floor area, an infinite number of cabin arrangements can be accommodated, among them, the Airbus Prestige concept.

This configuration allows 30 passengers to travel in unparalleled comfort in each of the different cabin areas of the aircraft.

More baggage space

A320 Prestige
30 seats certified for take-off and landing

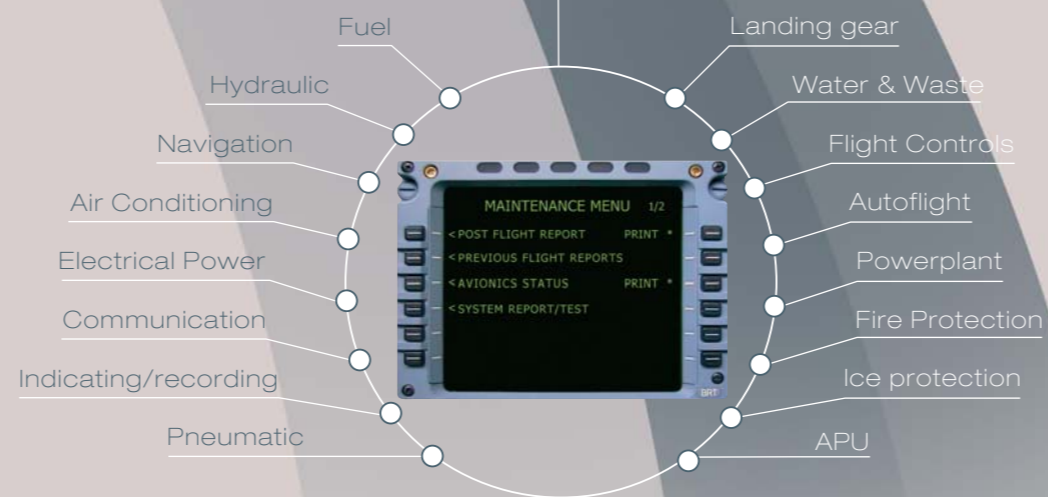

The large cargo compartment of the A320 Prestige can hold huge quantities of baggage.

Even fitted with 2 Additional Center Tanks (ACTs), the remaining volume of 28 m³ (1000 ft³) enables you to easily transport over 200 typical big bags or suitcases in bulk configuration. In addition, with its two large opening-outward cargo doors, the A320 Prestige can be loaded with large-sized travelling cases.

Modern technology

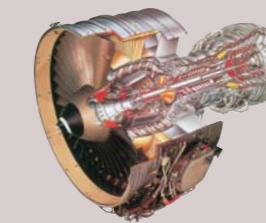

The Centralized Maintenance System, covering all equipment installed in the aircraft, improves trouble shooting and allows quicker maintenance actions and lower maintenance costs.

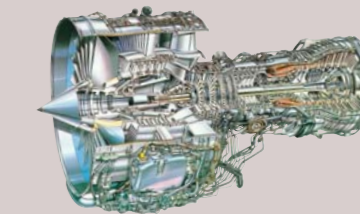

The A320 Prestige benefits from one of the key successes of Airbus aircraft worldwide: Fly-by-wire technology. Fly-by-wire incorporates flight envelope protection which increases flight security on-board.

Competitive choice of efficient powerplants from major engine manufacturers.

CFM56-5B

IAE V2500

The CAT 3B certification enables a precision approach capability which allows the A320 to take you to your chosen destination when weather conditions force others to land elsewhere.

Excellent performance

Delivered with 2 Additional Center Tanks (ACTs), the A320 Prestige has an excellent range, ideal for medium to long range flights between Europe, Middle East, North Africa, Central Asia and North America.

For example, it can carry 30 passengers from London to New York or Dubai in unmatched cabin comfort.

Airbus is currently flight-testing new wing tip devices on the A320, designed to further improve wing aerodynamics and to reduce fuel burn.

Technical data A320 Prestige

Dimensions	Cabin length	27.50m	90ft 3in
	Cabin width	3.70m	12ft 1in
