**INTRODUCTION**

**CONTENTS OF THE INTRODUCTION**

1. Demographia World Urban Areas
2. Important Revisions
3. Distribution of Population
4. Built-Up Urban Areas: Definitional Issues
5. Smaller Urban Areas (Under 500,000 Population)
6. Geographical Notes
7. Methodology
8. Caution: Trend Analysis
9. Background
10. Cover Illustration: Paris
11. Comments and Suggestions

**1. DEMOGRAPHIA WORLD URBAN AREAS**

*Demographia World Urban Areas (Built-up Urban Areas or Urban Agglomerations)* is the only annually published inventory of population, corresponding land area and population density for urban areas with more than 500,000 population. Unlike metropolitan area lists, *Demographia World Urban Areas* applies a generally consistent definition to built-up urban areas.<sup>1</sup> Urban footprint data is reported without regard political boundaries that are generally associated with metropolitan areas or sub-national jurisdictions.

This report contains population, land area and population density for all 1,064 identified built-up urban areas (urban agglomerations or urbanized areas) in the world with 500,000 or more population that have been identified. The total population of these urban areas is estimated at 2.25 billion, 53 percent of the world urban population in 2017.<sup>2</sup>

A number of smaller urban areas are also listed. Overall, data is provided for 1,758 urban areas of all sizes, which comprise a population of 2.38 billion people, 56 percent of the world urban population.

<sup>1</sup> Other regularly published urban agglomeration lists do not contain consistently defined entities. They tend to mix metropolitan areas, municipalities (parts of metropolitan areas) and urban areas (built up urban areas or agglomerations). None of these lists include urban land area data. The United Nations list is unique in providing notes that clarify the nature of its each of its listings (core cities, metropolitan areas, urban areas and others).

<sup>2</sup> Calculated using United Nations data.

## 2. IMPORTANT REVISIONS

### 2017 Revisions

New census data and estimates as well as later satellite imagery has led to some substantial revisions in recent editions of *Demographia World Urban Areas*. The most notable are indicated below:

- Canada has revised its method for delineation of built-up urban areas (population centres). Urban areas are now comprised of qualifying small area “blocks,” rather than the former municipalities. Some municipalities included large tracts of rural land and this revision removed these areas from the urban areas. As a result, urban area densities in Canada are higher and land areas smaller.
- New local population estimates are available for some larger municipalities (prefectures) in China and have been used to calculate new population bases. Almost without exception, population growth has been well below United Nations projected levels since the 2010 census. Population estimates for built-up urban areas with base years before 2013 are likely to be high, because newer estimates may show slower growth rates
- The adjacent Shenyang and Fushun (Liaoning, China) urban areas have been combined.
- The built-up urban areas of Boston and Providence (USA) and other smaller adjacent built-up urban areas have been combined as a result of their now being included in the Boston combined statistical area.
- *Demographia World Urban Areas* is now using the *Africapolis* population and urban land area data were available, considering them to be the closest approximation to national census data on built-up urban areas. *Africapolis* data covers West African nations and most importantly, appears to provide reliable data on the built-up urban areas of Nigeria, where official data has often been challenged. The availability of the *Africapolis* data makes it unnecessary for *Demographia World Urban Areas* to develop independent built-up urban area data in West Africa outside Nigeria, where no difficulty in census data is indicated.
- The population estimate for the Karachi urban area has been substantially reduced because the results of the 2017 census indicate that the previously reported figure was high.
- The Mumbai built-up urban area has been expanded to incorporate the Bhiwandi, Kalyan and Vasai-Virar urban areas. This is generally consistent with the definition of the Census of India, with the exception that *Demographia* includes Bhiwandi.
- A new estimate for Kinshasa has been developed, from 2014 data provided by the Institut National de la Statistique of the Democratic Republic of the Congo (DRC). The data was not sufficient, however, to develop revised estimates for other built-up urban areas in the DRC.
- A new population census ends more than 30 years since the last in Myanmar. Built-up urban area estimates have been updated using this information.

- The lower range population estimates for the Lagos built up urban area have been largely confirmed by the *Africapolis* project (see Geographical Notes, below). There has been considerable controversy about the population of Lagos for years and local governments had claimed the census of Nigeria had severely under-counted its population. The new information is generally consistent with the Nigerian federal government population data.
- A new urban area of more than 5,000,000 residents has been identified by *Africapolis*, Onitsha, Nigeria.

### Revised Format

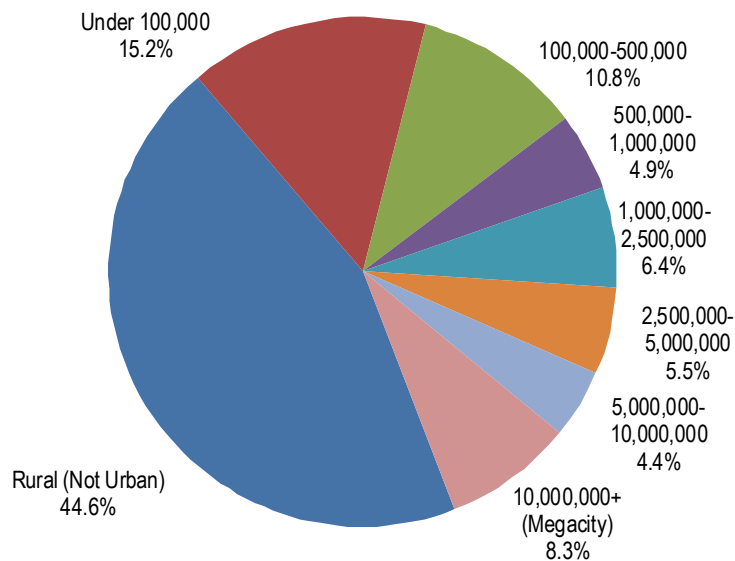

Tables have been simplified and reorganized beginning with the 2016 edition. The population base, base year and estimates for built-up urban areas with less than 500,000 population are shown only in Table 5. Table 5 contains all urban areas covered, in alphabetical order by geography and built-up urban area name.

### 3. DISTRIBUTION OF POPULATION (BY URBAN AREA SIZE, URBAN DENSITY AND CONTINENT)

In recent years, the world has become more than one-half urban for the first time in history (55.4 percent in 2018). Yet, it would be a mistake to believe that the world's urban residents live in settings similar to 5th Avenue in New York or within the fourth ring road of Beijing or in inner Paris, or for that matter in large urban areas. Nearly all of the world's large urban areas have extensive suburbs of much lower density outside the historic cores that are characterized by higher densities. Some post-automobile urban areas have virtually no urban core.

#### World Population Distribution: 2018

##### URBAN (BY POPULATION) & RURAL

**Figure 1**

Based on the data in this year's edition, it is estimated that the median urban resident lives in an urban area of 645,000 residents (the estimated population for Tyumen, Ural Federal District, Russia and Cape Coral, Florida in the United States).

More than 70 percent of the world's population lives in urban areas with fewer than 500,000 residents<sup>3</sup> or in rural areas (See: *What is a Half-Urban World?*<sup>4</sup>). Less than 30 percent (29.4 percent) lives in urban areas with 500,000 or more population<sup>5</sup> (Figure 1).

A slight majority of the large urban area population lives in built-up urban areas with between 4,000 and 10,000 persons per square kilometer (approximately 10,000 to 25,000 persons per square mile). Approximately one-quarter live at higher densities and one quarter live at lower densities (Figure 2). Approximately one-half of the 1,064 urban areas by number (532) have densities between 4,000 and 10,000 per square kilometer (Figure 3)

More than one-half of the population of large built-up urban areas (500,000 and over) are in Asia, living in 585 of the 1,064 large urban areas (Figure 4). The Asian areas comprise 58 percent of the world's large urban area population.

There are 37 megacities in the world (urban areas over 10 million population), the same as in 2017. A total of 86 urban areas are indicated with 5,000,000 or more population, up from 84 last year (Table 2).

## World Population by Urban Area Density

BUILT-UP URBAN AREAS 500,000+: PER KM<sup>2</sup>: 2018

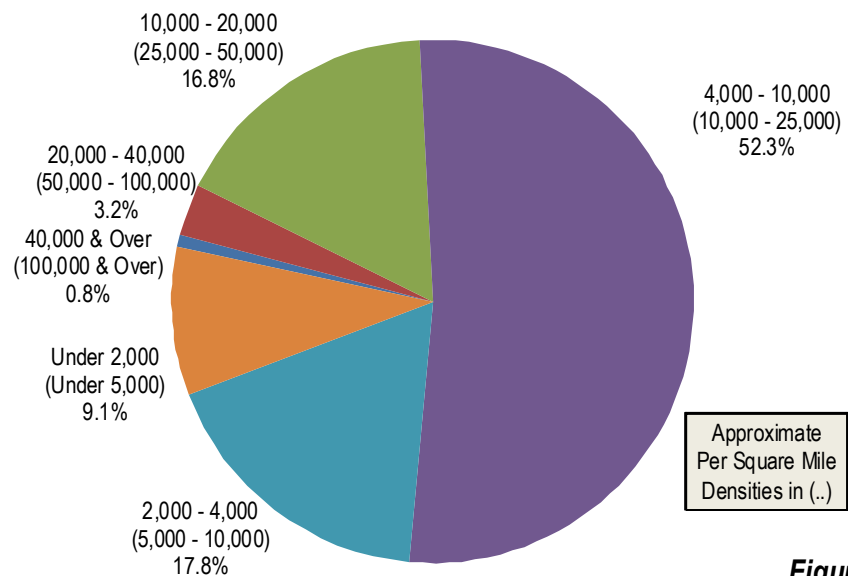

Figure 2

### 4. BUILT-UP URBAN AREAS: DEFINITIONAL ISSUES

An urban area ("built-up urban area,"<sup>6</sup> urbanized area or urban agglomeration)<sup>7</sup> is a continuously built up land mass of urban development that is *within* a labor market (metropolitan area or metropolitan region). An

<sup>3</sup> The of urban areas under 500,000 is estimated by applying ratios from, *Making Room for a Planet of Cities* (Shlomo Angel, with Jason Parent, Daniel L. Civco, and Alejandro M. Blei) to the Demographia data.

<sup>4</sup> Wendell Cox (2012), "What is a Half-Urban World," *The New Geography*, <http://www.newgeography.com/content/003249-what-a-half-urban-world>.

<sup>5</sup> Caution is recommended in comparing population categories with previous years. Because urban areas shift (generally upward) in population categories, the urban area components of each population category have changed. The of urban areas under 100,000 is estimated by applying ratios from, *Making Room for a Planet of Cities*.

<sup>6</sup> "Built up urban area" is the new urban area term now used by National Statistics in the United Kingdom. It may be the most descriptive short term for urban areas.

<sup>7</sup> Called a "population centre" in Canada and an "urban centre" in Australia.

urban area contains *no* rural land (all land in the world is either urban or rural). In some nations, the term "urban area" is used, but does not denote a built-up urban area.<sup>8</sup>

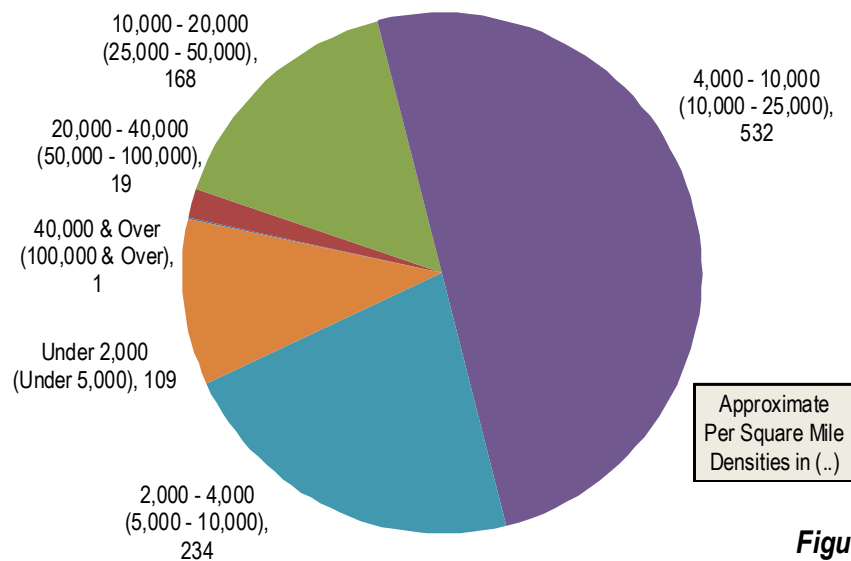

An urban area is best thought of as the "urban footprint" --- the lighted area ("city lights") that can be observed from an airplane (or satellite) on a clear night. National census authorities in Australia, Canada, Denmark, Finland, France, the Netherlands, Norway, Sweden, the United Kingdom and the United States designate urban areas. Except in Australia, the authorities use a minimum urban density definition of 400 persons per square kilometer (or the nearly identical 1,000 per square mile in the United States) in areas that comprise urban areas.

By necessity, average population density data masks significant variations within urban areas. Within urban areas, urban population densities can range from below 400 per square kilometer (1,000 per square mile), particularly in North American urban areas, to over 1,000,000 per square kilometer (2,500,000 per square mile) in informal neighborhoods<sup>9</sup> of some Asian cities (such as in Dhaka).<sup>10</sup>

There are also significant differences in density variation within built-up urban areas. Average urban density does not provide any information on such variations, nor can it

be assumed that an urban area with a higher average density will have higher neighborhood densities. For example, the population density of the Phoenix urban area is more than 60 percent higher than in the Boston-Providence urban area. Yet, the highest population densities of Boston-Providence are at least five times that of the highest density areas in Phoenix. Moreover, Boston-Providence has a far larger commercial core ("central business district" or "downtown"). The difference is that the Phoenix suburbs are denser than the Boston-Providence suburbs.

### World Population by Urban Area Density NUMBER OF URBAN AREAS 500,000+: PER KM<sup>2</sup>: 2018

**Figure 3**

<sup>8</sup> For example, in China, sub-city or sub-regional districts called "shixiaqu" (市辖区) are sometimes referred to as urban areas. Shixiaqu resemble metropolitan areas, containing both urban and rural land. Districts designated as urban often have large tracts of rural land on which urban development is anticipated.

<sup>9</sup> Called slums, shantytowns or favelas in various geographical areas.

<sup>10</sup> See: Wendell Cox, (2012), "The Evolving Urban Form: Dhaka," *The New Geography*, <http://www.newgeography.com/content/003004-evolving-urban-form-dhaka>.

Higher density suburbs are also responsible for making Los Angeles the most densely populated large urban area in the United States, despite its much lower urban core densities relative to New York.<sup>11</sup> This creates an irony that the city most associated with urban dispersion (“urban sprawl”) in the United States is, in reality, the most dispersed (least “sprawling”). At the same time, no urban area in the world sprawls over a larger area than New York, as is indicated in Table 3.

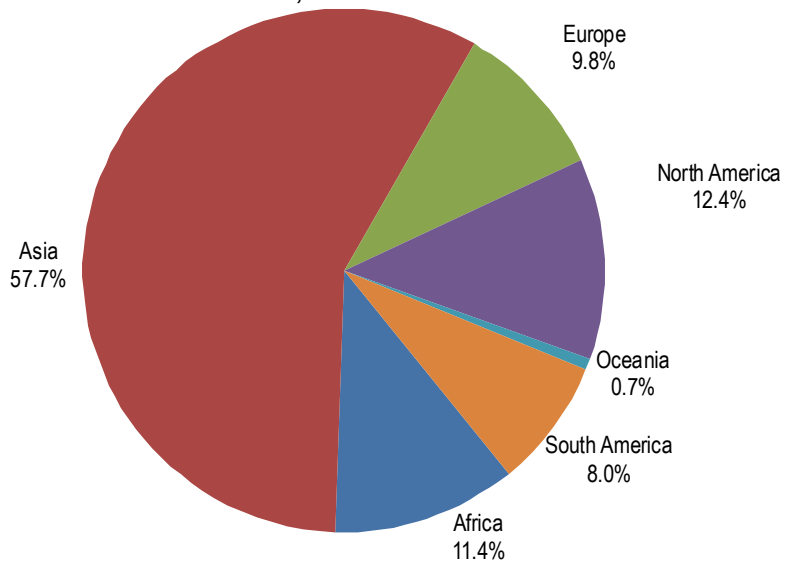

Similarly, London and Athens have similar population densities. Yet, the core densities in Athens are considerably higher than in London. The Athens suburbs, however, are among the least dense in the world. The Essen-Dusseldorf and Milan urban areas have almost identical densities, yet core densities are considerably higher in Milan. *Demographia World Urban Areas* defines the population and density of urban footprints, regardless of their internal density profiles.

### Urban Areas Contrasted with Metropolitan Areas

An urban area (built-up urban area or urban agglomeration) is fundamentally different from a metropolitan area. A metropolitan area is a labor market (and a housing market). It includes a principal built-up urban area (the largest built-up urban area in the metropolitan area) as well as economically connected rural areas (and smaller urban areas) to the outside. (Figure 5).<sup>12</sup>

Urban areas draw employees from a labor market area larger than the area of continuous development. For example, INSEE, the census authority of France defines the Paris urban area (“unité urbaine”) as 2,845 square kilometers and the Paris metropolitan area (aire urbaine) as 17,100 square kilometers, indicating that more than 80 percent of the land area is outside the Paris urban area.<sup>13</sup> Similarly, in the United States, the 52 metropolitan areas with more than 1,000,000 population had only 19 percent of land in urban use, with the remainder of 81 percent being rural.<sup>14</sup>

**Built-Up Urban Area Population: 2018**  
BY CONTINENT: 500,000 POPULATION & OVER

**Figure 4**

<sup>11</sup> See: Wendell Cox (2018), “California’s Dense Suburbs and Urbanization,” *The New Geography*, <http://www.newgeography.com/content/005908-californias-dense-suburbs-and-urbanization>.

<sup>12</sup> All land is that is not urban is considered rural.

<sup>13</sup> See Wendell Cox (2018), “The Evolving Urban Form: Paris,” *The New Geography*, <http://www.newgeography.com/content/005912-the-evolving-urban-form-paris>.

<sup>14</sup> Wendell Cox (2010), “Rural character in America’s Metropolitan Areas,” *The New Geography*, <http://www.newgeography.com/content/004088-rural-character-america-s-metropolitan-areas>.

Because of the fundamental differences between urban areas (or urban agglomerations) and metropolitan areas, population comparisons should be made only within the two categories, not between.

### Metropolitan Area Densities

Metropolitan area densities can be calculated, but are of limited value and can produce misleading results.

This is because (1) there are no international standards for delineating metropolitan areas, rendering them non-comparable between nations and (2) geographical “building blocks” may be too large to reasonably estimate the geographical extend of metropolitan areas.

This is illustrated by metropolitan areas in the United States, where counties are used as the building blocks.

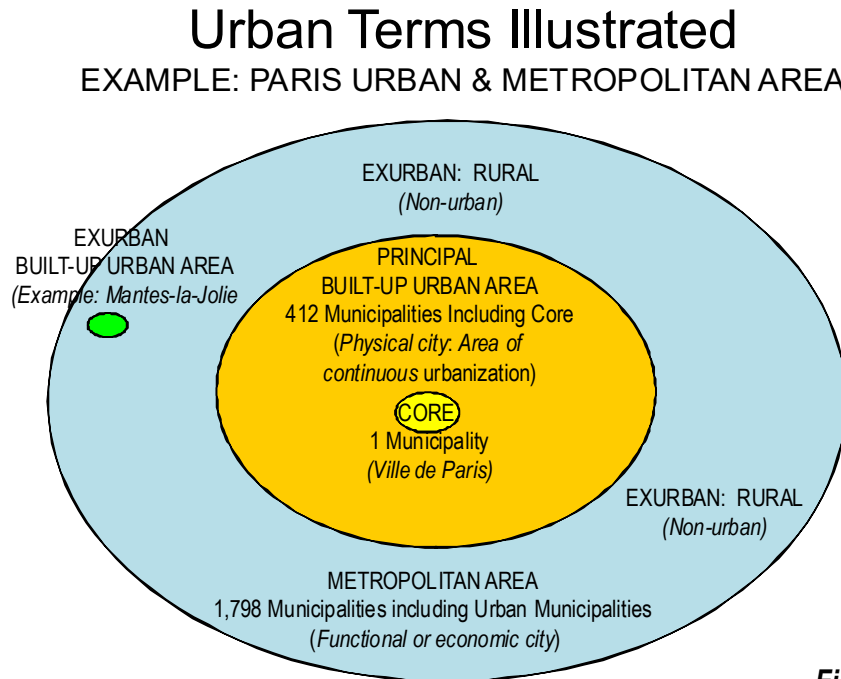

The size of counties in the United States varies

up to 1,500 times and, as a result, metropolitan densities are strongly influenced by the densities of the rural areas surrounding the built-up urban areas.. The most expansive metropolitan area in the United States is Riverside-San Bernardino, at 27,300 square miles (71,000 square kilometers), is not much smaller than Austria. Most of this area is well beyond commuting range, which means that Riverside-San Bernardino is much larger than its genuine labor or housing market. The situation is similar, but not as extreme in some other metropolitan areas of the United States. Metropolitan area densities in the United States therefore cannot be validly between themselves.

Further, it is incorrect to characterized metropolitan area densities as urban densities. Urban densities can be calculated only using urban populations and excluding populations of rural areas. All metropolitan areas have rural areas and thus metropolitan density is not a genuine measure of urban density.

### Urban Areas and Urban Extents Contrasted

In some cases, urban areas have virtually grown together, yet are still considered separate urban areas. This report confines urban areas to a single metropolitan area (below) or labor market area. Continuous

**Figure 5**

urbanization that extends beyond individual labor markets (metropolitan areas) can be called "urban extents."

What constitutes a particular metropolitan area is a matter of judgment and there are no generally accepted international principles for delineating metropolitan areas (unlike urban areas). However, it is necessary to "draw a line," especially where adjacent urban areas have "grown together," but remain essentially distinct labor markets. For example, the following urban extents are composed of more than one urban area:

- The Pearl River Delta urban areas of Shenzhen, Dongguan, Zhongshan, Jiangmen, Huizhou, Zhuhai, Guangzhou and Foshan in China's Guangdong province are very close to one-another and in some cases the built-up urban areas are virtually adjacent. Yet, this is not considered a single urban area because there is not a single, unified labor market. *Demographia World Urban Areas* considers Guangzhou and Foshan as a single urban area, because they have become more economically integrated than the other urban areas (such as by Metro system that serves both cities). Otherwise, each of the other urban areas in the Pearl River Delta economic region is considered to be separate. The urban extent also includes Hong Kong. However, there is a second reason that Hong Kong is not a part of a Pearl River Delta urban area --- there is border control between Hong Kong and Shenzhen that does not permit the free exchange of labor.
- The Yangtze River Delta contains a number of nearby (though not always adjacent) urban areas stretching from Ningbo Shanghai, and Nanjing. This includes Ningbo, Shaoxing, Hangzhou, Jiaxing, Shanghai, Kunshan, Suzhou, Wuxi, Changzhou, Zhenjiang, Nanjing and other smaller urban areas. Some sources consider this a single metropolitan area or even a single built-up urban area. It is neither. The area is simply to be too large to be a single labor market. Further, the Yangtze River Delta is not even a single urban extent, because there considerable rural territory between some, breaking up the continuous urbanization. There is rural territory between Ningbo and Shaoxing, Hangzhou and Jiaxing, Jiaxing and Shanghai, Changzhou and Zhenjiang as well as between Zhenjiang and Nanjing. As a result, the Yangtze Delta urban extent, at most, stretches from Shanghai to Changzhou. It is composed of multiple metropolitan areas and thus multiple urban areas.
- The coast of Japan from Tokyo-Yokohama to Osaka-Kobe-Kyoto has nearly "grown together." Yet, this ribbon of urbanization is far too large to be a single metropolitan area (labor market) and thus considered to be multiple urban areas (an urban extent).
- The same applies to the Northeastern "megalopolis" of the United States. The continuous urban development that exists is has rural separations in some cases and each of the major metropolitan areas represents a separate labor market. Thus nearly continuous urban areas of the Northeast corridor are considered separate, including Hartford, New York, Philadelphia, Baltimore and Washington.

### **International Urban Areas**

Urban areas (and metropolitan areas) are confined to a single nation, unless there is virtual freedom of movement (principally labor) between the adjacent nations (or jurisdictions). Freedom of movement means

that there are no customs or immigration facilities at borders, or that there are arrangements (such as readily available permits) for residents to live and/or work in any of the adjacent jurisdictions. Currently, this condition is met only between some continental nations of the European Union. For example, the Lille urban area is in both France and Belgium yet is considered a single urban area because there is freedom of labor movement without trade, immigration or customs barriers. Treaty provisions render Geneva (Switzerland)-Annemasse (France), Basel (Switzerland) along with suburban areas of France and Germany as a single built-up urban area. Similarly, Milan together with Chiasso in Switzerland is a single built-up urban area.

However, Detroit-Windsor El Paso-Ciudad Juarez and San Diego-Tijuana are not considered single urban areas because of their border controls restricting the free movement of labor. As noted above, the Shenzhen and Hong Kong urban areas, despite their adjacency and being in the same nation, are also considered to separate because of their international-style border controls.

### **Municipality (City or Commune)**

An urban area is different from a municipality (also often called a city or a local government authority). Municipalities have political boundaries that usually constitute only a part of the urban area. For example, the city of Seoul represents less than one-half of the population (and a declining proportion) of the Seoul-Incheon urban area, which extends well beyond the municipality. On the other hand, a municipality may be considerably larger than an urban area and therefore contain considerable non-urban (or rural) territory. Zaragoza, Spain is an example. A large part of the municipality of Mumbai is rural, composed of the Rajiv Gandhi National Park and thus not included in the urban area.

The translated term "city" is generally used to denote sub-provincial (or in some cases provincial) government areas in China. These would be more appropriately called "regions" and many were formerly referred to as "prefectures." Generally, they extend far beyond their built-up areas (such as Beijing, Tianjin, Wuhan and Guangzhou). The city of Chongqing, which has the largest population of any entity called a city (municipality) in the world and stretches far beyond any reasonable definition of a metropolitan area. Like the Riverside-San Bernardino metropolitan area, Chongqing covers a land area similar to that of Austria. Most of the municipality is well beyond the commuting range of the urban area.

### **Combined Urban Areas**

In the United States, single labor markets can be either metropolitan areas, or combined statistical areas (CSAs), which are, in effect, larger metropolitan areas or metropolitan regions, with somewhat less stringent economic interchanges (employment commuting).<sup>15</sup> Where adjacent urban footprints exist (both in CSAs and metropolitan areas), Demographia reports on combined built-up urban areas. For example, the New York built-up urban area stretches from New York to other adjacent built-up urban areas, such as Bridgeport-Stamford, New Haven, Trenton and other metropolitan areas.

In Canada, where the national census authority (Statistics Canada) defines metropolitan areas, the Toronto, Hamilton and Oshawa metropolitan areas are also considered a single labor market and are

---

<sup>15</sup> Metropolitan areas require a 25 percent employment interchange between constituent counties (US metropolitan areas are no longer based on central municipalities, but now use "central counties"). Combined statistical areas require a 15 percent employment interchange between adjacent metropolitan areas.

combined into a single combined urban area. While Canada does not designate combinations of metropolitan areas, Statistics Canada has indicated that if criteria similar to that of the United States were applied the Toronto, Hamilton and Oshawa metropolitan areas, they would constitute a combined metropolitan area.<sup>16</sup>

Other adjacent urban areas are combined in nations that do not report built-up urban area data. For example, Guangzhou and Foshan, and Tehran and Karaj are combined because of strong transport links that make commuting feasible.

COMBINED URBAN AREAS	
Designated only in Nations Reporting Urban Agglomeration Data	
NATION	COMBINED URBAN AREA & Constituent Urban Areas (Source Code "N")
Canada	TORONTO, ON: Hamilton, Oshawa, Toronto
United States	ATLANTA, GA: Atlanta, Gainesville, Winder
United States	BOSTON-PROVIDENCE, MA-RI-NH-CT-ME: Barnstable Town (MA), Dover (NH-ME), Boston (MA-NH-RI), Leominster (MA), Manchester (NH) Nashua (NH-MA), New Bedford (MA), Portsmouth (NH-ME), Providence (RI-MA), Worcester (MA-CT)
United States	CHICAGO, IL-IN-WI, Chicago, Kenosha (WI), Round Lake Beach
United States	DALLAS-FORT WORTH, TX: Dallas-Fort Worth, Denton, McKinney
United States	HOUSTON, TX: Houston, Conroe, Texas City
United States	LOS ANGELES, CA: Los Angeles, Riverside-San Bernardino, Mission Viejo
United States	NEW YORK, NY-NJ-CT-PA: Bridgeport (CT), Danbury (CT-NY), New Haven (CT), New York (NY-NJ-PA), Trenton (NJ), Twin Rivers (NJ), Waterbury, CT
United States	ORLANDO, FL: Orlando, Kissimmee, Poinciana
United States	PHOENIX, AZ: Phoenix, Avondale, Buckeye
United States	RALEIGH, NC: Raleigh, Durham
United States	SALT LAKE CITY: Salt Lake City, Ogden, Provo
United States	SAN FRANCISCO-SAN JOSE, CA: San Francisco, Concord, Livermore, Napa, San Jose, Vallejo
United States	SEATTLE, WA: Seattle, Bremerton, Indianola, Marysville
A combined urban area consists of adjacent urban areas that are located within the same labor market area (U.S. Combined Statistical Area) or equivalent).	

## 5. SMALLER URBAN AREAS (LESS THAN 500,000 POPULATION)

Information is provided for some smaller urban areas. These urban areas are *not* representative of all urban areas under 500,000 and are therefore not included in the ranking tables. Smaller urban areas are shown (1) to indicate urban areas sometimes shown by international sources to be larger, (2) where national census authority data is produced for urban areas.

The first instance is relevant to China. The Chinese term "shi" is popularly translated as "city" in English. Yet, "shi" does not denote urban. Chinese "shi" and equivalent terms are simply divisions of divisions of provinces or province equivalent (formerly called "prefectures"). China is divided into more than 3,000 "shi," most of which are primarily rural (in land area), just as the United States is divided into more than 3,000 counties and France into more than 30,000 communes, with most of their respective land areas typically being rural.

<sup>16</sup> Statistics Canada (2008), "Defining and Measuring Metropolitan Areas: A Comparison between Canada and the United States," <http://www.statcan.gc.ca/pub/92f0138m/2008002/5002030-eng.htm>.

The smaller urban areas are shown only in Table 5.

## 6. GEOGRAPHICAL NOTES

### Larger Geographical Areas

**Pakistan:** The new 2017 census data has now been reported for Pakistan. This is the first complete census since 1998. *Demographia* had reported concerns about the reliability of population estimates in Pakistan. These concerns no longer exist.

**West Africa:** *Demographia World Urban Areas* uses base population data (2010) from *Africapolis*, where available (West Africa).<sup>17</sup> *Africapolis* uses various techniques, including an analysis of satellite photographs to develop population estimates for built-up urban areas in West Africa. Moreover, the urban area definition used by *Africapolis* is consistent with the general approach by Western European governments that define built-up urban areas. The *Africapolis* data is particularly useful in West Africa, where most national statistical authorities (like those of most nations) do not report urban agglomeration data.

**Nigeria:** Unlike other nations of West Africa, there have been strong criticisms of the Nigerian census for decades, which makes the *Africapolis* built-up urban area data particularly important in Nigeria. For example, the most recent federal census (2006) been severely criticized by local officials in Lagos state as having missed many people. The census indicated that Lagos metropolitan area population was approximately 9 million. By comparison, a local census conducted at about the same time indicated a population of 17.5 million. Authoritative neutral analysis generally finds lower population levels, more consistent with data from the federal census.<sup>18</sup> The detailed analysis by *Africapolis* is believed to be the most accurate population estimates for the urban areas of Nigeria.

**Democratic Republic of the Congo:** The government recently published provincial population estimates, which made it possible to produce a far more reliable estimate for the Kinshasa urban area, which constitutes nearly all of the population of Kinshasa province. Population estimates for other urban areas are not considered reliable. The last census was more than 30 years ago (1981) and reasonably current urban population estimates have not been identified.

### Specific Built-Up Urban Areas

The notes below notes identify *some* additional components of urban areas that (1) might be thought to be separate urban areas, or (2) may be classified separate by statistical agencies or are (3) listed to indicate to better describe the geography of an urban area. No attempt is made to otherwise provide an inventory of municipalities or other entities in urban areas, because of their large numbers. For example, the Paris urban area has more than 400 local government authorities. Thus, the lack of a municipality name does not indicate that it is not included in an urban area.

Built-up Urban Area or Geography	Notes
Aachen, Germany	Extends into the Netherlands; Includes Heerlen, Netherlands.
Abuja, Nigeria	Includes Kwamba
Amersfoort, Netherlands	Included in Utrecht.
Amman, Jordan	Includes Az-Zarqa.
Amsterdam, Netherlands	Includes Haarlem
Ansan, Korea	Included in Seoul-Incheon.
Atlanta, GA urban area, USA	Combined urban area. Includes Gainesville & Winder urban areas
Avondale, AZ urban area, USA	Included in Phoenix.
Bahadurgarh, Haryana, India	Included in Delhi.
Barnstable Town, MA urban area USA	Included in Boston-Providence
Basel, Switzerland	Extends into France and Germany
Bataysk, Russia	Included in Rostov.
Bhiwandi, Maharashtra, India	Included in Mumbai (beginning in 2016).
Bogor, Indonesia	Included in Jakarta
Boston-Providence, MA-RI-NH-CT-ME urban area, USA	Combined urban area. Includes Barnstable Town (MA), Dover (NH-ME), Boston (MA-NH-RI), Leominster (MA), Manchester (NH) Nashua (NH-MA), New Bedford (MA), Portsmouth (NH-ME), & Providence (RI-MA), Worcester (MA-CT) urban areas.
Brasilia, Brazil	Includes Luziana and Gama (GO)
Bremerton, WA urban area, USA	Included in Seattle
Bridgeport, CT, USA	Included in New York.
Buckeye, AZ urban area, USA	Included in Phoenix.
Chanan (Shantou), GD, China	Included in Chaoyang
Changtai, FJ China	Included in Zhangzhou
Chaoyang (Shantou), GD, China	Includes Chaonan
Chiasso, Switzerland	Included in Milan, Italy (single labor market)
Chicago, IL-IN-WI urban area, USA	Combined urban area. Includes Chicago, Kenosha and Round Lake Beach urban areas
Choloma, Honduras	Included in San Pedro Sula
Chungli, China: Taiwan	Included in Taipei.
Chuzhou, AN China	Includes Quanjiao
Ciudad Juarez, Mexico urban area	<i>Not combined with El Paso: (International Border Controls: Not a labor market)</i>
Concord, CA urban area, USA	Included in San Francisco-San JOse
Conroe, TX urban area, USA	Included in Houston.
Dallas-Fort Worth, TX urban area, USA	Combined urban area. Includes Denton and McKinney urban areas
Danbury, CT urban area, USA	Included in New York.
Darwin, NT, Australia	Includes Palmerston.
Dashiqiao, LN China	Included in Yingkou
Daye, HUB, China	Included in Huangshui
Delhi, NCT, HA, UP, India	Includes Faridabad, Ghaziabad, Noida, Gurgaon and Bahadurgarh urban areas and New Delhi.
Denton, TX, urban area USA	Included in Dallas-Fort Worth

Detroit, MI urban area, USA	<i>Not combined with Windsor: (International Border Controls: Not a labor market)</i>
Dhaka, Bangladesh	Nayaranganj included.
Dongguan, Guangdong, China	2010 census population was well below previous local estimates
Dongyang, ZJ, China	Included in Yiwu (Jinhua)
Dover, NH-ME urban area, USA	Included in Boston-Providence
Dubai, UAE	Includes Sharja
Durham, NC urban area, USA	Included in Raleigh
Ejin Horo, NM, China	Includes Kangbashi
El Pasa, TX urban area, USA	<i>Not combined with Ciudad Juarez: (International Border Controls: Not a labor market)</i>
Ezhou, Hubei, China	Includes Huangzhou (Huanggang).
Faridabad, Haryana, India	Included in Delhi.
Foshan, Guangdong, China	Included in Guangzhou-Foshan
Francisco Morato, Sao Paulo, Brazil	Included in Sao Paulo
Fukuoka, Fukuoka, Japan	Shown as a separate urban area. Some sources combine Fukuoka with Kitakyushu (such as the United Nations).
Fushun, LN China	Included in Shenyang
Gainesville, GA urban area, USA	Included in Atlanta
Gama, GO Brazil	Included in Brasilia
Ganzhou, JX, China	Includes Nankang
Gaogang, Jiangsu, China	Included in Taizhou
Geneva, Switzerland	Extends into France
Gezbe, Turkey	Included in Istanbul
Ghaziabad, Uttar Pradesh, India	Included in Delhi.
Guangzhou-Foshan, Guangdong, China	Includes Foshan
Gujranwali, Pakistan	Includes Kamoki
Gurgaon, Haryana, India	Included in Delhi.
Haarlem, Netherlands	Included in Amsterdam.
Hague, Netherlands	Included in Rotterdam-Hague
Hamilton, ON urban area, Canada	Included in Toronto.
Hebi, Henan, China	Includes Qi
Heerlen, Netherlands	Included in Aachen, Germany.
Helan, NX China	Included in Yinchuan
Himeji, Hyogo, Japan	Included in Osaka-Kobe-Kyoto.
Hitachi, Japan	Included in Mito.
Hong Kong, China	<i>Not combined with Shenzhen: (Border Controls: Not a labor market)</i>
Houston, TX urban area, USA	Combined urban area. Includes Conroe & Texas City
Huangmei (Huanggang), HUB	Included in Jiujiang, JX.
Huangshui, HUB	Includes Daye (county level city)
Huangzhou (Huanggang), Hubei, China	Included in Ezhou.
Hubli, West Bengal, India	Does not include Dharwad.
Huiyang qu (Huizhou), Guangdong, China	Included in Shenzhen.
Huizhou, Guangdong, China	Huicheng qu only
Incheon, South Korea	Included in Seoul-Incheon,
Indianola WA urban area, USA	Included in Seattle
Istanbul, Turkey	Includes Gezbe

Jakarta, Indonesia	Higher estimate than other sources (such as the United Nations), which are largely limited to DKI Jakarta. Continuous urbanization extends into Tangerang, South Tanerang, Borgor, Bekasi and Karawang.
Jianbizhen (qu), China	Included in Zhenjiang, JS
Jiangyin (Wuxi), GD, China	Included in Zhangjiaggang (Suzhou) JS
Jianshan, HL China	Included in Shuangyashan
Jinjiang, Fuzhou, China	Included in Quanzhou.
Jiujiang, JX, China	Includes Huangmei (Huanggang), HUB.
Jixian, HL China	Included in Shuangyashan
Kalyan, Maharashtra, India	Included in Mumbai (beginning in 2016).
Kamoki, Pakistan	Included in Gujranwali
Kangbashi (Ordos), NM, China	Includes Ejin Horo
Karaj, Iran	Included in Tehran.
Karawang, Indonesia	Included in Jakarta
Kenosha, WI, USA	Included in Chicago.
Kissimmee, FL urban area, USA	Included in Orlando.
Kitakyushu, Fukuoka, Japan	Shown as a separate urban area. Some sources combine Kitakyushu with Fukuoka (such as the United Nations), which is not a part of the continuous urbanization of Kitakyushu.
Kuala Lumpur, Malaysia	The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area. Includes Port Klang.
Kwamba, Nigeria	Included in Abuja
Lagos, Nigeria	Demographia uses the Africapolis estimate as the base. See discussion above on Nigeria.
Leiden, Netherlands	Included in Rotterdam-Hague
Leon, Mexico	Includes Silao
Leonminster, MA urban area USA	Included in Boston-Providence
Lille, France	Extends into Belgium (single labor market)
Livermore, CA urban area, USA	Included in San Francisco-San Jose
Los Angeles, CA urban area, USA	Combined urban area. Includes Riverside-San Bernardino and Mission Viejo urban areas
Luziana, GO Brazil	Included in Brasilia
Manchester, VT urban area, USA	Included in Boston-Providence
Manila, Philippines	Higher than other estimates, which are largely limited to the National Capital Region. Continuous urbanization extends into Cavite, Laguna, Bulacan and Rizal.
Maputo, Monzambique	Includes Matola.
Marysville, WA urban area, USA	Included in Seattle
McKinney, TX, USA	Included in Dallas-Fort Worth.
Mersin, Turkey	Includes Tarsus
Miami, FL, USA	Includes the former urban areas of Fort Lauderdale and West Palm Beach, which have been incorporated by the US Census Bureau.

Milan, Italy	The population is higher other agglomeration estimates (such as the United Nations), which does not include all of the continuously developed urban area, which stretches well into Como, Lecco and Varese provinces. Extends into Switzerland (single labor market). includes Chiasso, Switzerland.
Mission Viejo urban area, CA, USA	Included in Los Angeles.
Mito, Japan	Includes Hitachi
Moscow, Russia	Demographia is indebted to Richard Forstall, who has provided local authority area population data for portions of Moscow Oblast within the Moscow urban areas. Other estimates (such as the United Nations estimate) largely limited to the municipality of Moscow,
Mumbai, Maharashtra, India	Includes Kalyan, and the Panvel urban area. As of 2016, also includes the Census of India urban areas of Bhiwandi, Kalyan, Vasai-Virar beginning in 2016.
Nankang, JX, China	Included in Ganzhou
Napa, CA urban area, USA	Included in San Francisco-San Jose
Nara, Nara, Japan	Included in Osaka-Kobe-Kyoto.
Nashua, NH urban area, USA	Included in Boston-Providence
Navi Mumbai, Maharashtra, India	Included in Mumbai.
Nayaranganj, Bangladesh	Included in Dhaka.
New Bedford, MA urban area USA	Included in Boston-Providence
New Delhi, NCT, India	Included in Delhi
New Haven, CT urban area, USA	Included in New York
New York, NY-NJ-CT urban area, USA	Combined urban area. Includes Bridgeport, New Haven, Trenton, Danbury, Waterbury and Twin Rivers urban areas
Noida, Uttar Pradesh, India	Included in Delhi.
Ogden UT urban area, USA	Included in Salt Lake City
Ordos, NM, China	See (1) Dongsheng or (2) Kangbashi
Orlando, FL urban area, USA	Combined urban area. Includes Kissimmee & Poinciana
Osaka-Kobe-Kyoto, Japan	Portions of the prefectures of Osaka, Kobe, Kyoto and Nara area included. Includes Himeji. United Nations estimates separate Osaka-Kobe and Kyoto and exclude both Nara and Himeji.
Oshawa, ON urban area, Canada	Included in Toronto.
Palmerston., NT, Australia	Included in Darwin
Panvel, Maharashtra, India	Included in Mumbai.
Phoenix, AZ area, USA	Combined urban area. Includes Avondale and Buckeye urban areas
Pinglu (Yuncheng) SAX China	Included in Sanmenxia
Poinciana, FL urban area, USA	Included in Orlando
Port Klang, Malaysia	Included in Kuala Lumpur.
Portsmouth, NH-ME urban area, USA	Included in Boston-Providence
Providence, RI-MA urban area, USA	Included in Boston-Providence
Provo, UT urban area, USA	Included in Salt Lake City
Qi, Henan, China	Included in Hebi
Quanjiao, AN China	Included in Chuzhou
Quanzhou, Fuzhou, China	Includes Shishi and Jinjiang
Qujing, YN China	Includes Zanyi

Raleigh, NC urban area, USA	Combined urban area. Includes Durham urban area.
Riverside-San Bernardino, CA urban area, USA	Included in Los Angeles.
Rostov, Russia	Includes Bataysk.
Rotterdam-Hague, Netherlands	Includes Leiden
Round Lake Beach, IL, USA	Included in Chicago.
Saarbrücken, Germany	Extends into France
Salt Lake City, UT	Combined urban area. Includes Ogden & Provo urban areas
Salzburg, Austria	Extends into Germany (single labor market)
San Diego, CA urban area, USA	<i>Not combined with Tijuana: (International Border Controls: Not a labor market)</i>
San Francisco-San Jose, CA urban area, USA	Combined urban area. Includes San Jose, Concord, Livermore, Napa and Vallejo urban areas.
San Jose, CA urban area, USA	Included in San Francisco-San Jose
San Pedro Sula, Honduras	Includes Choloma.
Sanmenxia, HEN China	Includes Pinglu (SAX)
Sao Paulo, Sao Paulo, Brazil	Includes Francisco Morato.
Seattle, WA urban area, USA	Combined urban area. Includes Bremerton, Indianola & Marysville.
Seoul-Incheon, Korea	Includes Suweon and Ansan.
Shanghai, China	Includes Taicang
Sharja, UAE	Included in Dubai.
Shenyang, LN China	Includes Fushun
Shenzhen, GD, China'	<i>Not combined with Hong Kong: (Border Controls: Not a labor market)</i>
Shenzhen, Guangdong, China	Includes Huiyang qu (part of Huizhou shi). 2010 census population was well below previous local estimates.
Shishi (shi), Fuzhou, China	Included in Quanzhou.
Shuangyashan, HL China	Includes Jianshan & Jixian
Silao, Mexico	Included in Leon
Strausbourg, France	Extends into Germany (single labor market)
Stuttgart, Germany	Lower estimate than some other sources (such as the Millennium City database)
Suweon, Korea	Included in Seoul-Incheon.
Taicang, China	Included in Shanghai.
Taipei, China: Taiwan	The population is higher than other estimates (such as the United Nations), which do not include all population within the continuously developed urban area (especially in Taipei County). Includes continuous urbanization in New Taipei and Taoyuan.
Taiyuan, Shanxi, China	Includes Yuci qu (Jinzhong).
Taizhou, Jiangsu, China	Includes Gaogang
Taoyuan, China: Taiwan	Included in Taipei.
Tarsus, Turkey	Included in Mersin
Tehran, Iran	Includes Karaj.
Texas City, TX urban area, USA	Included in Houston
Tijuana, Mexico urban area	<i>Not combined with San Diego: (International Border Controls: Not a labor market)</i>

Tokyo-Yokohama, Japan	Includes large areas Tokyo, Kanagawa, Chiba and Saitama prefectures and smaller areas of Gunma, Tochigi and Ibaraki prefectures.
Toronto, ON urban area, Canada	Combined urban area, Includes Hamilton and Oshawa
Trenton, NJ urban area, USA	Included in New York.
Twin Rivers, NJ urban area, USA	Included in New York.
Utrecht, Netherlands	Includes Amersfoort.
Vallejo, CA urban area, USA	Included in San Francisco-San Jose
Vasai-Virar, Maharashtra	Included in Mumbai (beginning in 2016).
Wenzhou, ZJ China	Includes Yueqing
Windsor, ON urban area, Canada	<i>Not combined with Detroit: (International Border Controls: Not a labor market)</i>
Worcester, MA urban area, USA	Included in Boston-Providence
Xi'an, Shaanxi, China	Includes Xiangyang.
Xiangyang, Shaanxi, China	Included in Xi'an.
Xicheng, Ningxia, China	Included in Yinchuan.
Yanzhou, Jiangsu, China	Includes Jiangdu shi.
Yinchuan, Ningxia, China	Includes Henan, Xicheng and Yongning.
Yingkou, LN China	Includes Dashiqiao
Yiwu (Jinhua), ZJ China	Includes Dongyang.
Yongning, NX China	Included in Yinchuan
Yuciqu (Jinzhong), Shanxi, China	Included in Taiyuan.
Yueqing, ZJ China	Included in Wenzhou
Zanyi, YN China	Included in Qujing
Zhangjiagang (Suzhou) JS China	Includes Jiayin
Zhangzhou, FJ China	Includes Changtai
Zhenjiang, Jiangsu, China	Includes Jianbizhen qu.

## 7. METHODOLOGY

The current year population estimate is modeled from the base year population, adjusted by population projections between the base year and 2018. Most population projections are from the United Nations. The base year and population is indicated for each urban area in Table 5.

National census authority population land area data is used where it is reported for urban areas.<sup>19</sup> For other urban areas, Demographia uses mapping software to estimate continuous urbanization. Demographia uses small area population data, where available, to match population estimates to urban land area.

### Sources for Base Population & Land Area Estimates

A base year population is provided for all urban areas. The base year estimate uses the methodology indicated by the coding in the "Source: Population" column.

<sup>19</sup> There are exceptions. *Demographia* provides separate estimates of some urban areas in India, where no build-up urban area data is reported (in some cases the Census of India reports municipality rather than urban area data). *Demographia* also provides a separate estimate for the land area of Marseille because the INSEE definition includes a large rural territory within the urban area (a mountain range, Chaîne de étoile).

The tables indicate the method used to estimate both the land area and the base year population of each built-up urban area. The following codes are used:

Source Codes: Population and Land Area	
Code	Source of Land Area or Base Year Population Estimate
A	Based on National census authority built-up urban area data (land area or population).
B	<i>Demographia</i> land area estimate based upon map or satellite photograph analysis.
C	<i>Demographia</i> population from lower order jurisdictions, with downward adjustment for rural population.
D	Based on United Nations agglomeration estimate.
F	Other population estimate or other <i>Demographia</i> population estimate..
L	Same as category “C”, based on a local government population estimate.
N	Combined urban area based on national census authority population and land area data
W	Based on <i>Africapolis</i> population estimate

**Presentation of Source Codes in Tables:** The source codes are listed in the “Pop:Area Source” column following this form: “C:B”, where “C” indicates the source from which the base population was estimated and “B” indicates the source of the land area estimate. In this example, the population base is estimated by *Demographia* and the land area data is estimated by *Demographia*.

### Reliability

The most reliable sources are as follows:

- National census authorities, where representative agglomeration data is available (such as in the United States, the United Kingdom, Canada, France, Sweden, Norway, India and Australia).
- *Africapolis* population and land area estimates (Source code W), which replicate the results that would likely be obtained if census authorities in West Africa reported built-up urban area data.
- *Demographia* population estimates.

### Urban Density Calculations

*Demographia World Urban Areas* provides average urban population density data.

It is not possible to precisely coordinate the dates of current population estimates with land area estimates, except in cases where the built-up urban area population and land area are provided by national statistical authorities (Source Code A:A). However, *Demographia* attempts to best match population estimates within the urban areas with their geographical extent as indicated in Tables 2 through 5.

- Where national census authorities report both built-up urban area population and land area in a manner generally consistent with international practice, the density calculation uses the base year population (in Table 5) divided by the land area. As a result, the density estimate is for the *base year*, not 2018.

- In all other cases, the density calculation is the latest population estimate divided by the latest land area estimate and is a 2018 figure.

Built-up urban area population densities are expressed in rounded numbers (to the nearest 100 per square mile or square kilometer). Urban population densities should be considered reasonable approximations.

## 8. CAUTION: TREND ANALYSIS

*Demographia World Urban Areas* is a continuing project and attempts to provide “state of the art” data. Revisions are made as more accurate satellite photographs and population estimates become available. As a result, *Demographia World Urban Areas* is not intended for trend analysis.

Year-to-year changes indicated in population and land area may merely reflect better data that was not available before and may not, therefore indicate a trend. Moreover, the current year population estimates are nearly always a projection from a base year calculated from census or official estimate data. Changes in population projection rates can result in substantial current year population estimates that are not related to actual population growth or loss.

There is little or no historical urban area data and sources are continually improving. Moreover, nearly all of the data is estimated. Appropriate caution is therefore advised.

## 9. DEMOGRAPHIA WORLD URBAN AREAS: BACKGROUND

*Demographia World Urban Areas* is in its 14<sup>th</sup> year of publication. It was established for the purpose of bringing some consistency to the subject of urban density, in hopes of replacing anecdotal comparisons between cities that are often grossly invalid. The built-up urban area is the only level at which there is sufficient data to estimate the densities of the urban organism at anything approximating international standards. Even with this data, the science of urban area density is in its infancy.

*Demographia World Urban Areas* was the first source to identify the under-estimation of population in some of the world’s largest urban areas. For example, *Demographia’s* early estimates of the Jakarta, Delhi, Manila and Kuala Lumpur urban area populations were far higher than reported by others at the time. Other sources have revised their estimates upward. The earlier, lower estimates of others were, in actuality, municipal estimates that did not sufficiently take into consideration the spread of urbanization beyond city or other geographical limits. *Demographia’s* larger population estimates were the result of actual satellite map examination of the urban form. As has been noted elsewhere, the improving satellite maps have permitted greater accuracy in later years. Similarly, in many cases, *Demographia’s* estimates have been lower than reported elsewhere for the same reason --- satellite examination has often shown other urban area estimates to include rural areas, which are by definition not urban.

## 10. COVER ILLUSTRATION: PARIS TOUR MONTPARNASSE TO EIFFEL TOWER & LA DEFENSE

Paris, the world’s 32<sup>nd</sup> largest urban area (see: [The Evolving Urban Form: Paris](#)). The cover photograph (by the author) was taken from the top of Tour (Tower) Montparnasse, looking toward the Eiffel Tower, across the Bois de Boulogne to La Defense, which is the most concentrated commercial center in the Paris

metropolitan area. La Defense may be the largest “Edge City” (suburban commercial center) in the world. Edge City is a concept defined and popularized by Joel Garreau, in [\*Edge City: Life on the New Frontier\*](#), Anchor Books, 1991).

## 11. COMMENTS AND SUGGESTIONS

Demographia wishes to produce the most accurate possible estimates. This edition incorporates changes from suggestions that were deemed to be appropriate. Comments, suggestions, criticism and data are welcomed.
