All split times are unofficial. Where possible, the most accurate times are given. These are a mixture of transponder times and those taken from video analysis. Not shown are the 4x100m anchor times from 2015 (Bolt 8.65 etc), as these were triggered by a transponder and stopped by photo-finish. The first two legs of the 4x400m were effectively timed manually with a signal as each baton holder crossed the mid-point of the changeover zone in their lane. These have been expressed in tenths throughout, and verified by video where possible
