

TLG Miscellanea Proposal
TLG

Additions to Greek and Coptic:

Greek Letter San. This letter became numerical sampi (03e0, 03e1), but their affinity is only historical; they should be considered analogous to Koppa (03de, 03df) vs. Epigraphical Koppa ().

C GREEK CAPITAL LETTER LUNATE SIGMA, as distinct from GREEK SMALL LETTER LUNATE SIGMA. (In the texts the TLG has preserved Lunate Sigma in, case is routinely distinguished, even if this is a modern editorial convention; 1470 instances, in 50 authors.)

Others:

	xxx0	xxx1	xxx2
